

HIPAA 5010 Crosswalk Solution

Comply, Test, and Deliver on Looming Compliance Deadlines

BENEFITS

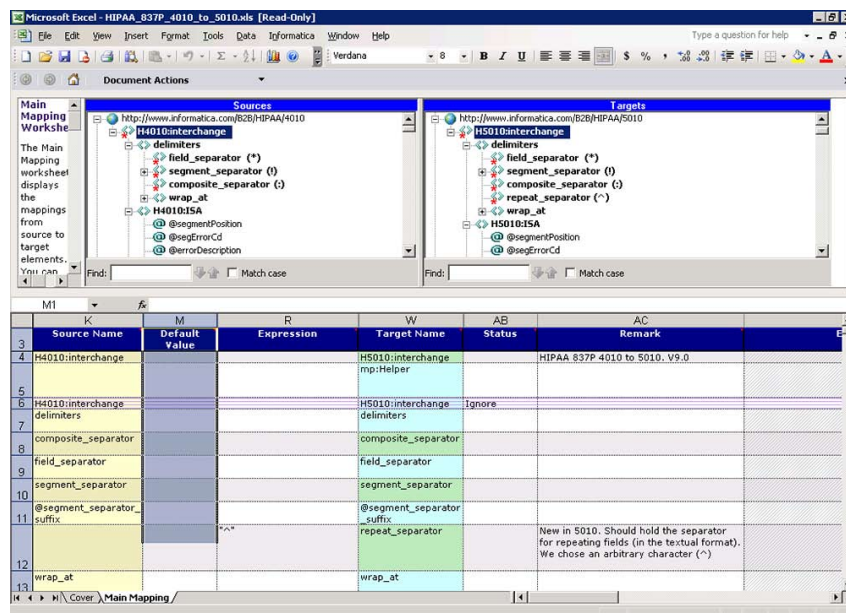

- Handle HIPAA 4010 and HIPAA 5010 transaction formats simultaneously during transition
- Decrease impact to business operations by insulating core administrative systems
- Decrease risk by handling partner customizations quickly
- Leverage HIPAA transaction experts with flexible user-friendly Excel Accelerators

Health care payers, providers, clearing houses, government agencies, and third-party billing services covered by the Health Insurance Portability and Accountability Act (HIPAA) exchange data using the HIPAA 4010 transaction format. As of January 2011, they begin a challenging testing period where organizations must continue business operations with 4010, and also test the new 5010 format. As of January 2012, they must adapt and comply fully with the more rigorous HIPAA 5010 format.

During the transition, health care organizations must remain in compliance while continuing to provide and bill for services. The **Informatica HIPAA 5010 Crosswalk Solution** enables organizations to run both versions of HIPAA transactions during the transition period. This insulates organizations from the risk of missing looming deadlines.

The HIPAA Crosswalk Solution provides flexibility. By providing complete bi-directional HIPAA 4010/5010 transaction crosswalk transformations, you can save time. Analysts use a set of Excel Accelerators to override and define mapping specifications to tune translations to fit the business process and partner. These translations can be integrated directly into existing business processes or become part of a larger strategy to enhance the existing administrative processes with additional data management capabilities.

The HIPAA Crosswalk Solution reduces risk. By including HIPAA validation for both 4010 and 5010 formats, you can ensure that translations are tested before exchanging transaction with your partners. In addition to the many scenarios already tested, you can easily tweak and develop additional testing scenarios that will decrease the chance of production failures in 2012.

Empower your business analysts to customize, modify, or review the bi-directional and pre-built mappings with the HIPAA 5010 Accelerator

Key Features

Comprehensive HIPAA 4010/5010 Crosswalk

- Bi-directional transformations with complete HIPAA 4010 and 5010 specifications libraries provided
- Validate transaction sets and codesets against 7 levels of WEDI SNIP types
- Facilitate development, debugging, and deployment with graphical environment for crosswalk maps, spec definitions, and customizations

Rapid User Flexibility

- Empower HIPAA experts with an easy-to-use Excel Accelerator to override defaults and override mappings quickly
- Customize translations by partner as they phase migration
- Quickly create testing scenarios to ensure internal readiness

Universal Data Transformation

- Handle inbound data included in the new 275 Attachment, including HL7, NCPDP, and other formats
- Support unstructured data formats, such as PDF, Excel, Microsoft Word, flat files, and binary data streams
- Support XML and XSD schemas natively

Deploy Anywhere and Grow Easily

- Deploy crosswalk anywhere in your business process flow
- Quickly create custom business testing scenarios

- Easily transition to the Informatica Data Exchange and Gateway bringing trading partner management portals and reusable flows, robust event monitoring, and increasing data quality at the point of entry

Benefits

Ensure On-Time Compliance with HIPAA 5010

The HIPAA 5010 Crosswalk Solution enables your organization to comply with changing HIPAA regulatory requirements by supporting the current and future transaction formats simultaneously. Your organization avoids the risks and penalties of noncompliance while continuing to operate seamlessly.

Minimize Risk

With the HIPAA 5010 Crosswalk Solution, your organization can migrate gradually, testing at every step. You avert potential integration problems that could affect cash flow while reducing errors that affect productivity and customer service. Enhanced visibility into transaction events also enables you to further streamline operations where possible.

Boost Productivity

User-friendly tools built into the HIPAA 5010 Crosswalk Solution help HIPAA transaction analysts engage thoroughly and consistently. Increase IT productivity and costs by decreasing repetitive coding and mapping, streamlining management, and minimizing errors. By sharing and reusing work and results, your organization processes transactions faster.

Increase Efficiency and Customer Satisfaction

The HIPAA 5010 Crosswalk Solution allows you to adapt to the needs of your partners creating brand loyalty and keeping business operations running smoothly. This agility can serve as a low cost method to meet the 5010 mandate or serve as the backbone of administrative operations in the future.
