AI Governance Professional Services Units MVP Package

Empower your AI initiatives with Governance

Where data
& AI come to **LIFE**

Unlocking the Power of AI Governance

Our comprehensive AI governance service is designed to help your organization confidently navigate the complexities of AI adoption. From assessing your current readiness to implementing high-impact use cases, we provide expert guidance and tailored solutions that ensure responsible, effective and sustainable AI governance. With a strategic roadmap and stakeholder empowerment, we enable long-term success and trust in your AI initiatives.

-  **Tailored Assessment:** We'll evaluate your organization's AI governance readiness and identify areas for improvement.
-  **Quick start:** Our experts will set up and configure AI Governance using Informatica Cloud Data Governance and Catalog.
-  **MVP implementation:** We'll help you identify, prioritize and implement a high-impact use case to demonstrate immediate value.
-  **Strategic Roadmap:** We'll develop a customized operating model and adoption plan to drive long-term success.
-  **Stakeholder Engagement:** We'll empower your business AI governance stakeholders with the knowledge and tools they need.

Don't wait. Let us help you unlock the full potential of your data today.

“In order to be good at AI, you’ve got to have your foundations in place.”

Bhupinder Kaur Johal (Pinder)
Data Manager Office, GHD

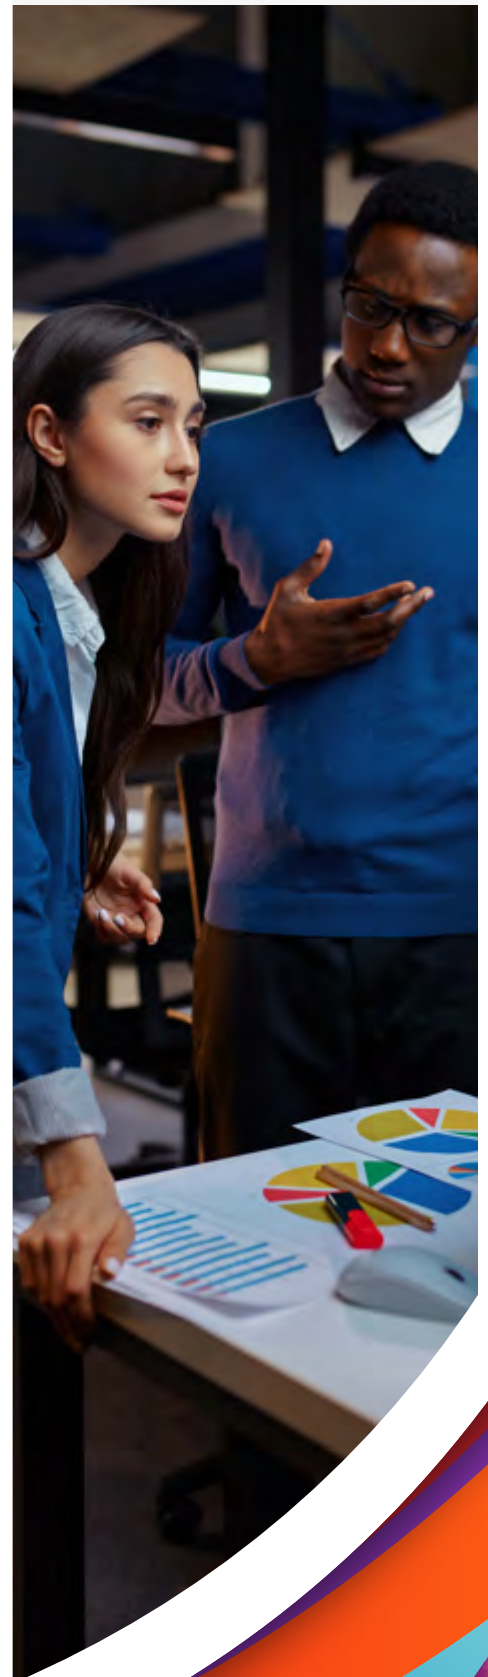

AI governance is essential for modern organizations. As AI initiatives and projects expand across the enterprise, it becomes critical to oversee, understand, manage, and operationalize them effectively. This is particularly important in light of evolving regulations such as the EU AI Act, which requires not only robust AI governance but also strong data governance practices.

Achieving this level of governance requires a dedicated, end-to-end platform capable of supporting the numerous aspects of governance at scale.

How it Works

We follow a lean and agile integration approach to ensure predictable, timely results and aim to achieve a competitive advantage for your business. Our advisory AI governance experts conduct an assessment and kickoff workshop, determining the current state and identifying a targeted AI Governance business use case to demonstrate value. Solution experts analyze use case needs, configure the environment and provide guidance for AI and data utilization. We then prepare a roadmap and recommendations for your success.

