

Integration Competency Center Launch

Informatica Professional Services

Duration: Dependent upon project scope; Typically 30 days or less

Description:

Business objectives have been defined and Informatica's technology has been chosen to help meet them. Now comes the hard part: implementing the right solution, on time, and on budget. This is not the time to take chances. Effectively deploying data integration and data quality solutions is critical to the business—and an enormous challenge for any organization.

The Informatica Professional Services team knows Informatica products and data management lifecycles better than anyone else. Working from a proven lifecycle methodology, Velocity, and leveraging best practices learned from thousands of implementations, Informatica Professional Services consistently and predictably delivers high-quality solutions for hundreds of customers each year.

In order to launch a successful Integration Competency Center (ICC), a sound and scalable Informatica infrastructure configured to support a multi-project, multi-SLA environment is required. Leverage Informatica's expertise to ICC-enable your Informatica platform with real time capabilities, high availability, shared object strategies, and grid technology. Informatica will work with your team to design an Informatica architecture strategy, including logical and physical hardware/software configuration, local/global repository structure, and provide a security/audit strategy.

Drawing on our proven, 13-year track record of innovation and leadership, Informatica has defined the standard for data integration that has delivered competitive advantage and operational excellence to leading Global 1000 companies and government organizations.
