Enterprise Metadata Management Discovery

Benefits
- A roadmap to build a foundation of trusted data
- The framework to enable business users to discover and access all data across the entire enterprise for analytics use
- A detailed plan to enable business analysts to prepare trusted data to accelerate business insight delivery and better decisions
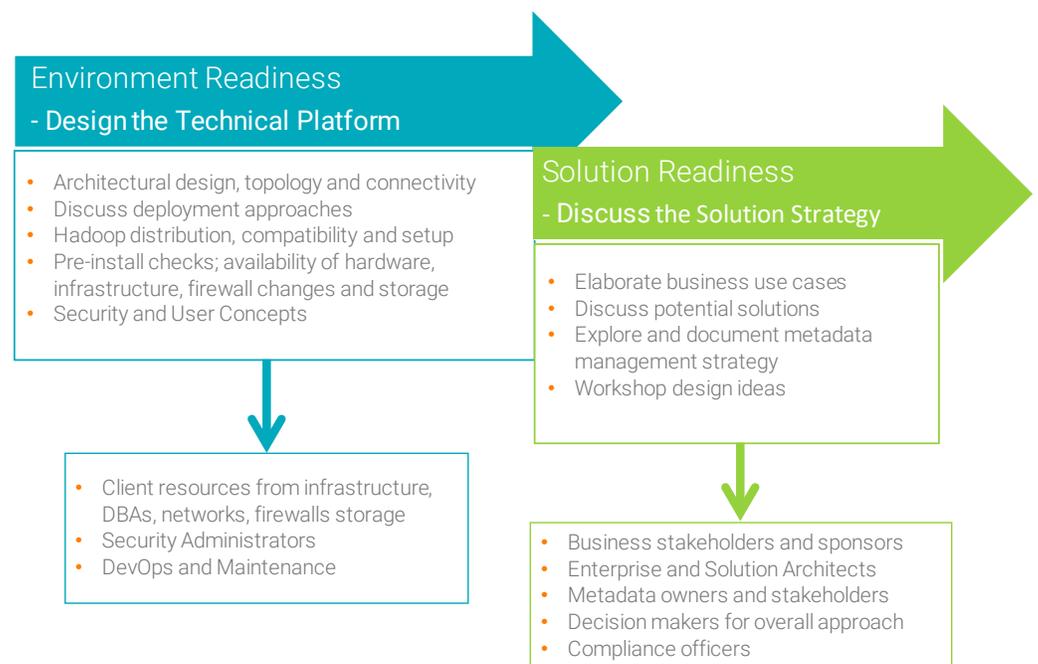

Typical duration
- 2 weeks

The first step to managing your data as an enterprise asset is to take inventory of it, assess its value, and maximize its use—just like you do other significant capital and operational investments. Data is diverse and distributed across many different departments, locations, systems, and platforms (some on-premise and some in the cloud), making it challenging to know exactly what data you have. And in the world of big data this becomes even more difficult.

With this Discovery offering the Informatica Professional Services team will assist you in reviewing your enterprise metadata challenges to ensure that current technology features are matched to meet your requirements.

Our experienced consultants will review your business drivers and use cases. We will help you drive your initial work plan by discussing the solution strategy and designing the technical platform to ensure your success.

Environment Readiness
- Design the Technical Platform

- Architectural design, topology and connectivity
- Discuss deployment approaches
- Hadoop distribution, compatibility and setup
- Pre-install checks; availability of hardware, infrastructure, firewall changes and storage
- Security and User Concepts

- Client resources from infrastructure, DBAs, networks, firewalls storage
- Security Administrators
- DevOps and Maintenance

Solution Readiness
- Discuss the Solution Strategy

- Elaborate business use cases
- Discuss potential solutions
- Explore and document metadata management strategy
- Workshop design ideas

- Business stakeholders and sponsors
- Enterprise and Solution Architects
- Metadata owners and stakeholders
- Decision makers for overall approach
- Compliance officers

ABOUT INFORMATICA

Digital transformation is changing our world. As the leader in enterprise cloud data management, we're prepared to help you intelligently lead the way. To provide you with the foresight to become more agile, realize new growth opportunities or even invent new things. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.
