

Master Data Management Discovery

Benefits

- Comprehensive Requirements Strategy
- Foundational Solution Architecture and Capacity Plan
- Complete project staffing and execution plan through the production deployment phase

Typical duration

- 4 weeks

Master Data Management (MDM) is a business discipline comprised of a broad range of technology, people and process factors. Informatica has implemented MDM for hundreds of companies.

Accelerate Your Master Data Management Initiative

Based on our years of project experience, we have developed a standard offering to fast-track the Project Discovery process. A comprehensive Requirements Strategy, Foundational Solution Architecture, and an Infrastructure Capacity Plan can set the team up for success, and jumpstart critical design and configuration activities. Informatica's MDM Discovery offering provides professional assistance and guidance in efficiently laying a strong foundation for your MDM initiative.

Rapid Success with your Master Data Management Implementation

Our Informatica MDM professionals will help your team flesh out and document both business and technical requirements, understand the capabilities of the domain, build an implementation plan aligned to your business objectives, develop a staffing plan necessary to support your successful MDM implementation, and provide a comprehensive Infrastructure Capacity plan to support your production deployment.

Areas of Focus

During this engagement, we will focus on the following activities:

- Technical Architecture:
 - Develop a high-level conceptual architecture showing how the MDM solution fits in your environment
 - Determine the infrastructure capacity requirements for your production environment
- Requirements Strategy
 - Data Procurement and Analysis Outline
 - Functional and Technical Requirements Workshops Planning
- Implementation Planning
 - Develop a detailed implementation plan for the Design, Development, Test, and Deploy Phases
 - Develop a staffing plan and implementation proposal

ABOUT INFORMATICA

Digital transformation is changing our world. As the leader in enterprise cloud data management, we're prepared to help you intelligently lead the way. To provide you with the foresight to become more agile, realize new growth opportunities or even invent new things. We invite you to explore all that Informatica has to offer—and unleash the power of data to drive your next intelligent disruption. Not just once, but again and again.

Key Program Activities & Deliverables

- Project Launch, General Goals and High-Level Requirements Review, and Pre-Requisite Confirmation
- Development of high-level conceptual architecture
- Determination of production hardware sizing requirements
- Requirements Definition Strategy
- Development of detailed implementation plan
- Development of staffing plan and implementation proposal

Qualifying Assumptions

Execution of an MDM Discovery implementation as described is based on certain important assumptions:

- This offering is limited to the latest version of Informatica's MDM software along with a specific version of operating system, application server, and database software.
- Appropriate Customer resources are available to facilitate working sessions for requirements gathering with authority to make decisions on requirements.
