Accelerated ROI using pattern-based approach (IICS)

Deepak Balakrishnan, Senior Principal Consultant,
Informatica Professional Services

Housekeeping Tips

- Today's Webinar is scheduled for **1 hour**
- The session will include a webcast and then your questions will be answered live at the end of the presentation
- All dial-in participants will be muted to enable the speakers to present without interruption
- Questions can be submitted to "All Panelists" via the **Q&A option** and we will respond at the end of the presentation
- The webinar is **being recorded** and will be available on our **INFASupport YouTube channel** and **Success Portal** - where you can download the **slide deck** for the presentation. The link to the recording will be emailed as well.
- Please take time to complete the **post-webinar survey** and provide your feedback and suggestions for upcoming topics.

Q & A

Cloud Modernization

Data Warehouse, Lakes and Application Modernization Journey

Data Engineering

Data Warehouse

Data Lakes

Applications

Data Science

Integration is the common theme

One Set of Tools for All Your Clouds and On-premises Applications

Single Cloud

Multi-Cloud

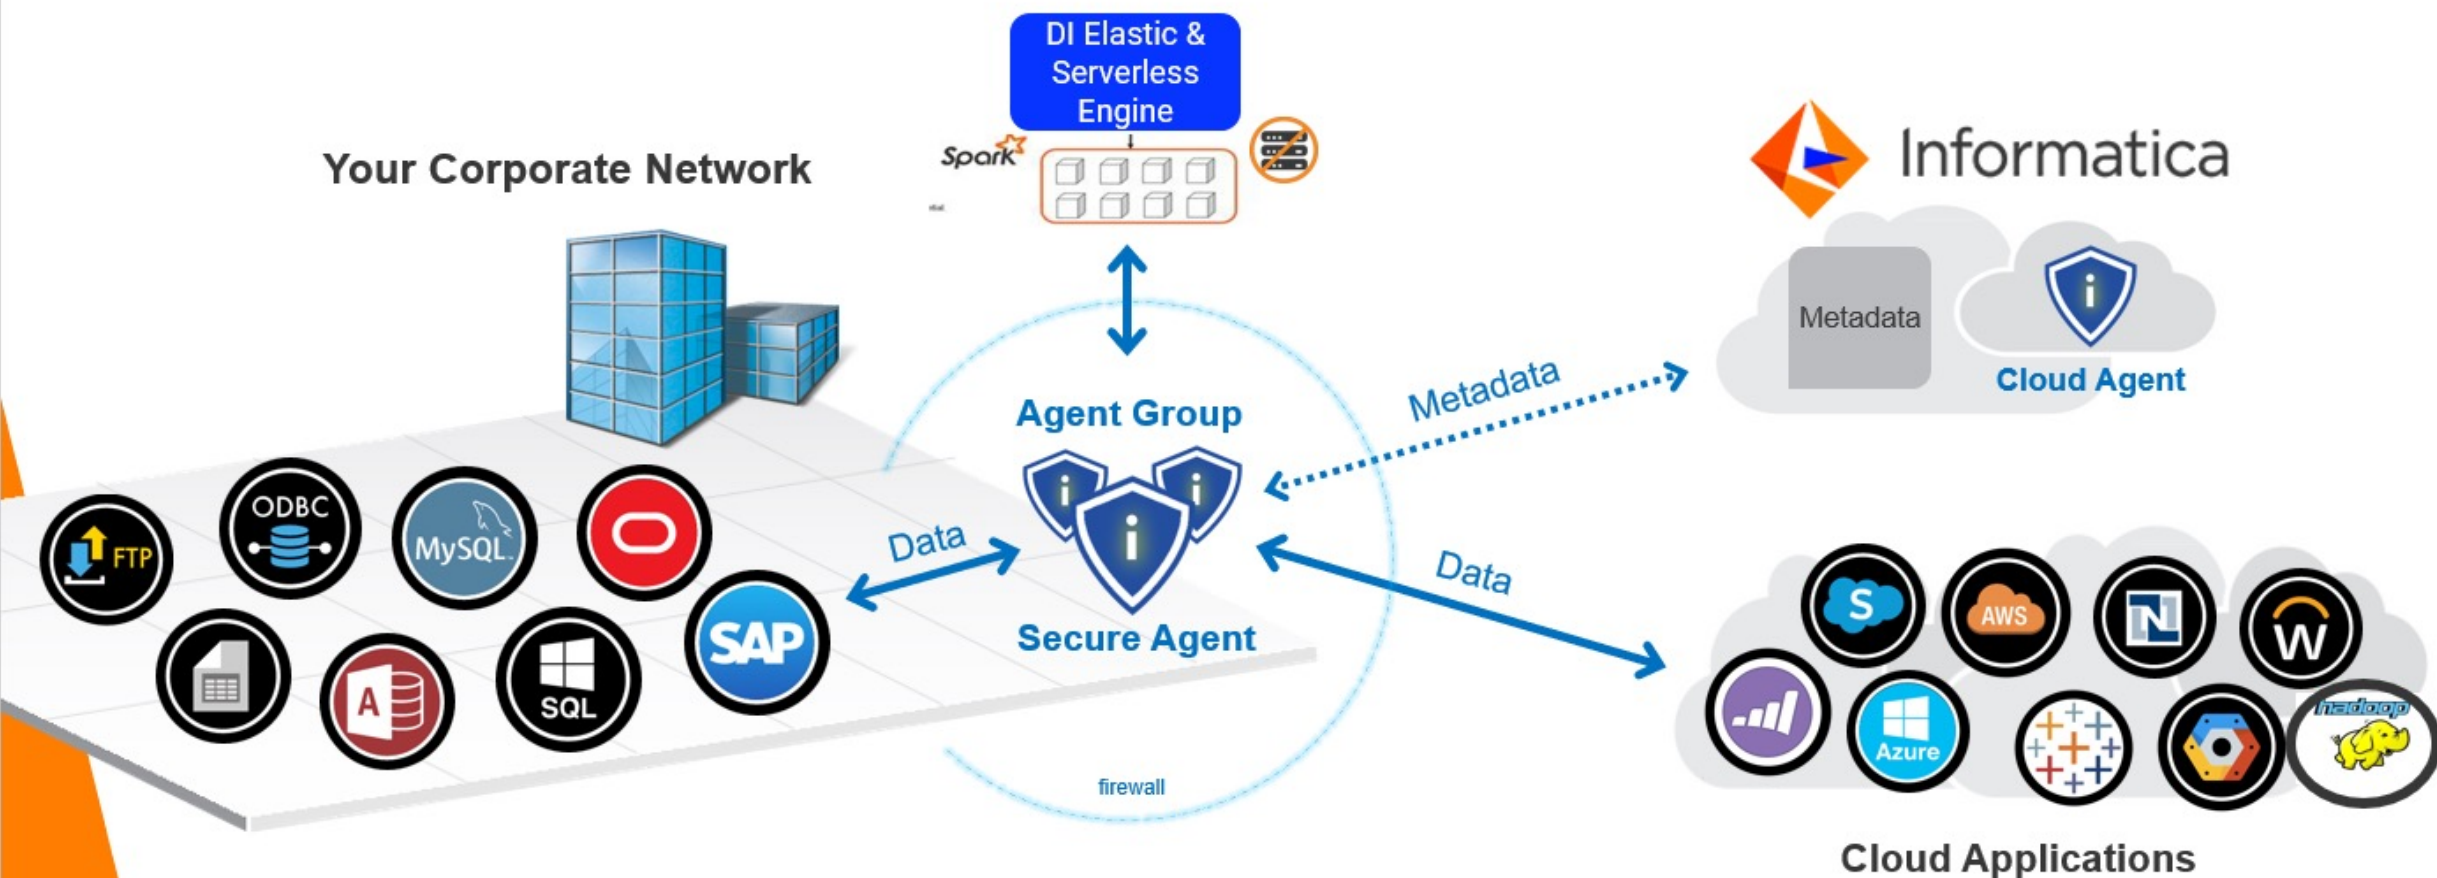

Hybrid Cloud

On-Premises

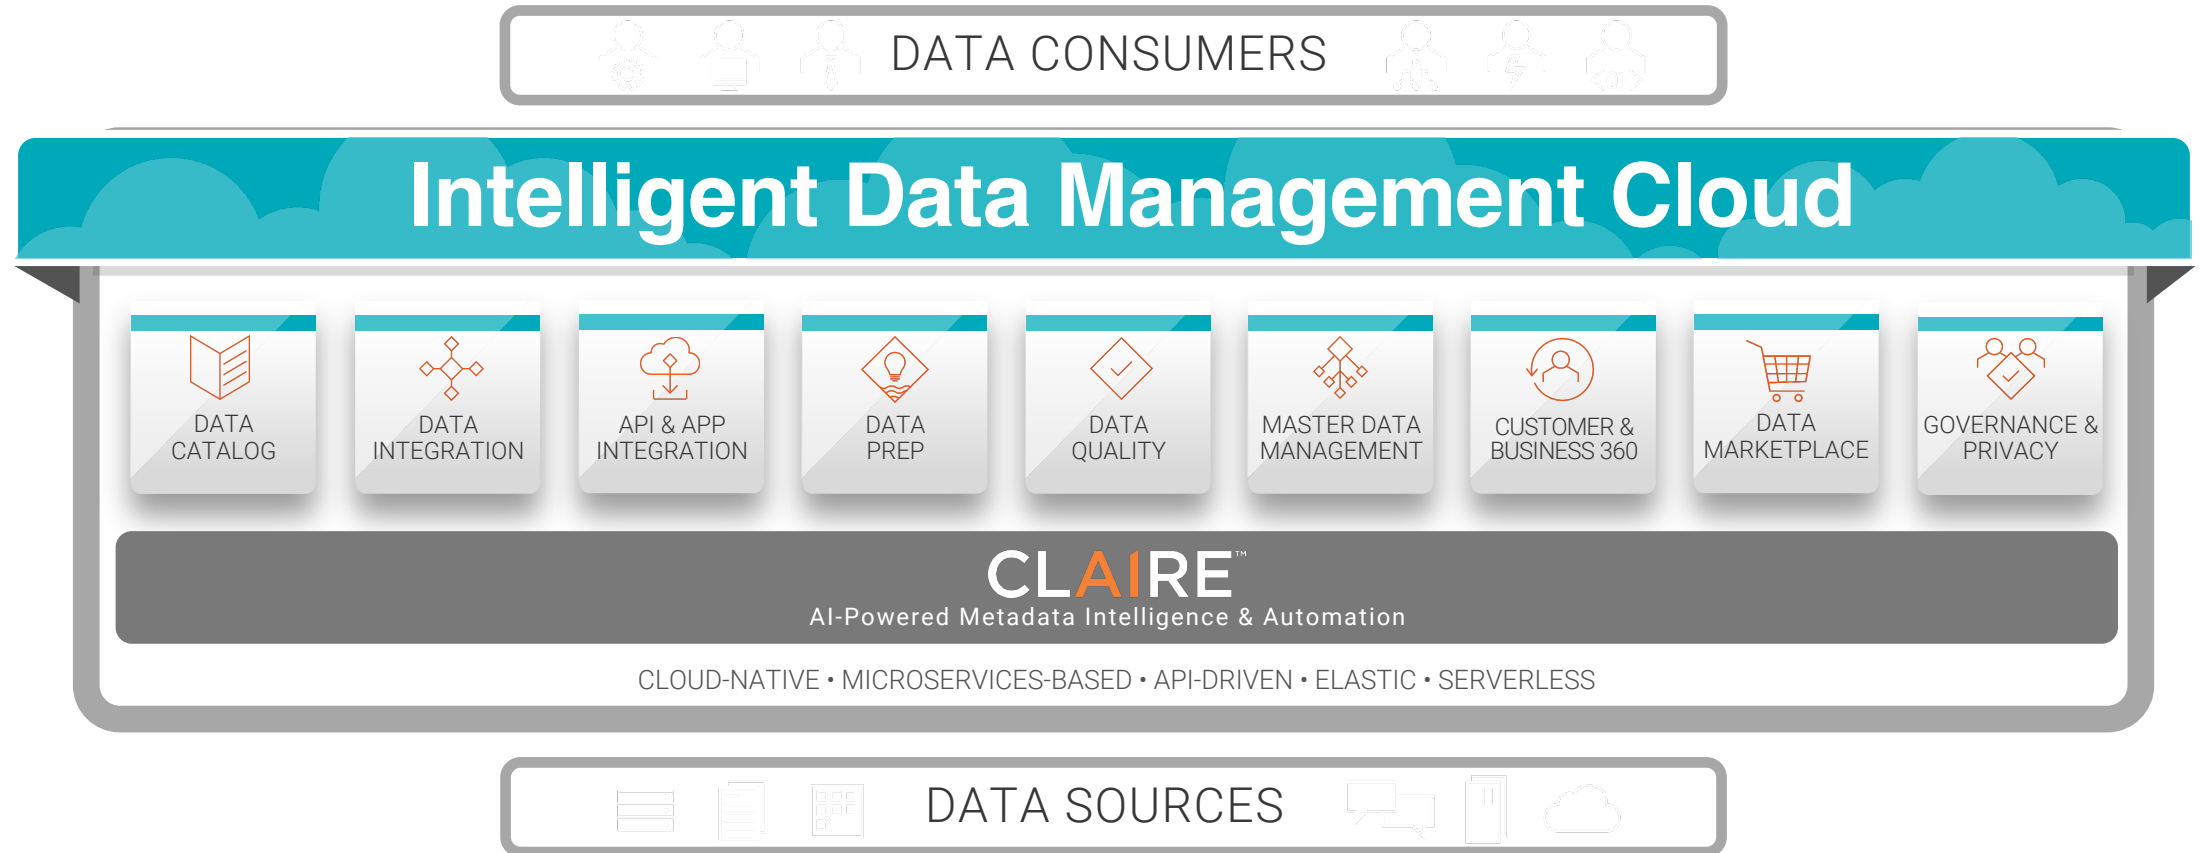

Secure Agent Architecture

- ✓ No staging required
- ✓ Data transmission is secure
- ✓ Multiple security certifications
- ✓ Agent Groups for High Availability
- ✓ Cloud Hosted Agent

