

Informatica Data Quality Baseline Deployment

Informatica Professional Services

Duration: 10 days

IPS Staff Level: Senior Consultant

Description

The Informatica Data Quality Baseline Deployment engagement enables you to build on the skills you acquired in Informatica Data Quality product training and accelerate the effective deployment of Informatica Data Quality within your enterprise. Over the ten days of the engagement, you'll benefit from the knowledge and experience of Informatica Data Quality professionals, learn to analyze and enhance the quality of your data based on your specific initiatives and goals, and collaborate on a concrete set of steps to further improve your data and generate a real return on your investment in Informatica Data Quality.

Value:

- Increase your knowledge of Informatica Data Quality with access to professional expertise and documented best practices
- Discover the readiness of your data for diverse projects through initial scorecards, providing essential knowledge of how to improve the quality levels of your key data attributes
- Increase your project planning ability and sharpen your projections of the resources and time frames required to complete a project
- Confidently plan your data quality strategy for your design, development, and testing processes
- Reduce project risk by gaining visibility of hidden data quality issues
- Engage with business owners with early results, creating wider awareness and buy-in for your data quality strategy

Deliverables:

- Informatica Data Quality software installed, configured, and reading data from your systems
- Intelligence and guidance on Informatica's data quality methodology and best-practices uses of Informatica Data Quality software
- A series of data quality scorecards that display the key quality characteristics of your data and track improvements in your data's quality over time
- A series of data quality business rules, discovered during this baseline implementation, that you can augment as your organization implements its data quality platform
- A baseline set of data quality processes, prepared with your team, providing the framework to effectively take your project forward
- Concrete recommendations and calls to action for preparing data for specific data projects, meeting industry data regulations, and maximizing the value of data across your organization

Prerequisites:

Our Data Quality Consultant will need access to:

- Appropriate business and IT personnel
- A representative sample of data from your enterprise
- Your systems, to install the software and connect to data

Details:

With our Data Quality Consultant, you'll accomplish the following:

- Install the Informatica Data Quality software within your environment
- Identify relevant data sources and load/connect them to Informatica Data Quality
- Learn about Informatica's data quality methodology and best practices for analyzing, cleansing, standardizing, and matching/de-duplicating data
- Perform first-pass data analysis and build a series of data quality scorecards
- Define data quality business rules that are suitable for your data
- Begin the process of applying data quality business rules with Informatica Data Quality, progressing through the following areas:
 - Analysis
 - Cleansing and Standardization
 - Grouping and Matching
- Learn how to build and edit data dictionaries
- Learn how to troubleshoot and tune your data quality processes
- Build data quality scorecards, classifying the areas of data quality concern in your data, and develop a prioritized list of areas that need attention
- Document and standardize final code from the engagement
- Document "Next Step" business rules and data quality steps for implementation