Ready to unlock the full potential of your AI governance strategy? Partner with us and elevate your data governance journey to new heights!

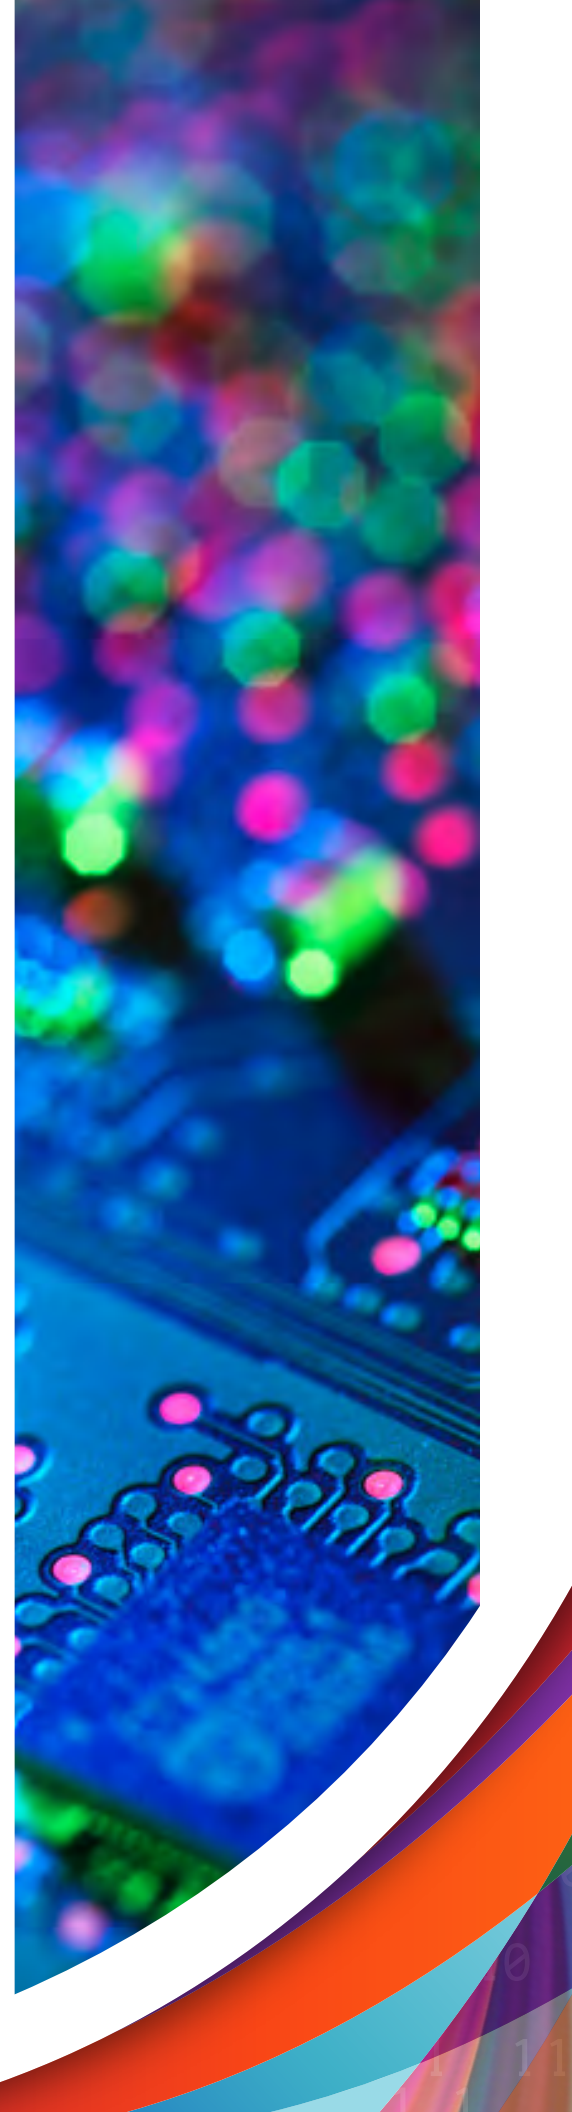

What You Get

- A readiness assessment and workshop to align teams quickly.
- A solid foundation and solution architecture advice for deploying Informatica's Cloud Data Governance and Catalog product.
- Best practices for data asset publishing, sharing, collaboration and integration.
- Guidance for developing the initial prototype to familiarize you with the solution.
- Direction for the next phase of implementation.
