

Informatica Global Education Services

Mastering Great Products for Great Results

Joe Caputo

Director, Pfizer

“We launched an aggressive data migration project that was to be completed in one year. The complexity of the data schema along with the use of Informatica PowerCenter tools proved challenging to our top colleagues. We sent a key developer to an Informatica PowerCenter Level I training to help us get our project back on track so we wouldn’t have to ask for an extension. We believe that Informatica training led us to triple productivity, helping us to complete the project on its original one year schedule.”

BENEFITS

- Expert instructors with real world experience and in-depth product knowledge show your staff how to leverage full product functionality for maximum ROI
- Role-based curriculum offers a broad range of training options to meet your individual needs
- Flexible, convenient training options save time and money by delivering classes on site, on line, and on location at training centers

Demand Best-in-Class Training

Informatica recognizes that the success of your enterprise data integration strategy depends not only on the strength of the software you implement, but also on quality training designed to help you get maximum value from your investment. Specialized training enables your team to take full advantage of the power and richness of Informatica products. Your organization needs Informatica Global Education Services.

Informatica Global Education Services supports your organization’s success by providing your team with the skills and knowledge necessary to fully leverage and optimize Informatica software for your evolving business and technical environment. A complete curriculum of role-based training ensures that your team members can skillfully and efficiently meet the demands of their jobs—whether deploying, maintaining, or upgrading Informatica solutions—and align IT infrastructure with business needs.

More than 20 courses, spanning Informatica’s entire product line, are available on site, over the Internet, and in state-of-the-art training centers located around the world.

Role-based Curriculum and a Variety of Training Options

Training from Informatica Global Education Services is designed to provide a rich, intensive, and highly applicable learning experience. All course curriculum is developed by industry-recognized experts with both a practical and theoretical command of the subject matter they teach. Role-based curriculum emphasizes real-world applications, combining lectures and demonstrations with hands-on labs, discussions, and question-and-answer sessions for maximum understanding and retention.

Course Curricula

Informatica Global Services provides an extensive curriculum of education courses to ensure your success with Informatica software. These courses are developed by industry-recognized experts with both a practical and theoretical command of the subject matter they teach. Role-based curriculum emphasizes real-world application, combining lectures and demonstrations with hands-on labs, discussions, and Q&A sessions for maximum understanding and retention.

Training is available for the entire Informatica product suite. Representative courses include:

- Informatica PowerCenter Developer Levels I & II
- Informatica PowerCenter Administrator
- Introduction to PowerExchange
- Informatica Data Quality Level I
- Informatica Data Explorer Level I
- Metadata Manager
- Informatica B2B Data Transformation
- Informatica Identity Resolution

Training is also available for important data integration projects and initiatives, such as:

- Data Warehouse Development
- Informatica On Demand
- Integration Competency Centers (ICCs)

Training Environments

A variety of training environments are available to best meet your needs.

Public Classes

Instructor-led public classes offer intensive, role-based training in fully equipped, world-class Informatica Learning Centers located around the world. Class sizes are kept to no more than 15 students at a time, allowing instructors to provide individualized attention. Public classes also give you the opportunity to meet and interact with your peers, further enhancing your learning experience by sharing real-world tips, tricks, and best practices.

On-Site Training

On-site training events are designed to meet your business needs and requirements. Convenient and cost-effective, on-site training events are delivered on site at your location to reduce impact on your day-to-day business.

Informatica Virtual Academy

The Informatica Virtual Academy offers scheduled instructor-led interactive Webcasts. Course content is packaged in four-hour single- and multi-day sessions. You don't have to travel or spend time away from the office. Informatica Virtual Academy delivers standard course material, with hands-on labs and instructor interaction, directly to your desktop.

Informatica Professional Certification

With Informatica Professional Certification, you prove that you have the knowledge and skills needed to meet today's complex data integration and data quality challenges. You establish your professional credibility with your employer and within the greater IT industry. Whether you are a consultant, project administrator, or data specialist, Informatica Professional Certification provides you with new opportunities to help improve your productivity, increase your marketability, and succeed in your career.

Informatica Professional Certification is a three-step process:

- 1 Review an Informatica Study Guide that outlines exactly what you need to know, listed topic by topic
- 2 Prepare through hands-on experience with Informatica products
- 3 Pass a set of challenging multiple-choice examinations

About Informatica

Informatica enables organizations to gain a competitive advantage in today's global information economy by empowering them to access, integrate, and trust all their information assets. As the independent data integration leader, Informatica has a proven track record of success helping the world's leading companies leverage all their information assets to grow revenues, improve profitability, and increase customer loyalty.
