

Informatica Professional Services Resident Architect

Benefits

Engaging an Informatica Resident Architect will:

- Maximize the ROI on your Informatica investment by ensuring alignment with your specific business and technical requirements
- Lower the risk associated with enterprise software initiatives by marrying insights customized to your business with extensive experience in architecture, implementation, and best practices
- Increase your agility by ensuring that your architecture can adapt and scale to meet the future demands of your changing business
- Shorten ramp-up time on projects and initiatives by providing proven solutions, a proven methodology and best practices

More than ever the need for digital transformation has accelerated as organizations look to increase productivity, automation, flexibility and agility. For digital transformation to succeed it must be the strategic focus of the business and must be data-led. Informatica's AI Powered Intelligent Data Management platform makes this transformation possible, but success is not just about the technology.

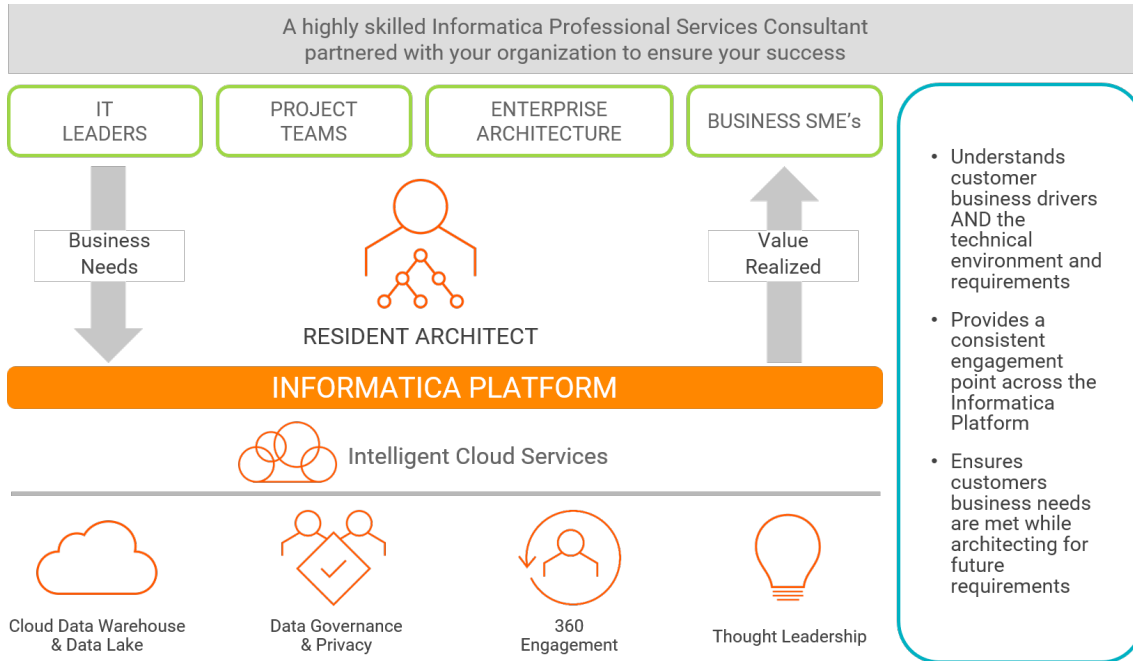

In addition to technical expertise, knowledge of business drivers and organizational change management are crucial for deploying technology precisely and delivering real business value for the organization. An Informatica Professional Services Resident Architect is your guide to success across the individual steps of your digital transformation journey.

Maximize the Return on Your Informatica Investment

An Informatica Professional Services Resident Architect is a highly skilled consultant with deep and broad experience building, designing and implementing the Informatica Platform. Resident Architects focus on maximizing the value of your investment across the numerous IT projects, building the foundation of your digital transformation. A Resident Architect provides a consistent engagement point for all aspects of the Informatica Platform as well as an understanding of how each component fits within your overall technical environment.

The Resident Architect is the connection point between your business requirements and the capabilities of the Informatica Platform, maximizing the return on your investment in Informatica technology.

Resident Architects keep an eye toward the future. Their understanding of your key business drivers and initiatives enables them to tightly connect the technical capabilities of the Informatica Platform to the true business value that will be achieved .

How Can a Resident Architect Help You?

A Resident Architect is a valuable addition to your internal team and is a trusted advisor. Although a Resident Architect's engagement points will vary depending on your specific internal structure and needs, they will work closely with your enterprise architecture and governance teams, business line IT architects, and data management leaders. During their engagement a Resident Architect's engagement will:

- Liaise with your architects, technical teams, and leadership (both business and IT) across the organization
- Fully understand your project portfolio, proactively addressing emerging functional and technical requirements
- Assess current and planned utilization of the Informatica Platform; support road mapping recurring value aligned with business imperatives
- Provide Best Practices and recommendations for implementation of the Informatica Platform
- Identify opportunities to tune and optimize the existing Platform workload
- Interface with Informatica's broader support and technical teams to ensure that the full breadth and depth of the Informatica organization is leveraged quickly and efficiently for your success

Qualifications of Resident Architects

- Resident Architects are Informatica's most highly skilled and most experienced services professionals with the highest credentials within the organization -- they have certification in all components of the Informatica Platform
- They are thought leaders, Velocity methodology authors, and overall solution experts
- They have an average of 15 years of industry experience and 10 years of experience building, designing, architecting, and implementing Informatica solutions
