

Securing Sensitive, Private Data

Business Need

- Securing sensitive, private data to remain compliant with industry regulations (GDPR, HIPAA, etc.) policy holders and clients
- Lowering risk associated with the modernization of systems, including Microsoft SQL server and Jira
- Becoming more adaptive to market changes while moving products to market faster

Challenges

- Establishing data privacy methodologies in a more agile environment
- Gain actionable data discovery & classification, risk scoring, behavioral analytics, and automated protection in a single solution

Solutions & Results

- Utilizing Informatica Secure@Source for a full scope of visibility into sensitive data
- Transforming data systems with Secure@Source, Microsoft SQL Server and Jira to create a fully modernized and agile environment
- Continuously and accurately measuring compliance of privacy data

“We thought the depth and breadth of the solution was the best we’d seen. There really was no comparable competitor, to be honest.”
