

Enterprise Data Catalog Advanced Scanners JumpStart

Benefits

- Advanced Scanners Expert Guidance (1-on-1)
- Applied Best Practices for your implementation
- Shortened enablement lifecycle with expert assistance

Our Enterprise Data Catalog Advanced Scanners JumpStart will help to further accelerate enterprise data cataloging and governance initiatives in your organization. Our expert consulting team will work directly with you to enable Advanced Scanner capabilities and show you how to scan new data sources and automatically deliver missing critical metadata to your EDC catalog and data lineage.

Our team not only helps to install the Advanced Scanners software, but also assists in building a high-level deployment roadmap and provides support with initial configuration steps so that you can immediately begin deriving value from your Advanced Scanners investment.

Deliverables

Architecture

- Assess the technical environment and compare it against best practices
- Review the installation architecture
- Configure and demonstrate connectivity between Advanced Scanners and EDC

Technical Metadata Population

- Identify a high-value use case for metadata harvesting (critical data flow identification)
- Implement an Advanced Scanners sample configuration to demonstrate technical capabilities and business value
- Troubleshoot and address configuration issues

Training and Roadmap

- Knowledge transfer covering the configuration process and general Advanced Scanners capabilities
- Advice on changes/updates for optimization
- Build a high-level deployment road map

About Informatica

Digital transformation is changing our world. As the leader in Enterprise Cloud Data Management, we're prepared to help you intelligently lead the way and provide you with the foresight to become more agile, realize new growth opportunities or even create new inventions. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.

Assumptions/Pre-requisites

- Hardware and adequate database (according to product requirements) are readily available for Advanced Scanners installation
- Customer has identified a team that will work with the Informatica resources
- Customer's team has been trained and/or has working knowledge of Informatica EDC
- Customer's Subject Matter Experts whose input/support is required in order to progress with JumpStart delivery will be made available during the entire JumpStart duration
- Customer will arrange (before the project commencement date) access for the Informatica team to all specified resources (i.e., relevant data sources and EDC catalog) required to complete the tasks covered by the JumpStart.

	Included	Additional Cost
Setup and planning	✓	
Architecture review	✓	
Product installation and sample configuration (one configuration per licensed scanner; one environment only)	✓	
Advanced Scanner-EDC integration (one environment only)	✓	
Metadata ingestion from sample processes (one configuration per licensed scanner)	✓	
High value use-case for metadata harvesting process development (one use-case)	✓	
High level deployment roadmap	✓	
Full solution architecture development		✓
Develop custom metadata scanners		✓
Develop enhancements to the licensed scanners		✓
Complete scanning processes implementation (utilizing licensed scanners)		✓
Solution delivery management		✓
Upgrade execution and testing		✓
Business/Technical advisory services		✓
Extended security configuration (e.g., LDAP)		✓
