

June 20th, 2023

Best Practices for Implementing Cloud Data Governance and Catalog

- Kristin Feedback, Senior Consultant, IPS
- Steven Fleishman, Solution Architect, IPS

Housekeeping Tips

- Today's Webinar is scheduled for **1 hour**
- The session will include a webcast and then your questions will be answered live at the end of the presentation
- All dial-in participants will be muted to enable the speakers to present without interruption
- Questions can be submitted to "All Panelists" via the **Q&A option** and we will respond at the end of the presentation
- The webinar is **being recorded** and will be available on our **INFASupport YouTube channel** and [Success Portal](#) - where you can download the **slide deck** for the presentation. The link to the recording will be emailed as well.
- Please take time to complete the **post-webinar survey** and provide your feedback and suggestions for upcoming topics.

Welcome Email

Welcome to the Informatica family! We are so glad that you're here! Before you can dive into the great features we have to offer, please verify your account:

[Verify me now](#)

You have 48 hours to verify your account. If the link expires, please click [here](#) to get a new account confirmation email.

Services Available

| | | |
|---|--|--|
|  Data Governance and Catalog |  Data Integration |  Data Marketplace |
|  Data Profiling |  Data Quality |  Integration Hub |
|  Metadata Command Center |  Administrator |  Monitor |
|  Operational Insights | | |

Secure Agent Sizing

Requirements for CDGC

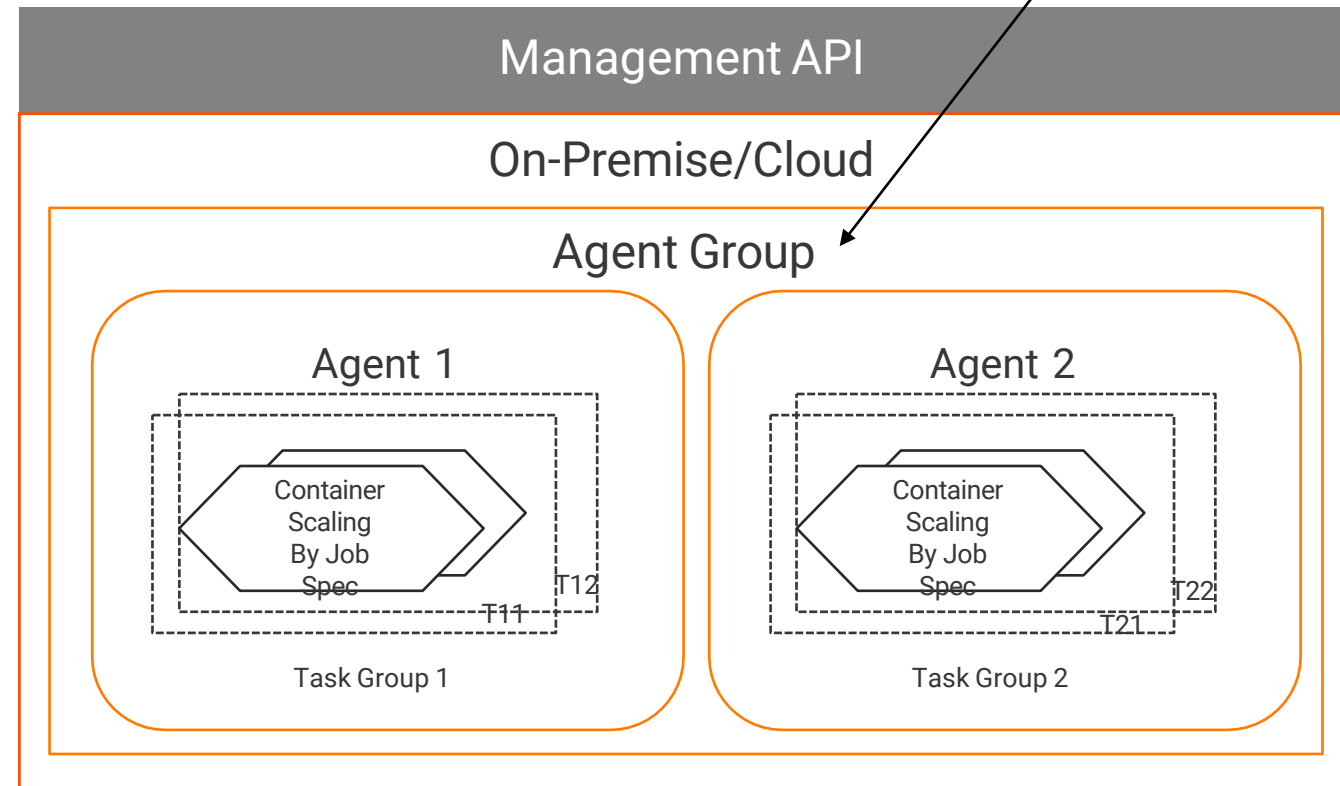

- Recommended Prerequisites
 - 16 CPU cores
 - 64 GB RAM
 - 200 GB HDD
 - SSD disks are strongly recommended
- Easy to deploy
 - Download and install the secure agent
 - Register agent using generated token
- Scale with IDMC agent grouping capabilities
 - 2 or more SA for sources more than 100k assets
- [All agents can execute all the capabilities \(Sizing Guidelines\)](#)
 - Metadata extraction
 - Profiling
- How To: [Plan Secure Agent\(s\) with Best Practices](#)

If agent status is inactive, communication Informatica Cloud Servers can be **blocked** by:

