

Axon Adoption Success Pack

Benefits

- Quickly establishes a solid foundation for full project implementation
- Expert consultants ensure the correct initial configuration and solution design
- Accelerates initial use case deployment and time to value
- Provides a deployment roadmap to guide longer term planning

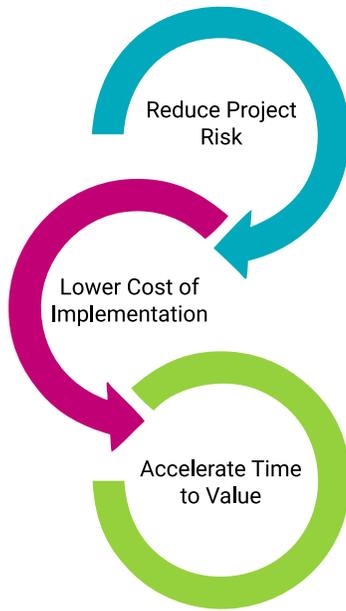

Accelerate adoption of your data governance initiative by starting with a solid foundation that demonstrates value quickly.

Overview

Successful data governance requires a thorough understanding of complex business processes and systems. By breaking things down into small, easy to understand components, Axon describes your business using a common set of business items that will be immediately familiar to most stakeholders.

- Axon supports a collaborative and distributed way of working, allowing many people to contribute with a focus on the business items they know very well.
- Using built-in accelerators and Axon's web-based user interface you can quickly build an inventory of the building blocks of your organization.
- With a populated set of inventories, you can capture connections and dependencies.
- Every item in Axon is connected to stakeholders with defined roles (both managerial and execution) with built-in acceptance and configurable sign-offs.
- A shared view of the organization enables valuable analysis to be completed very quickly with a high degree of accuracy, and low costs.

The Axon Adoption Success Pack is designed to help you get up and running quickly and begin driving maximum value from your data governance investments. Our expert consultants work with you directly, or in conjunction with any of our qualified partners, to architect, configure, and deliver an initial proof of value use case and longer-term roadmap for your data governance program.

At a Glance

Informatica's Axon Adoption Success Pack provides you with expert guidance based on proven techniques and methodologies for implementing the Axon data governance solution.

Our lean and agile approach reduces risk, helps you avoid common pitfalls to achieve predictable, timely results with a lower overall implementation cost. And by focusing on achieving business value early, your successful initial deployment will generate momentum for broader adoption across your organization.

How it Works

- Informatica's Data Governance specialists work with you to define and implement an initial proof of value use case.
- We help you build a high-level deployment roadmap to ensure your data governance program is clearly aligned to valuable business outcomes.
- Regular checkpoints will provide an opportunity to review your plan, ensure you stay on track, and adjust as necessary.

What You Get

- Advice on a solid foundation and solution architecture for deploying Informatica's Axon product portfolio.
- A half-day Business Adoption Workshop to identify key business community members and connect business outcomes to a technical capability roadmap.
- Guidance for your project on the optimal design and implementation approach for example Axon use cases.
- Touchpoints throughout the year working with your team directly or with your chosen implementation partner.
- Guidance on the latest product functionality and new features and how you can best leverage them in your implementation.

Our Axon Success Pack offering includes several reviews, assessments, and checkpoints throughout the year with our implementation professionals to help identify and resolve any key deployment issues. At times, our customers require additional guidance from our team of experts to better address in depth needs. These extended services are delivered at an additional cost from our team on an as needed basis to supplement your deployment efforts.

About Informatica

Digital transformation is changing our world. As the leader in Enterprise Cloud Data Management, we're prepared to help you intelligently lead the way and provide you with the foresight to become more agile, realize new growth opportunities or even create new inventions. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.
