

# Metadata Manager Customization

## *Informatica Professional Services*

**Duration:** Dependent upon project scope and environment  
**IPS Staff Level:** Senior Consultant

### Description

Customizing and deploying an enterprise metadata management and reporting solution involves complex technical requirements and in-depth knowledge of the Metadata Manager architecture and Common Warehouse Metamodel (CWM) specifications. Such projects are most successful with careful planning and rigorous development methods. Informatica will work with you on a detailed assessment of your metadata environments; a review of your metadata management and reporting requirements; the design and implementation of the Metadata Manager customizations necessary to enhance the sourcing/extraction processes (resources), the load logic (mappings, workflows), and the Metadata Manager data architecture, as needed, for your customizations; and the redesign and deployment of your custom reports. The Metadata Manager Customization engagement is based on Informatica's Velocity Methodology, therefore ensuring that the collective experience of Informatica Professional Services is utilized.

### Value:

- Informatica Professional Services experience that ensures optimal quality, rapid delivery time, and a well-defined path to successful deployment
- Extensive review of technical environments and metadata management requirements to assure proper project focus
- Deliberate approach that can identify and clarify fundamental issues before project begins
- Expert knowledge transfer to equip your personnel

### Deliverables:

- Installation and configuration of Metadata Manager architecture, if required
- Detailed review of metadata management requirements
  - Metric and Dimension attribute definitions and detailed reporting requirements
  - Metadata sources definitions and structures
  - Reporting requirements
- Documentation of Metadata Manager resource customization requirements
- Design and Implementation of custom Metadata Manager resources to extract enterprise metadata from proprietary metadata systems of record
- Review of reporting results and help providing customized metadata reports
- Project recommendations document and knowledge transfer throughout

## Customer Requirements:

In order to ensure successful delivery of the Metadata Manager Customization engagement, it is advised that necessary resources should be available to work with our senior consultants in terms of accomplishing the install, discovery, customization, and implementation phases. Such resources include available hardware, software, network access, license keys, and personnel. Access to such resources will ensure that maximum value and knowledge transfer will be delivered with this engagement.
