- Business alignment on short and long-term cloud data strategy
- Understanding of gaps with mitigation factors to achieve business outcomes
- Visibility of cross-functional issues
- High level directional roadmap

## Typical duration

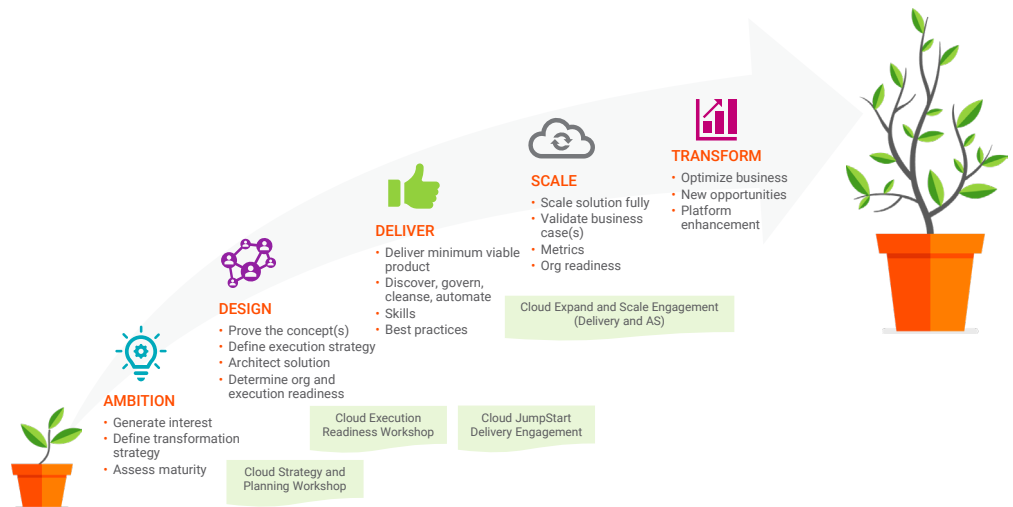

- 4 hours

## Towards a cloud enabled data driven business transformation

Delivering a personalized customer experience, accelerating business and digital transformation, and driving operational efficiency is becoming a table stakes agenda item for every C-suite leader. Enterprises continue to struggle with the disparate sources of information, a multitude of technologies, and adapting customized legacy systems to a bursting multi-cloud environment.

Organizations face critical challenges in realizing the full potential of cloud in a complex, multi-cloud world. Data quality and data management present significant stumbling blocks for enterprises seeking business value from their investments and looking to accelerate their transformation journey.

Informatica Advisory Services, a group of business and senior management consultants will help you drive a holistic cloud data strategy and connect data capabilities to your core business strategies. In a half-day workshop we will quickly review your business drivers, data needs, and organizational readiness to map out high value opportunities and recommend an initial roadmap for a data driven cloud business transformation.

Advisory Services will facilitate a value alignment session with the CIO/CDO as part of the report-out of this workshop and to explore high business value opportunities.

## About Informatica

Digital transformation is changing our world. As the leader in Enterprise Cloud Data Management, we're prepared to help you intelligently lead the way and provide you with the foresight to become more agile, realize new growth opportunities or even create new inventions. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.

## Workshop Outline

Activities	Deliverables	Outcomes
