

# Informatica Data Quality Dashboard and Reports

## Quick Start

### *Informatica Professional Services*

**Duration:** 10 days

**IPS Staff Level:** Senior consultant

#### **Description:**

The Informatica Data Quality Dashboard and Reports Quick Start engagement will jump start the development of Web-based dashboards and reports tracking data quality metrics. These reports offer drilldown and trending capabilities that can be utilized when monitoring your enterprise data quality initiatives. During the ten days of the engagement you'll benefit from the knowledge and experience of Informatica Data Quality professionals, learn to report and analyze the quality of your data toward your specific projects and goals, and build data quality dashboards and reports that can be leveraged throughout your organization.

#### **Value:**

##### **Dashboards & Reports**

- Increase your knowledge of Informatica Data Quality and the Informatica Data Quality Dashboard and Reports Option (Data Analyzer) with access to professional expertise and documented best practices
- Discover the readiness of your data for diverse projects through initial dashboards, providing essential knowledge of how to improve the quality levels of your key data attributes
- Begin to develop simple, cross tab and sectional data quality reports by selecting metrics and attributes from a schema
- Discover means to create custom metrics at the report and schema level

##### **Trending**

- Begin to capture trend analysis results through a time series report where users can compare today's data with past data
- Learn to leverage trend reports to monitor the level of data quality within your organization

##### **Enterprise Strategies**

- Develop Web-based dashboards and reports to capture key data quality metrics that can reported to senior management responsible for an overall data quality strategy
- Discuss strategies to distribute dashboards and reports to create a wider organizational awareness of your data quality initiatives

## Deliverables:

- The Informatica Data Quality Consultant will lead schema design workshops leveraging the demo schema provided
- Where applicable, Informatica Data Analyzer software to be installed, configured, and connected to the schema that holds your Informatica Data Quality results
- Initial data quality dashboards and reports that display the key quality characteristics of your data and track improvements in your data's quality over time
- Establishment of a dashboard and reporting framework to track the progress of data quality initiatives and the potential impact throughout the organization
- Concrete recommendations on how to leverage the Data Quality Dashboard and Reports Option to effectively manage and monitor data quality initiatives across your organization

## Prerequisites:

This engagement assumes the previous completion of the Informatica Data Quality Baseline Package and/or the Informatica Data Quality Audit engagement.

Additionally, our Data Quality Consultant will need:

- Access to appropriate business and IT personnel
- Installation and configuration of Informatica Data Quality within your environment
- A representative sample of data from your enterprise that has been processed by Informatica Data Quality

## Details:

With our Data Quality Consultant, you'll accomplish the following:

- Where applicable, initial installation of Informatica Data Quality Dashboard and Reports Option (Data Analyzer) within your environment
- Learn about Informatica's data quality methodology and best practices for leveraging Data Analyzer in conjunction with Informatica Data Quality in order to monitor data quality metrics
- Build a series of data quality reports and dashboards leveraging the first pass data quality analysis developed during the Informatica Data Quality Baseline Package or Informatica Data Quality Audit engagements
- Document "Next Step" reporting strategies that should be addressed within your organization
