

Business 360 Strategy Workshop

Outcomes

- High level evaluation of organizational readiness, with perspectives from participating team members
- Visibility of enterprise-wide pain points and expectations aligned to business drivers
- Examples of how to initiate strategic Business 360 conversations in your organization
- Scoping your first B360 data strategies to find your first wins
- Examples of what worked (and didn't) at other organizations
- Pragmatic method(s) to build and execute a B360 data strategy based on a collaborative approach

Typical duration

• 4 hours

Building Business 360 Data Strategies that Drive Change

Overview

Data-driven transformation is the new imperative for every organization, but very few organizations have a comprehensive Business 360 data strategy, and many find it hard to develop one. Struggling to keep up with the explosion of information, they are only beginning to explore how creating a complete, trusted, and contextual view of master data assets across multiple data domains and business functions can deliver great outcomes.

• A single view of the data

Create an authoritative view of business-critical master data from disparate, duplicate, and conflicting information sources.

• A 360 view of the relationships

Identify relationship insights within your data to locate connections between customers, products, suppliers and more.

· A complete view of all interactions

Link transactions and interactions for a contextual view of a customer's behavior.

Clearly, the ability to unleash the power of data is a critical success factor for every enterprise today. And that begs the question . . .

Why do so few enterprises have a Business 360 Strategy?

With this workshop offering, Informatica Advisory Consultants will help you understand the key components of a Business 360 data strategy and how to connect data capabilities to your core business strategies. We will review your business drivers, data needs, and cultural challenges to recommend an initial roadmap and pilot project to get started on your data journey.

About Informatica

Digital transformation is changing our world. As the leader in Enterprise Cloud Data Management, we're prepared to help you intelligently lead the way and provide you with the foresight to become more agile, realize new growth opportunities or even create new inventions. We invite you to explore all that Informatica has to offer-and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.