IDMC Platform

CDW & DL Challenges Persist

Resource Constraints

96%

of IT and engineering decision-makers say no-code/low-code will be a priority because of the lack of software engineers

Cost Overruns

75%

of organizations using cloud data management will encounter budget overruns resulting in their questioning the value of using cloud services

Complexity

72%

of organizations are still struggling to operationalize within their enterprise

Informatica Can Help You to Get the Most Value From Your Cloud Data Management Initiative

Resource Constraints

Reduced new integration job setup time by **40% to 55%** percent

Cost Overruns

Up to **70%** reduction in ETL process time

Complexity

Cloud Data Quality reduced the time dedicated to quality assurance tasks by up to **35%** each week

All statistics from Nucleus Research: ROI Guidebook for Informatica, August 2020

Problem: Resource Constraints

87%

of organizations experiencing or expecting to face talent shortage in software development, including data & analytics talent

Main barriers include:

- Difficulty finding specialized skills
- 2 Resources for every job
- Lack of automation
- Lack of tools for non-tech users

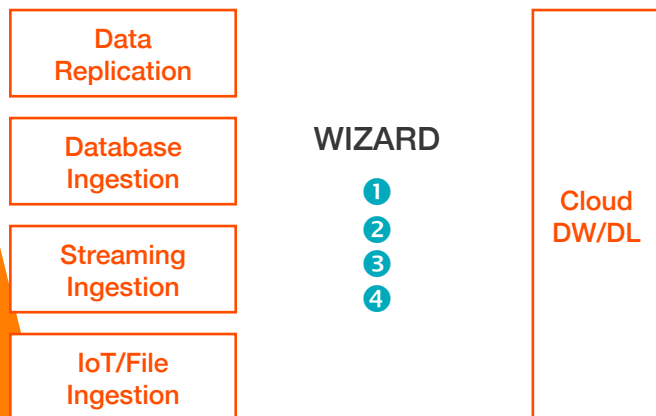

The solution is

 **Self-Service and Automation** 

NO code LOW code - methodology

Multi-Step Wizards for Data Ingestion & Integration

Guides users through a series of point and click steps—abstracts away code and architecture