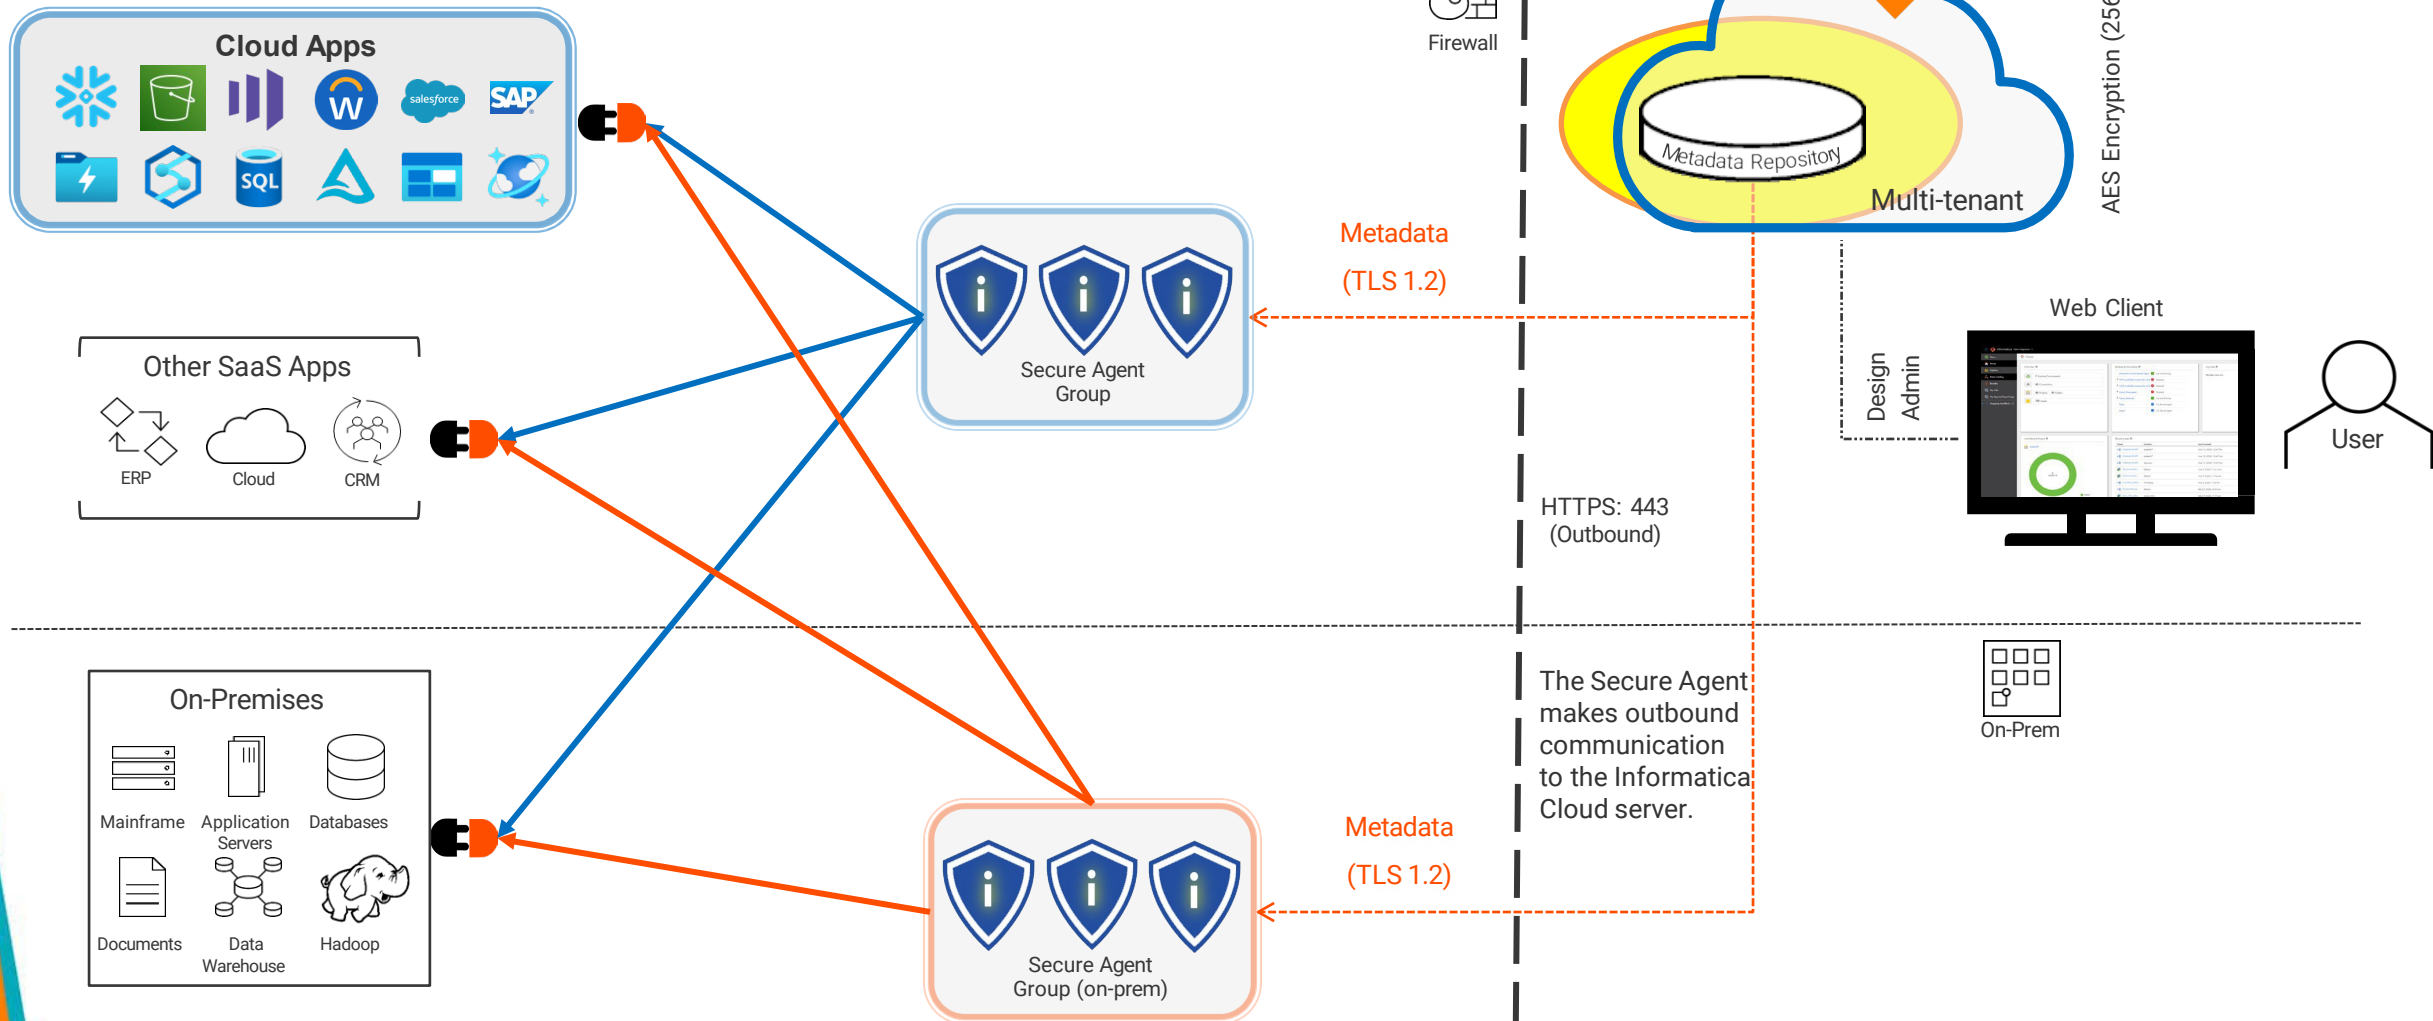

- Windows Firewall
- Virus Scanner
- Content Filter

Secure Agent Group

- High Availability
- Load Balancing
- Job isolation

Network Architecture

- [Only metadata and profile results are sent back to Informatica Cloud](#)
- For metadata in IDMC, Administrator can restrict to view Sensitive Data & Profile Statistics

