

PowerCenter Performance Tuning and Deployment Readiness

Overview

Benefits

- Comprehensive data integration system validation and tuning prior to deployment
- Informatica processes optimized by experienced Informatica professionals
- Users provided with a dependable, accurate data integration system
- Knowledge transfer of advanced techniques and best practices for pre-deployment certification

As you develop in-house Informatica expertise, it can be valuable to have the experience and best practices of Informatica Professional Services to validate the work you've accomplished, educate your personnel in advanced techniques and help you prepare your system and personnel for deployment. These validation processes by expert-level resources often have the least visibility of any effort associated with the development of data management systems, but comprehensive reviews and quality assurance is critical for successful deployment and satisfied users.

Key Program Deliverables

- Data integration technical design review
- Review and confirmation of environment settings (OS, RDMS, PowerCenter)
- Data integration process validation
- Data accuracy validation
- Load performance benchmarks
- Data integration performance tuning and rework
- Deployment plan

Typical Duration

- 3 Weeks

IPS Staff Level

- Senior Consultant
