

Key Program Details

Kickoff and Requirement Gathering

- Review business requirements
- Review latest version of mapping specification
- Review and validate sample data
- Validate source and target structures

Prerequisites

- Latest version of specification is available
- Ample test data is available

Analysis

- Analyze mappings specification and rules
- Identify and resolve any possible gaps or inconsistencies
- Finalize specifications

Prerequisites

- Latest version of specification is available
- Ample test data is available

Design

- Design B2B DT transformations for taking source formats into target formats
- Design large file handling, validations and error handling components as needed

Prerequisites

- Specifications are signed-off
- Ample test data showcasing the different mapping logic is available

Development

- Develop common components/infrastructure if applicable
- Develop source to target B2B DT transformer
- Develop splitters, error handling and validations as needed
- Assist with development of PC flow to activate transformations if needed

Prerequisites

- Ample test data showcasing the different mapping logic is available

Unit Testing

- Create test cases and test plan
- Unit test B2B DT transformations
- Unit test PC flow if applicable
- End to end local testing

Prerequisites

- Ample test data showcasing the different mapping logic is available

Provide Knowledge Transfer on the Developed Solution and Documentation

Prerequisites

- Participants have either been enabled or officially trained

Support During Deployment and System Testing

- Deploy solution on available environments
- System and Integration testing

About Informatica

Informatica is a leading independent software provider focused on delivering transformative innovation for the future of all things data. Organizations around the world rely on Informatica to realize their information potential and drive top business imperatives. More than 5,800 enterprises depend on Informatica to fully leverage their information assets residing on-premise, in the Cloud and on the internet, including social networks.
