

Unlock the Power of Cloud Applications with Informatica PowerCenter and Informatica Cloud

Native Connectivity to Every Major Cloud Application

Operational data in each of your company's departments is increasingly moving to the cloud. Every group within your company has its own favorite applications: Salesforce for sales, NetSuite for finance, Workday for HR, Amazon Redshift for IT, and much more. Manually parsing through the APIs of each disparate cloud application to create integration workflows can be challenging, especially when these APIs are upgraded every couple of months. Informatica Cloud has more than 100 native connectors and includes connectivity to every major cloud ecosystem.

Limited Time Upgrade Package

For a limited time, you get all the industry-leading features of Informatica Cloud Premium edition plus:

- 3 free connectors besides the 5 already included with Premium edition
- 5 free templates using the advanced Informatica Cloud Mapping Designer, consisting of popular PowerCenter transformations
- 2 free additional Cloud Secure Agents to help you achieve maximum performance when using PowerCenter with Cloud
- Free 2 hours of live training with a cloud customer success architect on using Informatica Cloud