Over 35 Template Bundles for Data Integration, Data Quality

Leverage prebuilt integration logic (Bundles) for 80% of the development work

Sample Bundle—Data Quality Quick Start

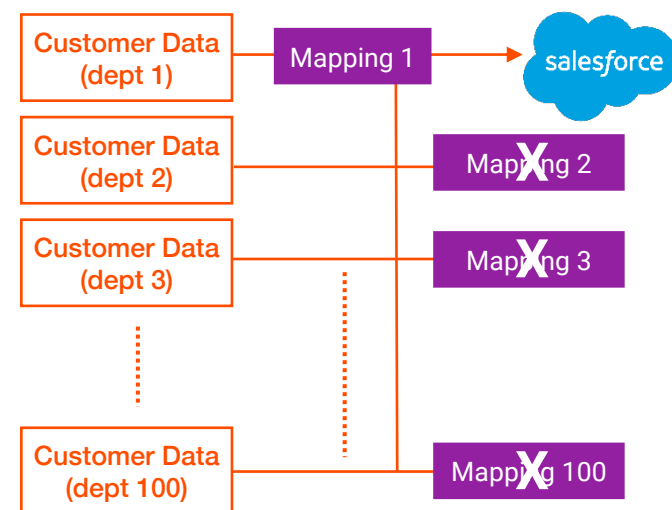

- Match account data
- Match personal data
- Standardize company name
- Parses name information—generates gender, validates date of birth, email, address

