

Informatica Cloud Workday Connector

Enterprise-class, bi-directional data integration for Workday provides insights into your most valued asset—your employees.

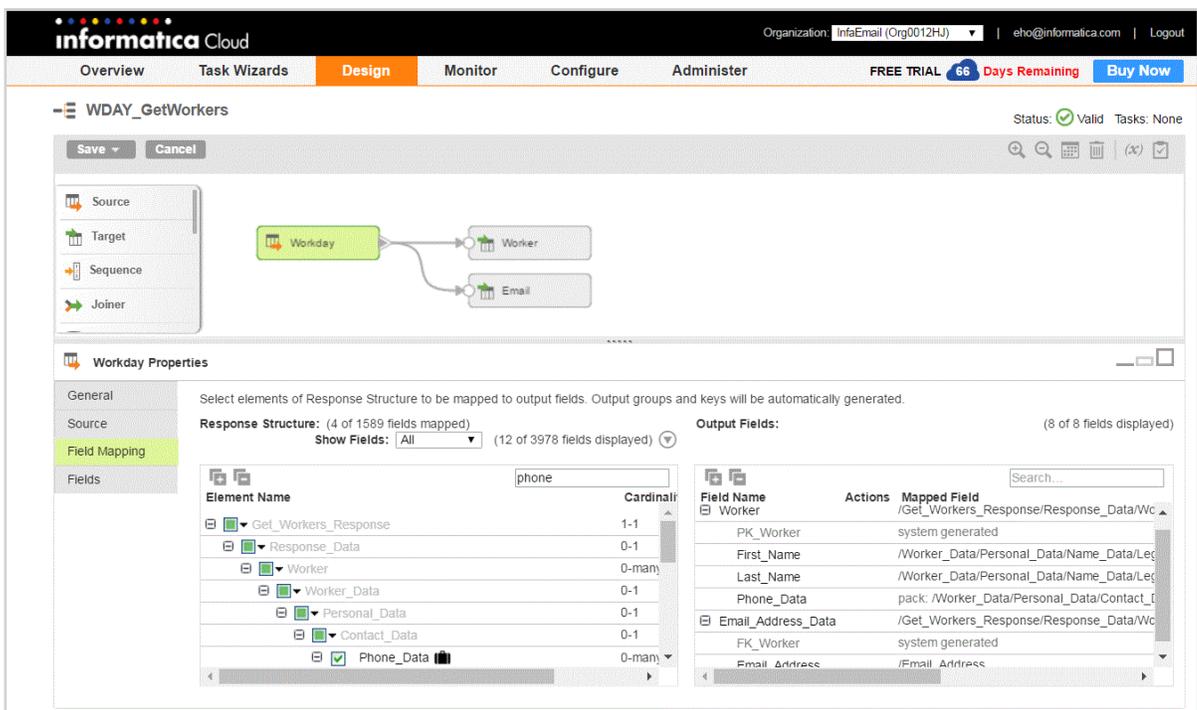

Benefits

- Features a simple, intuitive interface
- Supports all Workday modules and services
- Integrates Workday with on-premise, cloud, and SaaS apps
- Connect with the market-leading cloud integration platform

As your company evolves, so does the need to update, scale, and integrate your human resource and financial systems with data from across the enterprise. Whether you are looking to streamline your Human Capital Management (HCM) business process, migrate data from a legacy HR/ERP system bound for retirement, or want to integrate siloed employee data from on-premise, SaaS, or cloud applications, you may be overwhelmed at the prospect of an onerous and costly task. This doesn't have to be the case.

Informatica Cloud Workday Connector unifies Workday with data from across the enterprise. Its intuitive drag-and-drop interface extends the capabilities of Workday Financial Management and Human Capital Management (HCM) solutions by providing bi-directional connectivity and synchronization to essential on-premise, SaaS, and cloud data sources such as SAP, NetSuite, Amazon Web Services, Oracle, Microsoft, and Salesforce.