Secure Agent Connectivity

Cloud Data Profiling

Secure Agent Configuration | Concurrent Jobs

Update **maxDTMProcesses** to increase number of concurrent mapping tasks

| Connection Type | Formula to set value | Example on 16 CPU Server |
|--|--|--------------------------|
| File-based or ODBC connections | $0.75 * \text{Number of logical CPUs}$ | $0.75 * 16 = 12$ |
| Cloud data warehouse or cloud data lake connectors | $0.33 * \text{Number of logical CPUs}$ | $0.33 * 16 = 5$ |

| Custom Configuration Details | | | | |
|------------------------------|----------|----------|-----------------|-------|
| Service | Type | Sub-type | Name | Value |
| Data Integration Server ▼ | Tomcat ▼ | ▼ | maxDTMProcesses | 12 |

Secure Agent Configuration | Memory

1 Additional memory for metadata scanning Increase **maxHeap_size**

Custom Configuration Details

| Service | Type | Sub-type | Name | Value |
|------------------------|------------|----------|--------------|-------|
| Metadata Foundation Ap | PLUGIN_CFG | | maxHeap_size | 16384 |

2 Agent-wide virtual memory for all IICS Services **INFA_MEMORY**

Out of the box it's 512m

Must be set **at least** to 2048M

'-Xms512m -Xmx8192m -XX:MaxPermSize=384m'

System Configuration Details

Reset All

| Service: | Data Integration Server | |
|------------|-------------------------|--------------------|
| Type: | Tomcat JRE | |
| Type | Name | Value |
| Tomcat JRE | INFA_SSL | |
| Tomcat JRE | INFA_MEMORY | '-Xms32m -Xmx512m' |
| Tomcat JRE | JRE_OPTS | '-Xrs' |
| Tomcat JRE | JAVA_LIBS | |

3 Memory on the Mapping level **JVMOption1**

Improve performance

Reduce writing to disk

'-Xmx8192m'

System Configuration Details

Reset All

| Service: | Data Integration Server | |
|----------|-------------------------|-------------------|
| Type: | DTM | |
| Type | Name | Value |
| DTM | JVMClassPath | 'pmserversdk.jar' |
| DTM | JVMOption1 | '-Xmx8192m' |
| DTM | JVMOption2 | |
| DTM | JVMOption3 | |

Don't Forget to Import Pre-Defined Content

The screenshot shows the Informatica Metadata Command Center interface. On the left, the 'Explore' sidebar is visible with a red '1' next to the 'Explore' icon. The main area shows the 'Import Predefined Content' job details, with a red '3' next to the 'Import Predefined Content' button. The job status is 'COMPLETED' with '3 / 3' tasks completed. The job details table shows the following information:

| STATUS | COMPLETED TASKS | SUBMITTED TIME | START TIME | END TIME | EXECUTION DURATION |
|-----------|-----------------|---------------------------|---------------------------|---------------------------|--------------------|
| COMPLETED | 3 / 3 | Sep 10, 2022, 08:42:26 AM | Sep 10, 2022, 08:43:22 AM | Sep 10, 2022, 08:50:39 AM | 00:07:17 |

Below the job details, the 'Tasks (3)' section shows a table with the following data:

| Name | Submitted Time | Start Time | End Time | Execution Duration | Status |
|-----------------------------|-----------------------|-----------------------|-----------------------|--------------------|-----------|
| > Import Predefined Content | Sep 10, 2022, 08:4... | Sep 10, 2022, 08:4... | Sep 10, 2022, 08:5... | 00:07:17 | COMPLETED |

Data Classifications (215)

| Name ↑ | Type | Description | Sensitivity |
|---|--------------|--|-------------|
| Ukraine Passport Domestic | Data Element | Classifies column metadata and data values as Ukra... | HIGH |
| Ukraine Passport International | Data Element | Classifies column metadata and data values as Ukra... | HIGH |

| USA Driving License | Data Element | Classifies column metadata and data values as USA... | MEDIUM |
| USA Individual Tax Identification Num... | Data Element | Classifies metadata and data with USA ITIN column ... | HIGH |
| USA National Provider Identifier Stand... | Data Element | Classifies column metadata and data values as USA... | - |

Lookup Tables (26)

| Name ↓ | Description |
|--------------------|-------------------------|
| lkp_usa_zipcodes | List of US zip codes. |
| lkp_usa_states | List of US States. |
| lkp_usa_state_code | List of US state codes. |
| lkp_usa_county | List of US counties. |
| lkp_usa_city | List of US cities. |
| lkp_us_phn_no_col | |

Column Similarity Model v1.0

General Information

Name: Column Similarity Model v1.0

Description: A model that discovers column similarity relationships within a catalog source based on the similarity between the names as well as the content of the columns.

Roles and Responsibilities

Why are you using CDGDC?

What was the deciding factor for wanting to start/bring data governance to the next level

Need to think about how the program wants users to interact with the solution and in what ways they may want to operationalize it.

Will there be a heavy data privacy, data quality, or master data management focus? Will priorities be split between multiple areas?

Preliminary Considerations

What needs to be done for the program to be functional?

What operations need to be completed?