80% Productivity Improvement

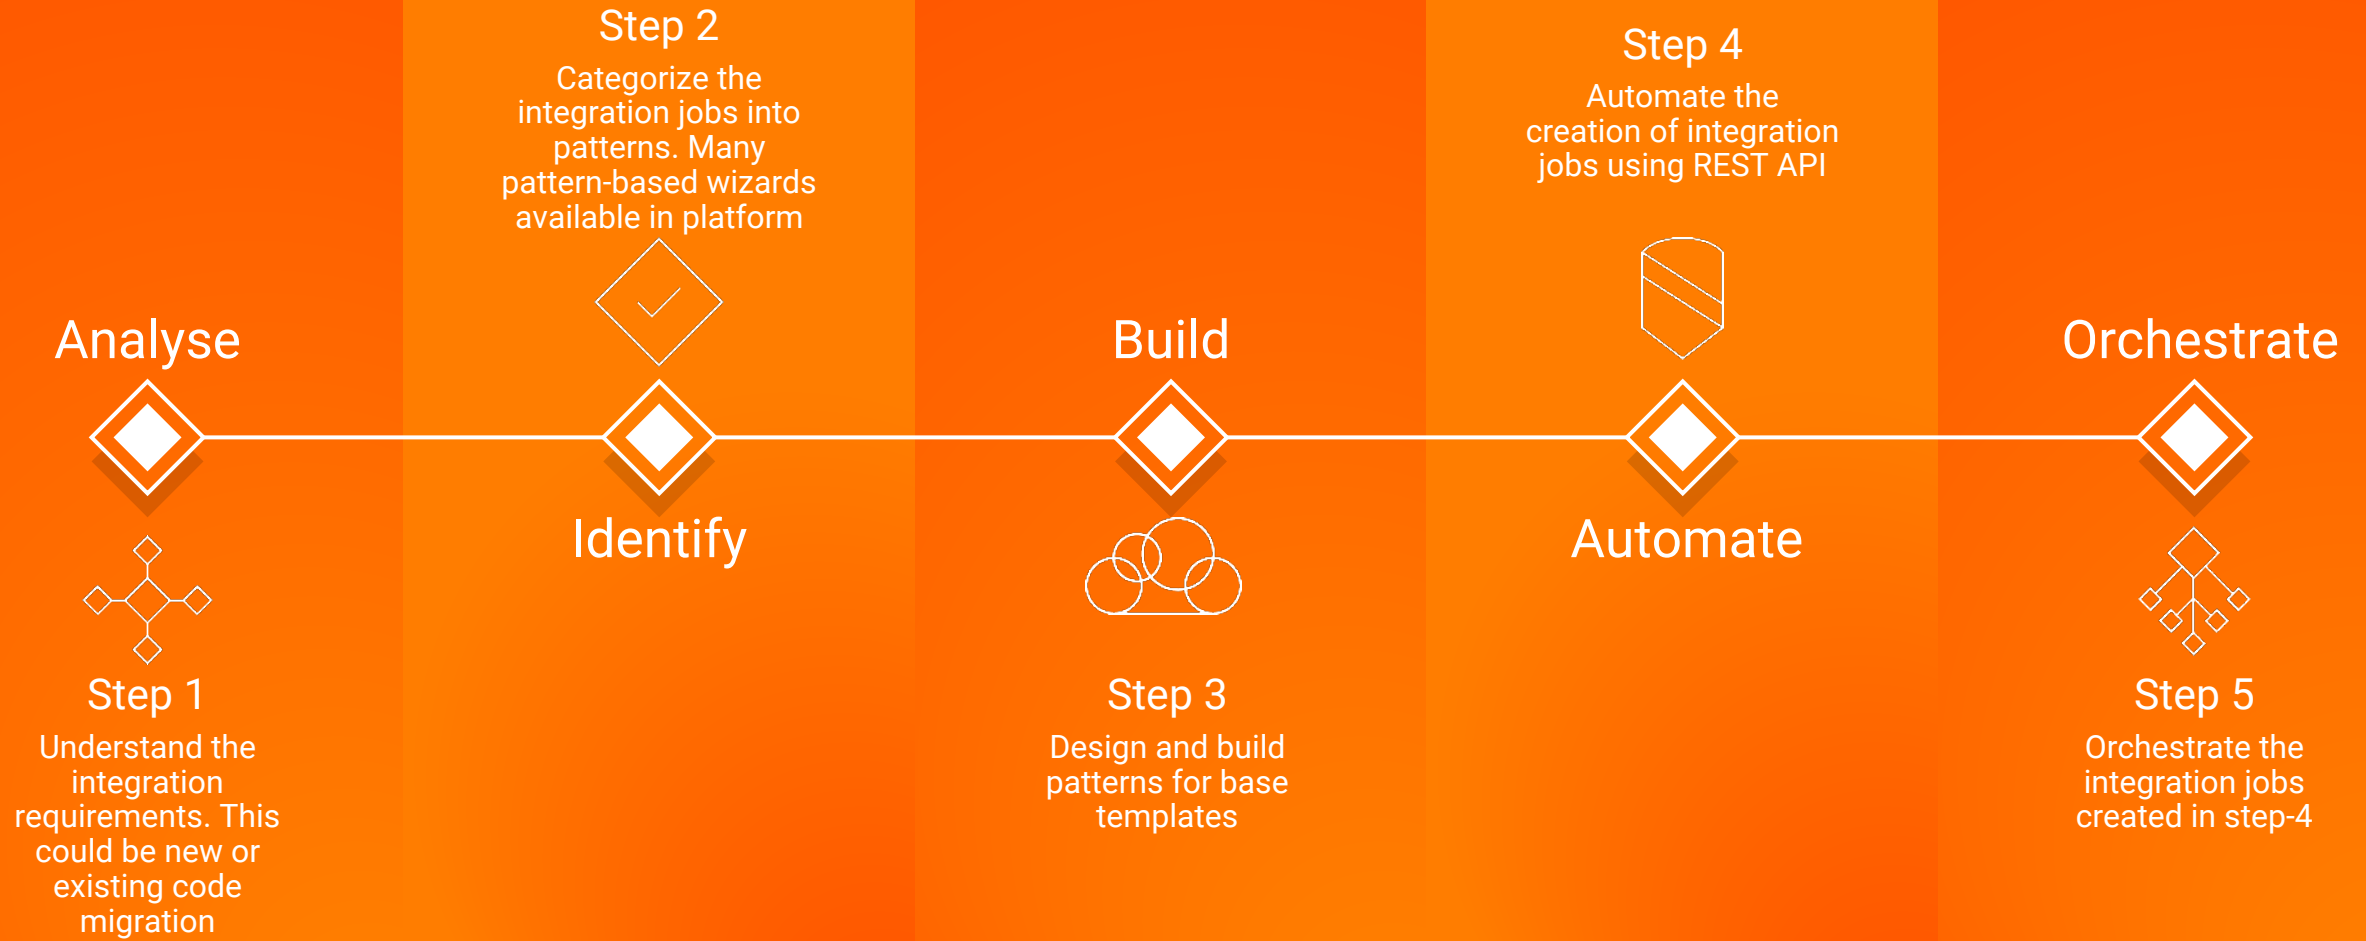

- 1 hour with Bundle vs. 5 hours manual build

Reusable Objects and Mapplets for Dynamic Mappings

Define mapping logic/reusable code once—use it in multiple projects

Pattern Based Cloud Integration – 5 Easy Steps

Cost Exadata's Cost of Ownership yearly was 1million PLUS other OPEX costs to maintain the solution. Informatica changed it to a fraction

Data Volume 7TB and counting; 2.5 billion rows moved daily.

Migration 7 months end-to-end for 1000 plus integration jobs

Solution Built 20 reusable patterns and automated for 1000 plus jobs. Leveraged dynamic mapping functionality.