Regardless of whether you are looking to integrate data from your Salesforce CRM system, extract data to a data warehouse, or integrate Workday and NetSuite data, you can dismiss any thought of manually building and maintaining customer point-to-point integrations. With Informatica Cloud, you can be assured of data accuracy, improve business decisions and operations, and derive maximum value from all your Workday investments.

The screenshot displays the Informatica Cloud interface for configuring a data integration process named 'WDAY_GetWorkers'. The interface includes a top navigation bar with tabs for Overview, Task Wizards, Design (active), Monitor, Configure, and Administer. A 'FREE TRIAL' banner indicates 66 days remaining. The main workspace shows a visual flow diagram with a 'Workday' source connected to 'Worker' and 'Email' target nodes. Below the diagram, the 'Workday Properties' panel is open to the 'Field Mapping' tab. It shows a tree view of the 'Response Structure' (4 of 1589 fields mapped) and a table of 'Output Fields' (8 of 8 fields displayed). The 'Output Fields' table lists field names, actions, and mapped fields for the 'Worker' and 'Email' targets.

Field Name	Actions	Mapped Field
PK_Worker	system generated	/Get_Workers_Response/Response_Data/Wc...
First_Name	/Worker_Data/Personal_Data/Name_Data/Le...	
Last_Name	/Worker_Data/Personal_Data/Name_Data/Le...	
Phone_Data	pack: /Worker_Data/Personal_Data/Contact...	
Email_Address_Data	/Get_Workers_Response/Response_Data/Wc...	
FK_Worker	system generated	
Email_Addresses	/Email_Address	

Intuitive drag and drop user interface between Workday and data sources.

About Informatica

Informatica is 100 percent focused on data because the world runs on data. Organizations need business solutions around data for the cloud, big data, real-time and streaming. Informatica is the world's No. 1 provider of data management solutions, in the cloud, on-premise or in a hybrid environment. More than 7,000 organizations around the world turn to Informatica for data solutions that power their businesses.

Key Features

The Informatica connector for Workday offers state-of-the-art connectivity that is optimized for high data throughput. Key features include:

- Support for all Workday objects and fields (Human Resource, Financial Management, Staffing, Resource Management, Payroll, Compensation, as well as custom fields)
- Up-to-date integration with Workday's latest API
- A bi-directional simple and intuitive drag-and-drop interface between Workday and all of your data sources
- With Workday as a source, relational output with primary-foreign key generation and the option to pack complex data structures to streamline output
- With Workday as a target, numerous transformations to stage data for input and support for different data structures, including de-normalized and relational input
- Integration of all your data, regardless of source, with the Informatica Cloud platform

Key Benefits

Simple intuitive interface

Whether you require getting data out of Workday or into Workday, the Informatica Workday connector provides a cloud-based workflow user interface, 100+ connectors, and an intuitive data mapping tool for Workday Objects. Its easy-to-use interface simplifies Workday hierarchical data structures for business users and provides search and filter functionality.

Support for all Workday modules and services

The Informatica Workday connector supports all Workday modules and services so it adapts as your business data needs evolve. It stays current with Workday's latest API with a simple self-service update to a connection property. It leverages all the Workday public interfaces to get data in and out in addition to custom objects and attributes. Moreover, your Informatica Workday connector can access all the capabilities of the Informatica platform and its transformations for integration.

Market-leading cloud integration platform

Informatica Cloud is an industry leading, enterprise-class integration-platform-as-a-service (iPaaS) that enables development, execution, and governance of integration workflows between on-premise or cloud-based applications and Workday. It offers the most complete set of data management capabilities encompassing batch and real-time integration services, a broad set of native connectors, a robust API framework, as well as master data management, test data management, data quality, and security capabilities

Quick-start templates

The Salesforce-Workday Financial Integration Bundle includes Informatica Cloud templates that enable customers to integrate common financial data between Salesforce and Workday. Process flows addressed include: Salesforce account to Workday customer and Salesforce opportunity to Workday opportunity. The templates ease the learning curve about integrations with Workday as a source or as a target.
