

Axon+EDC Adoption Success Pack

Benefits

- Quickly establishes a solid foundation for holistic enterprise-wide data governance
- Business use case and architecture guidance on solution design to begin your governance journey on the right path
- Guided help on integrating best use of the Informatica product portfolio
- Advice on best practices for product features and enhancements to gain quick value
- Enables engagement of a cross-functional community to create a business and technical understanding and stewardship of data
- Provides a high-level deployment roadmap to guide longer term planning

Accelerate adoption of your Data Governance program by providing a holistic end-to-end view of the data within your enterprise.

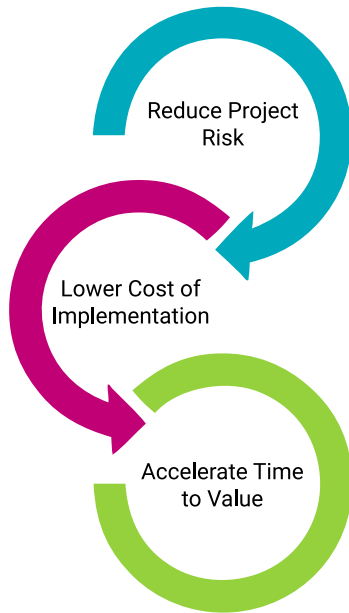

Overview

Successful data governance requires a holistic view and thorough understanding of complex business processes integrated with technology architecture and systems. The Informatica portfolio of Data Governance products accelerates your ability to ingest, develop, prepare, catalog, master, govern, and secure your metadata to deliver successful Data Management and Governance to make business decisions based on integrated, accurate, trustworthy, and consistent insights.

Informatica Adoption Services helps ensure your success leveraging these products on your enterprise data governance journey in the following ways:

- Using built-in accelerators and Axon's web-based user interface you can quickly build an inventory of the building blocks of your organization.
- With a populated set of inventories, you can capture business and technology relationships, connections, lineage and dependencies.
- Understand data proliferation across the enterprise and organize your data environment with Enterprise Data Catalog.
- Accelerate analytics innovation and improve business decisions by tapping into integrated, centralized, and governed data sources.
- Improve accountability of every inventory by assigning stakeholders with defined roles with built-in acceptance and configurable sign-offs.

The Axon+EDC Adoption Success Pack is designed to help you get up and running quickly and begin deriving value from your data governance investments. Our expert consultants work with you directly, or in conjunction with any of our qualified partners, to architect, configure, and deliver an initial proof of value use case and high-level roadmap for your data governance program.

At a Glance

Informatica's Axon+EDC Adoption Success Pack provides you with expert support for every major project phase – from platform establishment through use case development – to help you succeed at every stage of your Data Governance journey.

Our lean and agile approach combines advisory and technical consulting to achieve predictable, timely results. Focusing on achieving business outcomes ensures the implementation is optimized to achieve a competitive advantage.

How it Works

- Informatica Data Governance specialists will work with you to define and implement an initial proof of value use case.
- We help you build a high-level deployment roadmap to ensure your data governance program is clearly aligned to valuable business outcomes.
- Regular checkpoints will provide an opportunity to review your plan and adjust as necessary.

What You Get

- A Business Adoption workshop to assess your desired business value and outcomes, identify appropriate use cases, and lay out a high-level roadmap forward.
- Advice on a solution architecture for deploying Informatica's Axon and EDC product capabilities.
- Implementation of the technical platform consisting of an integrated Axon and EDC instance in one environment.
- Delivery of an end-to-end first value use case, showing the integration of business terms with technical metadata from one data source.
- Guidance on optimal methods for ingesting, cataloging, and describing metadata information.
- Touchpoints throughout the year working with your team directly or with your chosen implementation partner.
- Guidance on the latest product functionality and new features and how you can best leverage them in your implementation.

Our Axon+EDC Adoption Success Pack offering includes reviews, assessments and checkpoints throughout the year with our implementation professionals to help identify and resolve deployment roadblocks and concerns. At times, our customers require additional services from our team of experts to better address their implementation needs. These extended services are delivered at an additional cost from our team on an as needed basis to supplement your deployment efforts.

About Informatica

Digital transformation is changing our world. As the leader in Enterprise Cloud Data Management, we're prepared to help you intelligently lead the way and provide you with the foresight to become more agile, realize new growth opportunities or even create new inventions. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.
