

Enterprise Data Catalog JumpStart

Benefits

- Architecture reviews and guidance so you begin your journey on the right path
- Guided help on making the best use of Informatica product features and enhancements
- Installation and configuration in one environment and Data Catalog Guidance using best practices

Accurate and comprehensive cataloging of your data assets is the first step in any data governance, data mastering or data management program.

Overview

The Informatica portfolio of Intelligent Data products accelerates your ability to ingest, prepare, catalog, master, govern, and protect your data assets to deliver successful data lakes to make business decisions based on new, accurate, and consistent insights. Informatica’s Professional Services organization helps ensure success leveraging these products on your enterprise Intelligent Data Engineering strategy in the following ways:

- Accelerate analytics innovation and business decisions by tapping into a centralized, governed data source
- Understand data proliferation across the enterprise and organize your data environment with a smart data catalog
- Enable real-time decisions from streaming analytics by processing IoT data at scale with prebuilt transformations
- Achieve faster, more flexible, and more repeatable data integration, governance, and security on modern data storage platforms

Staying current with these innovations while still driving individual targeted implementation success can be a challenge. We have designed included services and additional fee based offerings to help you drive maximum value out of your Intelligent Data Engineering investments. These can be delivered by working directly with you or in conjunction with many of our qualified partners to work seamlessly towards driving measurable business value from your investments.

At a Glance

Informatica’s Enterprise Data Catalog JumpStart provides you with expert guidance on your product architecture, installation and configuration – to help you succeed at every stage of your Enterprise Data Catalog journey.

ABOUT INFORMATICA

Digital transformation is changing our world. As the leader in enterprise cloud data management, we're prepared to help you intelligently lead the way. To provide you with the foresight to become more agile, realize new growth opportunities or even invent new things. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.

Our lean and agile integration approach helps you avoid common pitfalls and achieve predictable, timely results. Focusing on achieving business outcomes ensures the implementation is fully optimized to achieve a competitive advantage.

How it Works

- Informatica specialists will work to implement an engagement plan and roadmap based on your business use cases and timelines
- Your implementation team or partner will provide the implementation effort while Informatica Professional Services provides a development ready environment configured and tested to ensure your project is off to a quick start.

What You Get

- Advice on a solid foundation and solution architecture for deploying Informatica's Enterprise Data Catalog product
- Best practices on technical architecture, product configuration, scanning configuration and optimizing performance
- Guidance for your project on the optimal methods for ingesting and cataloging your metadata information
- Overview of the latest product functionality and new features and how you can best leverage them in your implementation

Our Enterprise Data Catalog JumpStart offering includes expert guidance on your architecture along with installation and configuration in one environment with real data from three catalog sources. At times, our customers require additional guidance from our team of experts to better address in depth needs. These extended services are delivered at an additional cost from our team on an as needed basis to supplement your deployment efforts.

	Included	Additional Cost
Architecture review	X	
Overview and guidance on new release features/functionality	X	
Product Installation & Configuration (One Environment)	X	
Metadata Ingestion from 3 supported catalog sources	X	
Basic Performance & Tuning best practices	X	
Develop and deliver customized end user training and rollout		X
Develop custom metadata scanners		X
Complete catalog scanning and domain discovery		X
Solution Delivery Management		X
Premium Product Upgrade Services (upgrade execution and testing)		X
Extended Performance and Tuning Assistance		X
Extended Security Configuration (e.g., SSO, LDAP, etc.)		X
Install and Configure Additional Environments		X