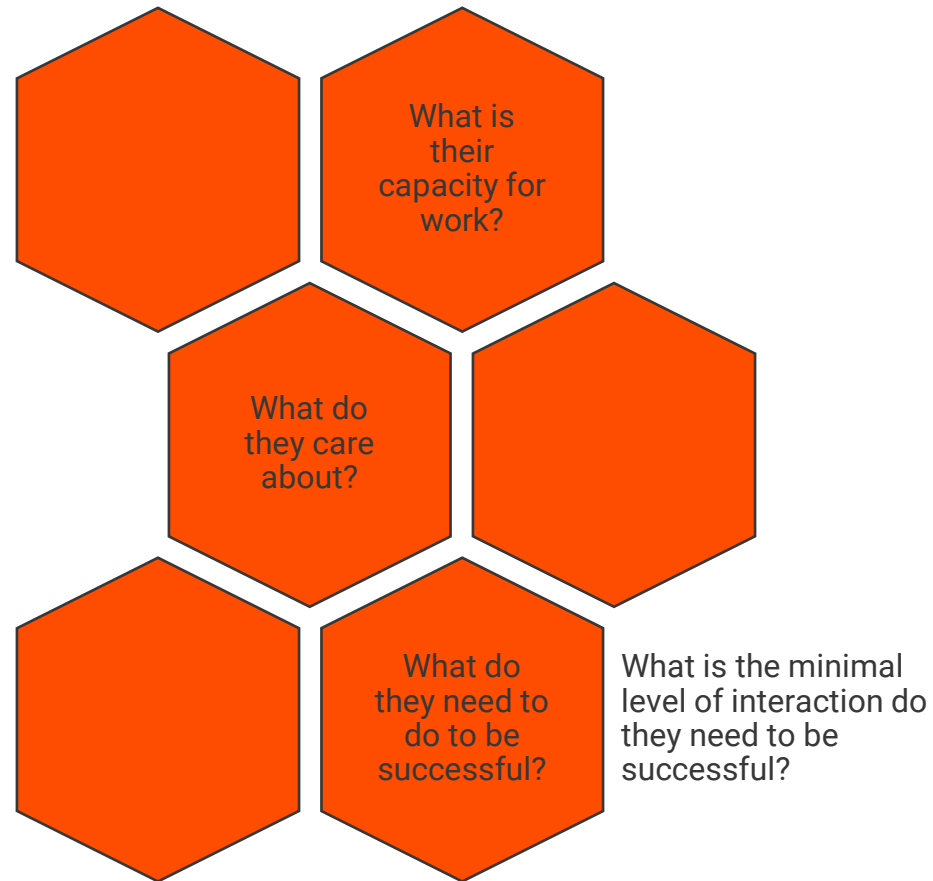

What is your current team's strengths and weaknesses?

Does your company already have a data first culture?

Preliminary Considerations

Who will be the primary stewards and owners?

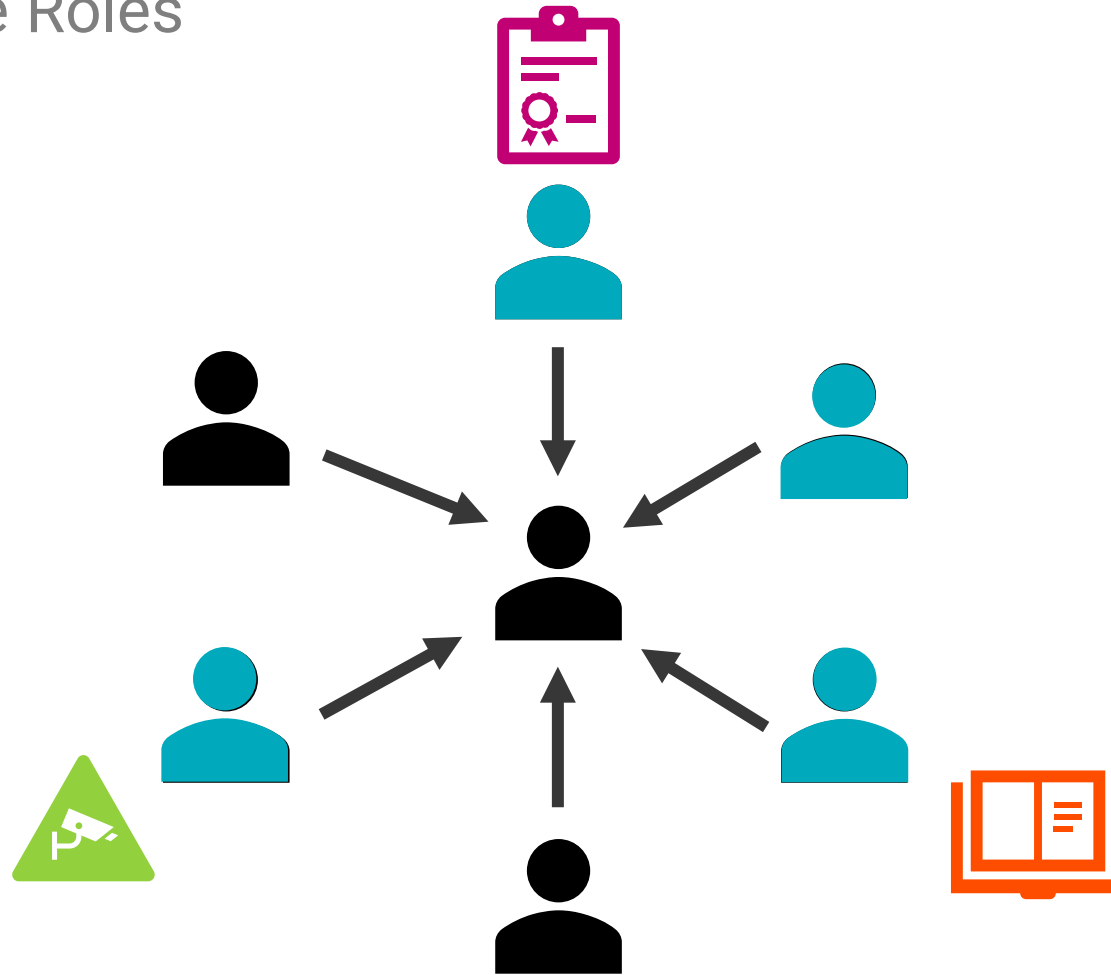

User interactions

User Interactions

Functions within the Roles

Catalog Data Steward

Communicates technical workings of data, fosters the goal of data re-use, and designs policies and processes to improve the underlying integrity of information to the organization. Responsible for uploading and curating catalog assets.

Foundation Design

Foundation for the Future

CDGC's strength for the glossary lies in depth of information and its relationships.

CDGC should be kept in a standard model to maximize use and growth.

Keep in mind that the use case is just giving you the first set of information to input information.

