

Inside the Solution

- Informatica PowerCenter
- Informatica Data Quality
- Informatica MetaData Manager
- Informatica Master Data Manager
- Informatica Professional Services
- Informatica Global Support

Summary

Fannie Mae is continuing to deliver on its mission to enable people to buy, refinance, or rent a home. The company provides large-scale access to housing finance in America, based on a foundation of accurate collection and reporting of data for financials and improved risk management.

Business Need

- Avoid large penalties by adhering to Dodd-Frank and other regulatory requirements established after 2008 global financial crisis.
- Provide quarterly reporting to Federal Reserve and Wall Street regarding overall business risk as a function of: data quality and accuracy, credit-worthiness of loans, and risk levels of investment positions.
- Ensure that business operations teams have the appropriate software tools to effectively and efficiently manage data, so that business decisions are then made consistently using the most accurate business data available.

Challenge

- Ensure clean and correct data is collected and integrated from 100+ data sources including:
 - mortgage data
 - real estate attributes
 - securities created from the repackaging of loans.
- Collect and present information about how critical business data enters, flows through, and is changed by multiple internal processing and reporting applications, ensuring traceability to the individual user at the subject area (loan, security, property) level.

Solution and Results

- Fannie Mae's initiative leverages Informatica PowerCenter and Informatica Data Quality as a high availability, scalable platform for Data Quality, with a separate MetaData Manager implementation used for business glossaries and data lineage.
- Informatica Master Data Manager will be used in a new strategic project, targeted for the 2015 timeframe.

Digital transformation is changing our world. As the leader in enterprise cloud data management, we're prepared to help you intelligently lead the way. To provide you with the foresight to become more agile, realize new growth opportunities or even invent new things. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.
