Enterprise Data Preparation Success Pack

Benefits
- Architecture reviews and guidance so you begin your journey on the right path
- Guided help on making the best use of Informatica product features and enhancements
- Installation and configuration of Enterprise Data Preparation in one environment using best practices

The key to unlocking value from a data lake is to give data analysts and data scientists the ability to quickly and iteratively analyze the raw data, augmented with enterprise data, so they can look for "gold nuggets" that deliver new insights.

Overview

The Informatica portfolio of Big Data products accelerates your ability to ingest, prepare, catalog, master, govern, and protect your big data to deliver successful data lakes to make business decisions based on new, accurate, and consistent insights. Informatica's Professional Services organization helps ensure success leveraging these products on your enterprise Big Data strategy in the following ways:

- Accelerate analytics innovation and business decisions by tapping into a centralized, governed data source
- Understand data proliferation across the enterprise and organize your data environment with a smart data catalog
- Enable real-time decisions from streaming analytics by processing IoT data at scale with prebuilt transformations
- Achieve faster, more flexible, and more repeatable data integration, governance, and security on Hadoop
- Access the most difficult data and file formats in Hadoop, reducing the time and cost of developing data parsers

Staying current with these innovations while still driving individual targeted implementation success can be a challenge. We have designed included services and additional fee-based offerings to help you drive maximum value out of your big data investments. These can be delivered by working directly with you or in conjunction with many of our qualified partners to work seamlessly towards driving measurable business value from your investments.

Reduce Project Risk

Lower Cost of Implementation

Accelerate Time to Value

At a Glance

Informatica's Enterprise Data Preparation Success Pack provides you with expert guidance – from initial recipe creation to publishing assets through operationalization – to help you succeed with your Enterprise Data Preparation journey.

Our lean and agile integration approach helps you avoid common pitfalls and achieve predictable, timely results. Focusing on achieving business outcomes ensures the implementation is fully optimized to achieve a competitive advantage.

How it Works
• Informatica specialists will work to implement an engagement plan and roadmap based on your business use cases and timelines.
• Your implementation team or partner will provide the implementation effort while Informatica Adoption Services provides a development-ready environment configured and tested to ensure your project is off to a quick start.

What You Get
• Advice on a solid foundation and solution architecture for deploying Informatica's Enterprise Data Preparation product
• Best practices on technical architecture, product configuration, support on usage of EDP and operationalization.
• Guidance for your project on the optimal design for creating recipes and publishing target data sets to data lake.
• Overview of the latest product functionality and new features and how you can best leverage them in your implementation

Our Enterprise Data Preparation Success Pack offering includes expert guidance on your architecture along with installation and configuration in one environment with real data from your data lake and other sources. At times, our customers require additional guidance from our team of experts to better address in depth needs. These extended services are delivered at an additional cost from our team on an as needed basis to supplement your deployment efforts.

About Informatica

Digital transformation is changing our world. As the leader in Enterprise Cloud Data Management, we're prepared to help you intelligently lead the way and provide you with the foresight to become more agile, realize new growth opportunities or even create new inventions. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.