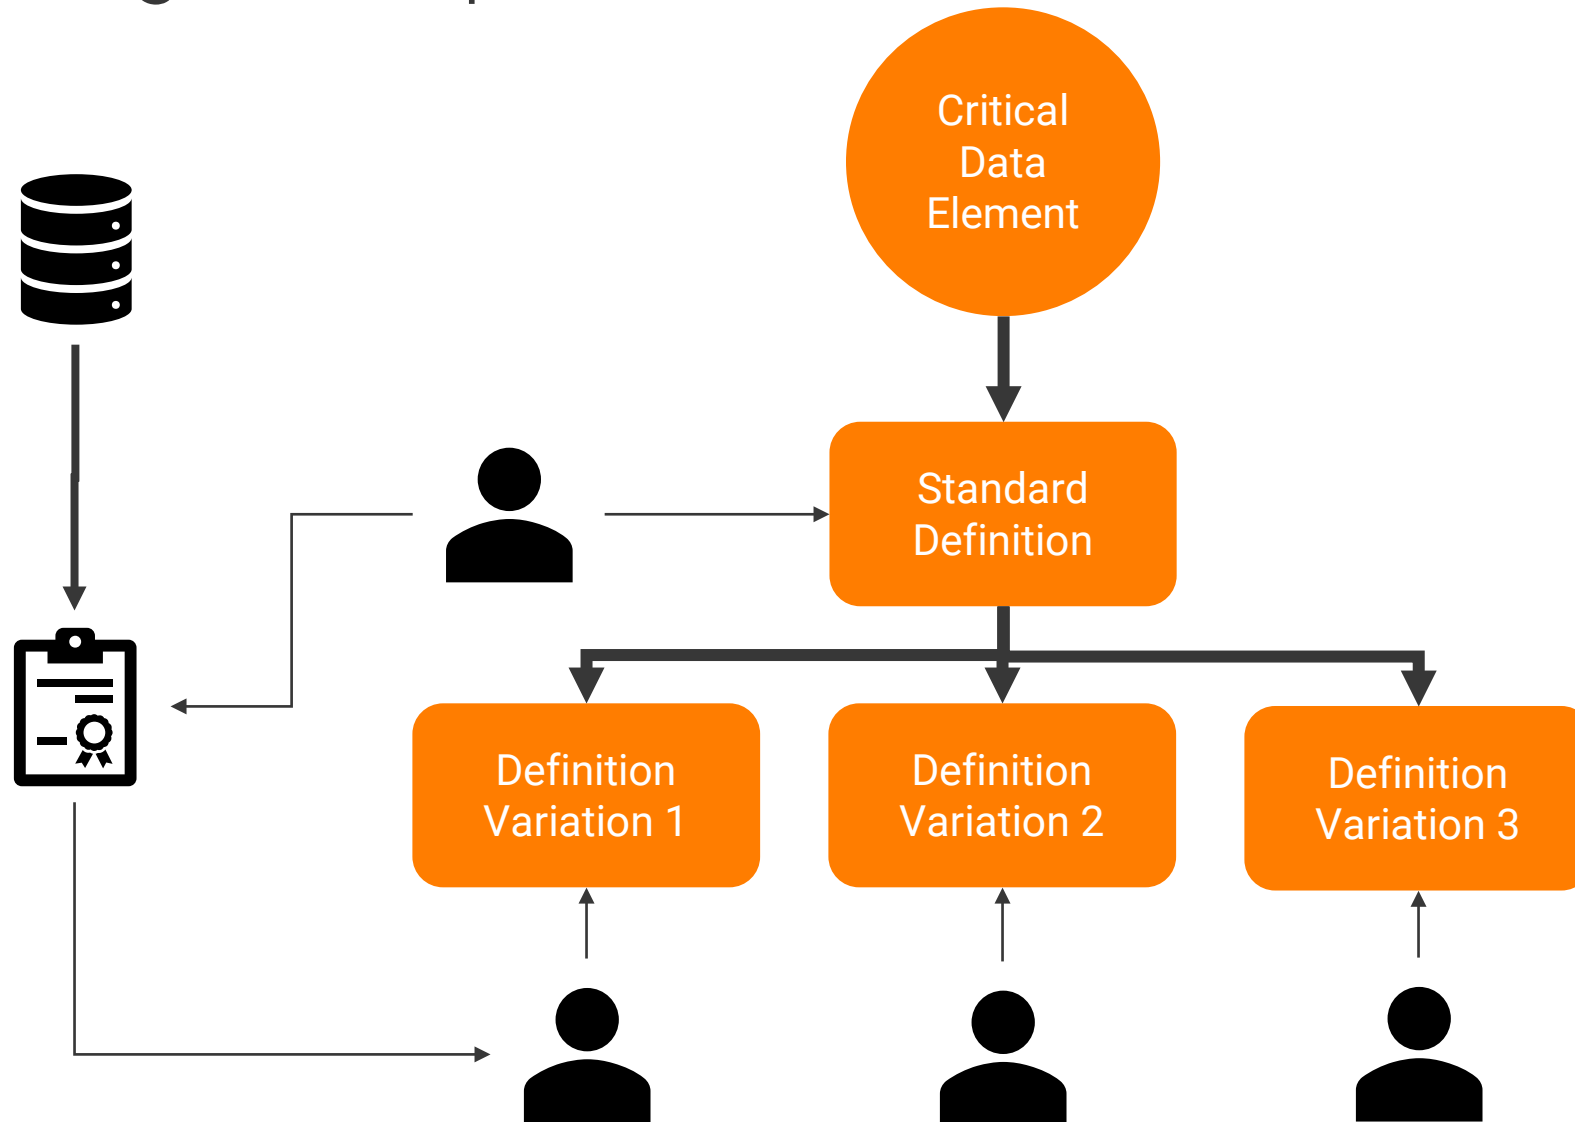

Harder to change the model once the use case information is built out.