Result Cost-effective, efficient, agile and effective data warehouse. Improved operational efficiency and reduced costs. Allowed superstore to be the data driven agile organization it aspired to be

Customer Story

Major retail store in Australia use case:

Enterprise Cloud DW Migrate Integration jobs and data from Exadata to AWS Redshift

Business Case:

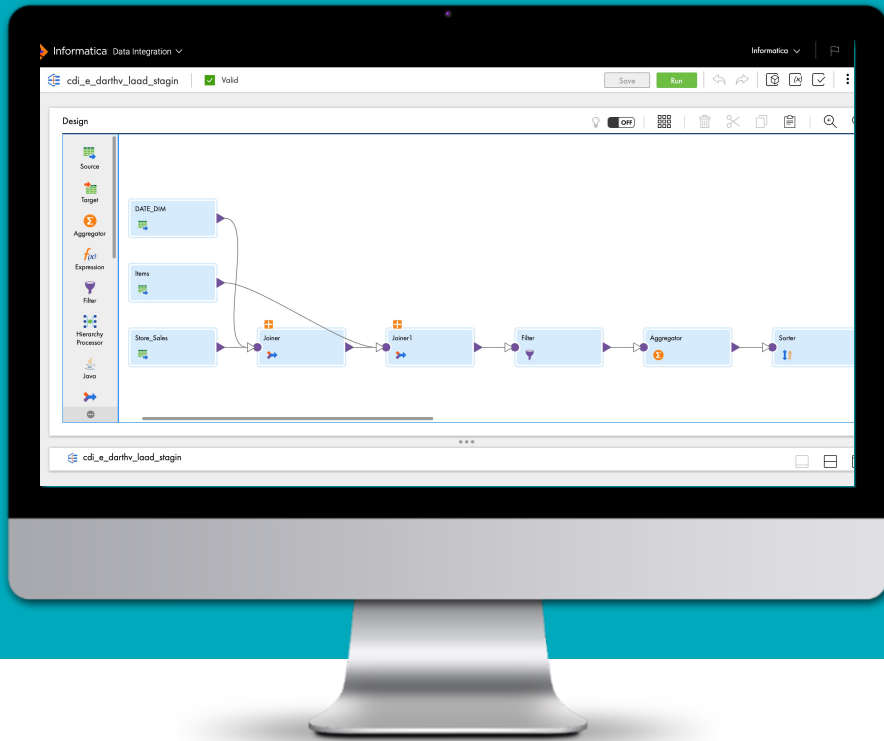

Cloud Modernization to drive the store to be #1 brand in Australia

Pain Point:

No integration strategy with Legacy DW, hand coding, unscalable and report changes taking ages for simple tasks

Core Value Proposition:

Ease of Use, broad connectivity, execution performance and reusability
