

Data Governance Discovery

Benefits

- A streamlined engagement to quickly assess your business goals and data management capabilities customized to accelerate your time-to-value
- A Data Governance framework that is tailored to your enterprise and decision-making culture so that you can pilot high-value initiatives and develop your program incrementally
- A detailed execution roadmap that connects your business priorities and Data Governance program evolution with enhanced technical capabilities

Typical duration

- 4-5 weeks

Data Governance is fundamental to any serious data initiative, whether it involves MDM, Big Data, Data Lake, Cloud or simply improving the quality of BI Analytics. Unlike initiatives that aim to integrate more data from more sources, or provide self-service analytics to a broader set of users, Data Governance guarantees that the data available for use is trustworthy, validated, standardized and protected.

Informatica can guide you in your journey to establishing a Data Governance Program and accelerate your success in gaining control over your data. With this discovery offering, the Informatica Professional Services team will assist you in reviewing the critical business objectives and organizational challenges you face, and help you develop the structure, best practices and tools that will drive success.

Our experienced Professional Services consultants will work with you to customize a DG program to your organization's structure, culture and technical maturity. We will show you how other organizations have succeeded in designing a 'right-sized' Data Governance program, and provide the tools that will support all your business and data stakeholders.

Areas of Focus

- Business drivers and technical capabilities discussions
- High-value opportunities for DG pilot projects
- Business value case studies from successful programs
- Solution strategy design and recommendations

ABOUT INFORMATICA

Digital transformation is changing our world. As the leader in enterprise cloud data management, we're prepared to help you intelligently lead the way. To provide you with the foresight to become more agile, realize new growth opportunities or even invent new things. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.

Key Program Deliverables

- DG assessment of current state and high priority opportunities
- DG framework and best practices to establish program structure
- Prioritization strategy for existing DG data domains
- Recommended resources and skills required
- Roadmap to structure and launch an ongoing DG program