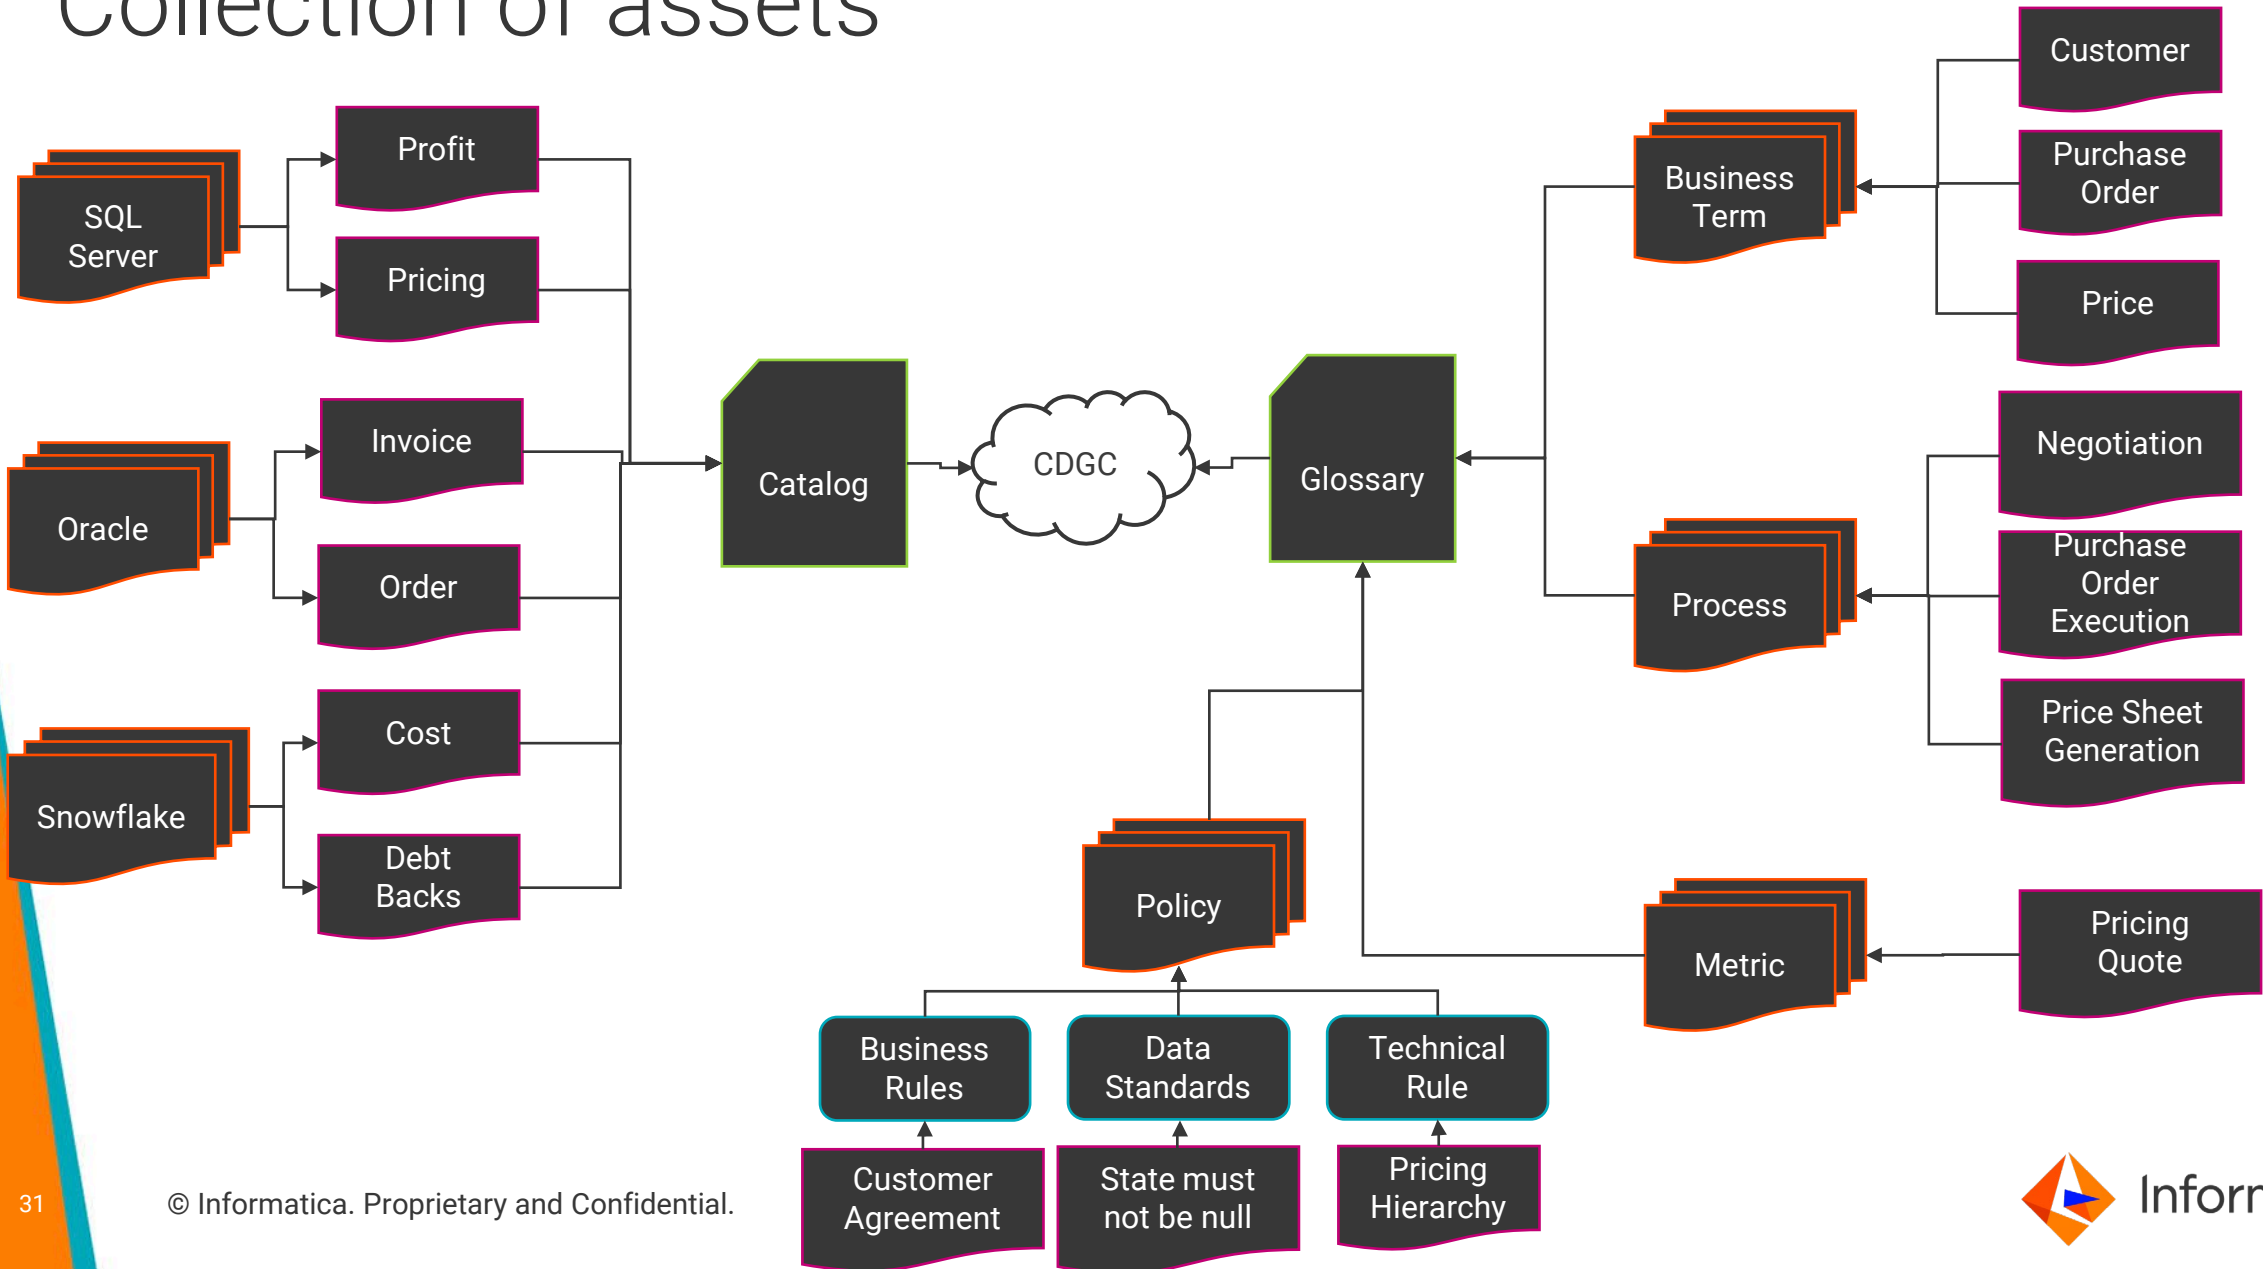

Where do things belong?

Finding the start...

Starting concept...

Describe the rule

State Name must not be less than 4 characters

[Click here](#) to use the description from the rule template

[View Recommendations](#)

CLAIRE® Recommendations

Select to view details and create a new rule:

IF Length(State) >= '4' THEN TRUE

CLAIRE® will generate and attach the following rule:

Rule Name BT_Stat_Com_May_27_2023_133543

Description This is a CLAIRE® generated rule based on the description State Name must not be less than 4 characters

Input State

NLP texts to consider

You can use the following types of NLP rule descriptions. If the text you enter is insufficient or unclear, CLAIRE® might recommend that you rephrase the rule description.

Empty Value Rules

The following examples show descriptions of null value rules that CLAIRE® NLP technology can read:

- Sum may be NULL
- keep the section field empty
- box value should be nullified
- Title should be Nothing
- Blank values are equal to null

Non-Empty Value Rules

The following examples show descriptions of rules that are not null values that CLAIRE® NLP technology can read:

- Age is always NOT NULL
- Name field cannot be blank or empty
- RFID values is not Null
- Radius must not be blank or empty
- doc number is not NULL

Comparison Rules

The following examples show descriptions of comparison rules that CLAIRE® NLP technology can read:

- Down payment number is greater or equal to thousand
- Down payment is going to either be 1000 or be above 1000
- Value cannot be less than 1,000

NLP texts to avoid

Avoid the following types of NLP rule descriptions. If the text you enter is insufficient or unclear, CLAIRE® might recommend that you rephrase the rule description.

Double Negation Sentences

The following examples show descriptions of double negation sentences that CLAIRE® NLP technology cannot read:

- It is not defined city name to be not null
- Distance is not equal to or lesser than NOT NULL
- Date of birth cannot be not null
- It is not acceptable for Phone Number to be not NULL

Complex Sentences

The following examples show descriptions of complex sentences that CLAIRE® NLP technology cannot read:

