

Informatica Identity Resolution Baseline Deployment

Informatica Professional Services

Duration: 5 days

IPS Staff Level: Senior Consultant

Description

This engagement builds on the skills you acquired in Informatica® Identity Resolution™ (IIR) product training, enabling you to accelerate deployment in your environment. Informatica professionals will show you how to analyze the quality of your data based on your specific identity data matching initiatives and goals. You'll learn to leverage the capabilities of Informatica Identity Resolution to develop a concrete set of steps to improve the quality of your identity data.

Value

- Increase your knowledge of Informatica Identity Resolution with access to professional expertise and documented best practices
- Increase your project planning ability and sharpen your projections of the resources and timeframes required to complete a project centered around identity resolution
- Confidently plan your data quality strategy for your design, development, and testing processes related to searching and matching identity data, such as name and address data
- Reduce project risk by gaining visibility of hidden data quality issues due to duplicate data

Deliverables

- Informatica Identity Resolution software installed, configured, and reading data from your systems
- Intelligence and guidance on Informatica's data quality methodology and best-practices uses of Informatica Identity Resolution software
- A baseline set of matching processes, prepared with your team, providing the framework to effectively take your project forward
- Concrete recommendations and strategies for preparing data for identity resolution projects, meeting industry data regulations, and maximizing the value of data across your organization

Prerequisites

The Informatica consultant needs access to:

- Appropriate business and IT personnel
- A representative sample of data from your enterprise (the number of data sources and type of data within your environment will impact the length and scope of the engagement)
- Any predefined data quality processes currently leveraged within your organization
- Your systems, to install the software and connect to data

Details

With the help of an Informatica consultant, you'll accomplish the following:

- Install the Informatica Identity Resolution software within your environment
- Learn about Informatica's data quality methodology and best practices for high-quality identity data search-and-match
- Begin to define matching strategies that are suitable for your data
- Where applicable, discuss how to leverage Informatica Data Quality™ in conjunction with Informatica Identity Resolution
- Learn how to edit the Informatica Identity Resolution population files
- Learn how to troubleshoot and tune your Informatica Identity Resolution processes
- Document "Next Step" business rules and data quality steps for implementation