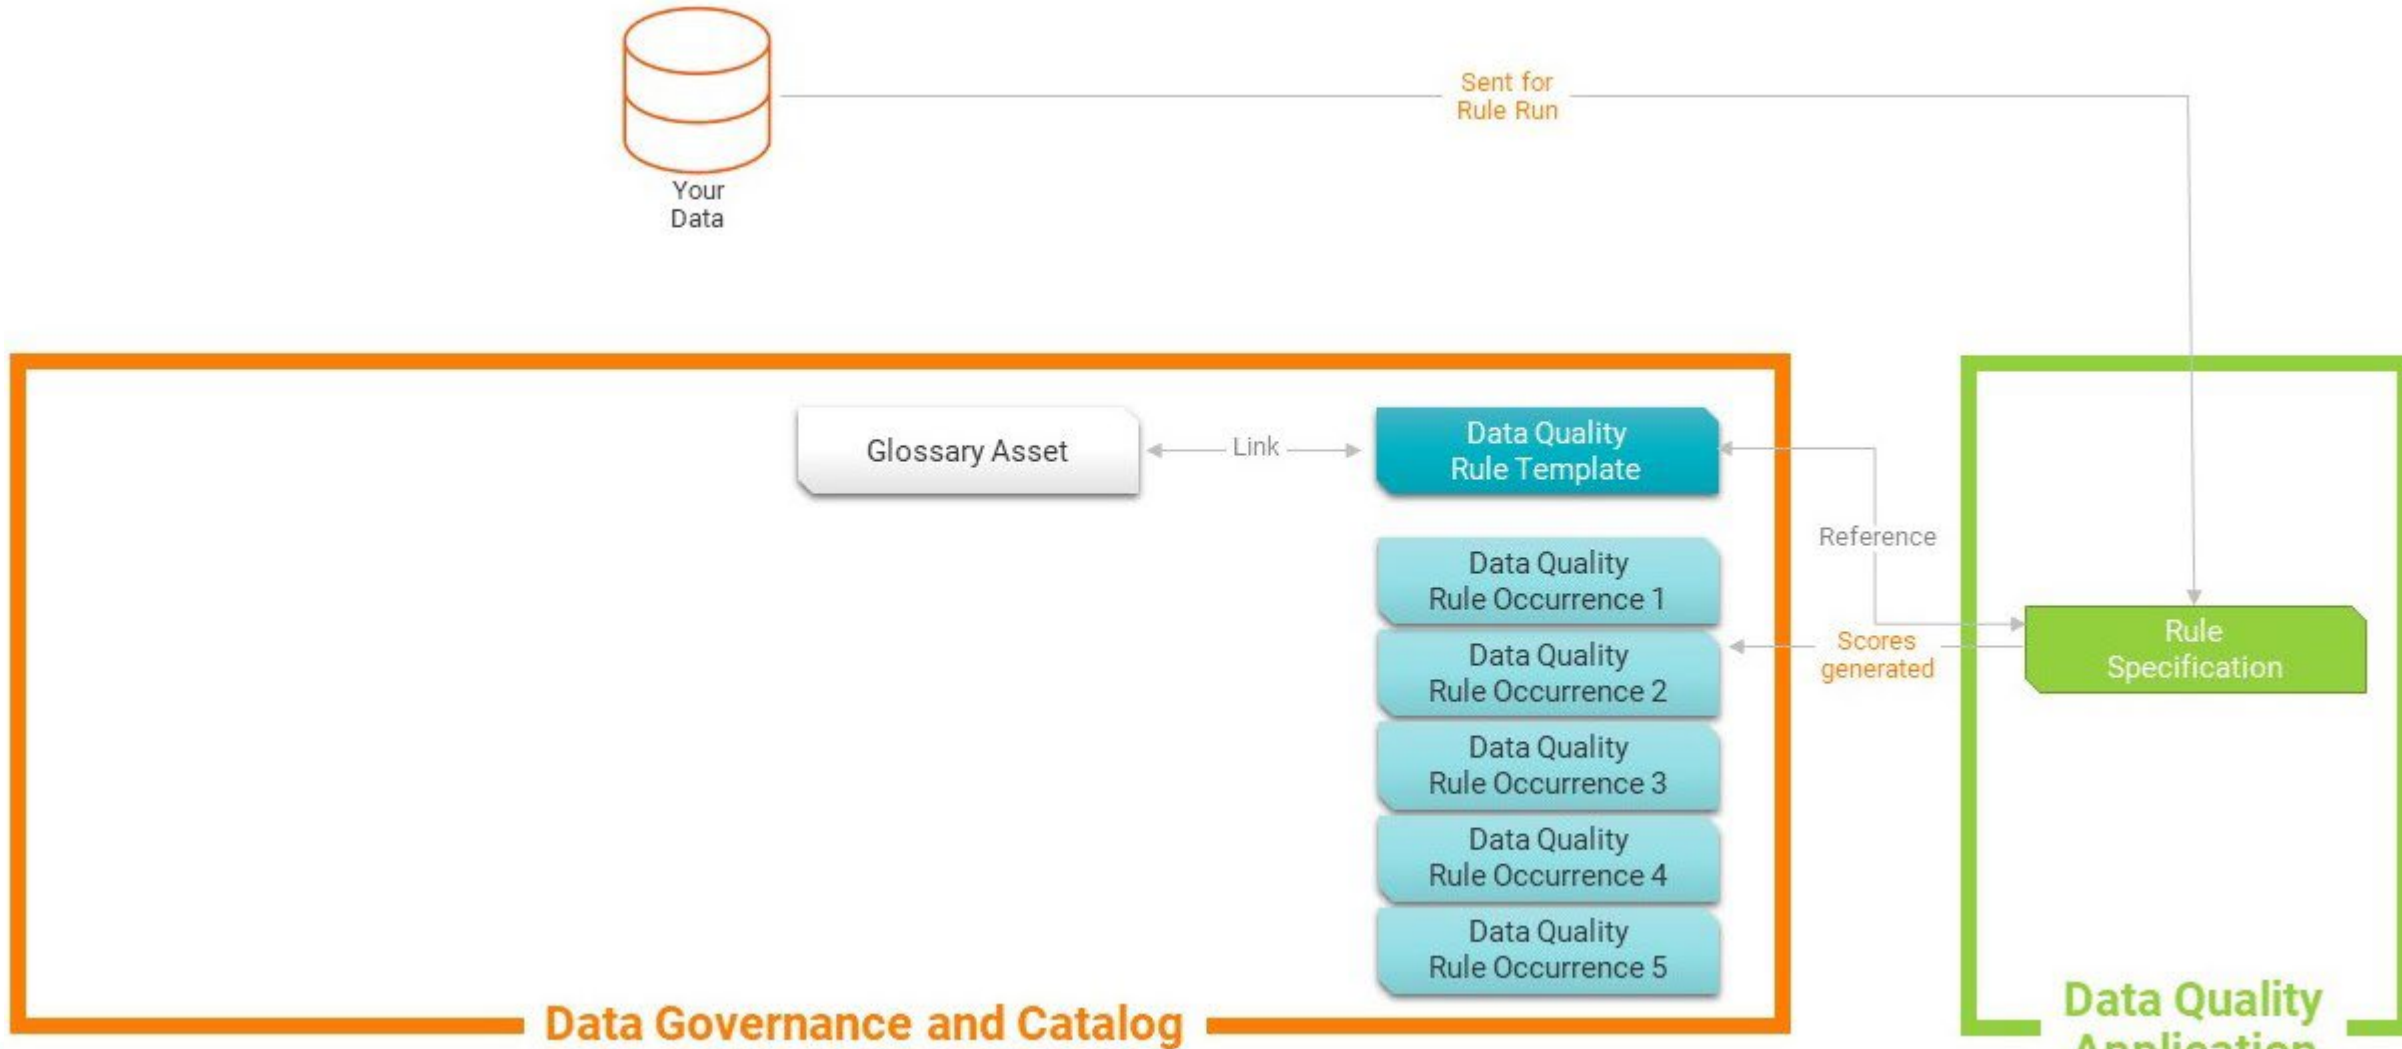

- It's not acceptable for date to equal NULL
- Nothing should be populated in name field
- Joining Date should not contain the value of date but contains numbers
- Product is not equal to 2 or not larger than 1

Grammatically Incorrect Sentences and Incorrect Spellings

The following examples show descriptions of grammatically incorrect sentences and incorrect spellings that CLAIRE® NLP technology cannot read:

- First name should be \$NULL
- Serial cannot contain numerics
- Last_name is not a number and alphanumeric
- Product is nt equal to or nt larger then 1
