# Ensuring Compliance Through Data Governance Case Study on Best Practices - Part 1

- Ragavendra Kinnera, Manager, CSA
- Rashmi P, Senior Solution Architect, CSA
- Akshada Sable, Senior Solution Architect, CSA

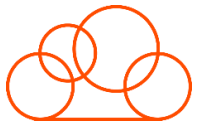

Where data & AI come to **LIFE**

# Housekeeping Tips

- Today's Webinar is scheduled for **1 hour**
- The session will include a webcast and then your questions will be answered live at the end of the presentation
- All dial-in participants will be muted to enable the speakers to present without interruption
- Questions can be submitted to "All Panelists" via the **Q&A option** and we will respond at the end of the presentation
- The webinar is **being recorded** and will be available on our [Success Portal](#) - where you can download the **slide deck** for the presentation. The link to the recording will be emailed as well.
- Please take time to complete the **post-webinar survey** and provide your feedback and suggestions for upcoming topics.

# Agenda

Business Challenges and Benefits using Regulatory Compliance

How IDMC supports Regulatory Compliance

Data Governance in Compliance

Case Study Overview

# What are the current trends in regulatory compliance?

## GenAI

Rapid growth of regulatory oversight as use of GenAI systems increases  
– EU AI Act | Colorado AI Act (CAIA)

## Data Privacy

Evolving privacy laws are still a major challenge to align data access policies  
– GDPR (EU) | CCPA (US)

## Cybersecurity

As threats become more sophisticated, risk exposure increases – HIPAA (US) | DORA (EU)

## ESG

Reporting is transitioning from voluntary to mandatory by regulatory and consumer demands – CSRD (EU) | SFDR (EU)

## Transparency & Accountability

Demand in areas such as beneficial ownership reporting and supply chain traceability – Corporate Transparency Act (US)

# Business challenges to organizations

## Ethical Concerns

Biased decision-making, leading to unfair treatment or discrimination

## Privacy Exposure

Massive datasets of sensitive data pose risks if not handled appropriately

## Explainability

"Black box" algorithms where decision-making is not well understood

## Transparency

Data transformation that loses trust from source to delivery when used for AI

## "I don't know"

Fear of unknowns creates hesitancy when adopting AI applications

# Financial services company launching a new AI-driven credit scoring tool

# Solution Needs by Key Roles

**Want to drive business performance!**

**CDO / Head of Data**

- Ensure compliance of data through enforceable policies.
- Manage data pipeline transparency & traceability essential for regulatory audits and reporting.

**LoB / App Owner**

- Access to high-quality, policy-compliant data, for quick and accurate decision-making.
- More efficient compliance to avoid penalties and keep brand reputation.

**...but also need to limit AI risk exposure**

**CIO / CISO**

- Need for an agile, robust IT infrastructure that adapts to evolving compliance mandates.
- Strategic partner in policy compliance, cost efficiency and infrastructural agility

**Compliance Officer  
(CCO)**

- Protect intelligence on personal data (PII)
- Continually assess data and compliance risks
- Efficiently respond to audits with transparency, and complete data.

**Requires Cross-Functional Collaboration to drive business performance compliantly!**

# Key benefits for regulatory compliance

Core value drivers for organizations

Improve efficacy  
of Regulatory  
Reporting

# Data Governance in Compliance

# Critical Ways INFA helps w/Regulatory Compliance?

## ★ Lineage / Impact

Where is the data coming from?

Data Engineer

Data Architect

Who can provide feedback?

## ★ 220+ OOTB Classifications

Where can I find 'PII, ESG, PCI...' data?

Scientist

Analyst

Who owns this data?

## ★ Establish ownership!

How do we get access to data?

How do we **safely & smartly** protect data?

## ★ Automatically Enforce Policy upon Access

## ★ Improve Quality

Can I trust this report?

Executives

Which definition is correct?

Stakeholder

Data Governance is about enabling organizations to **DEFINE, DISCOVER, MEASURE, COLLABORATE, PROTECT, and SHARE** on all data concepts.

# Why is Data Management Hard and Complex?

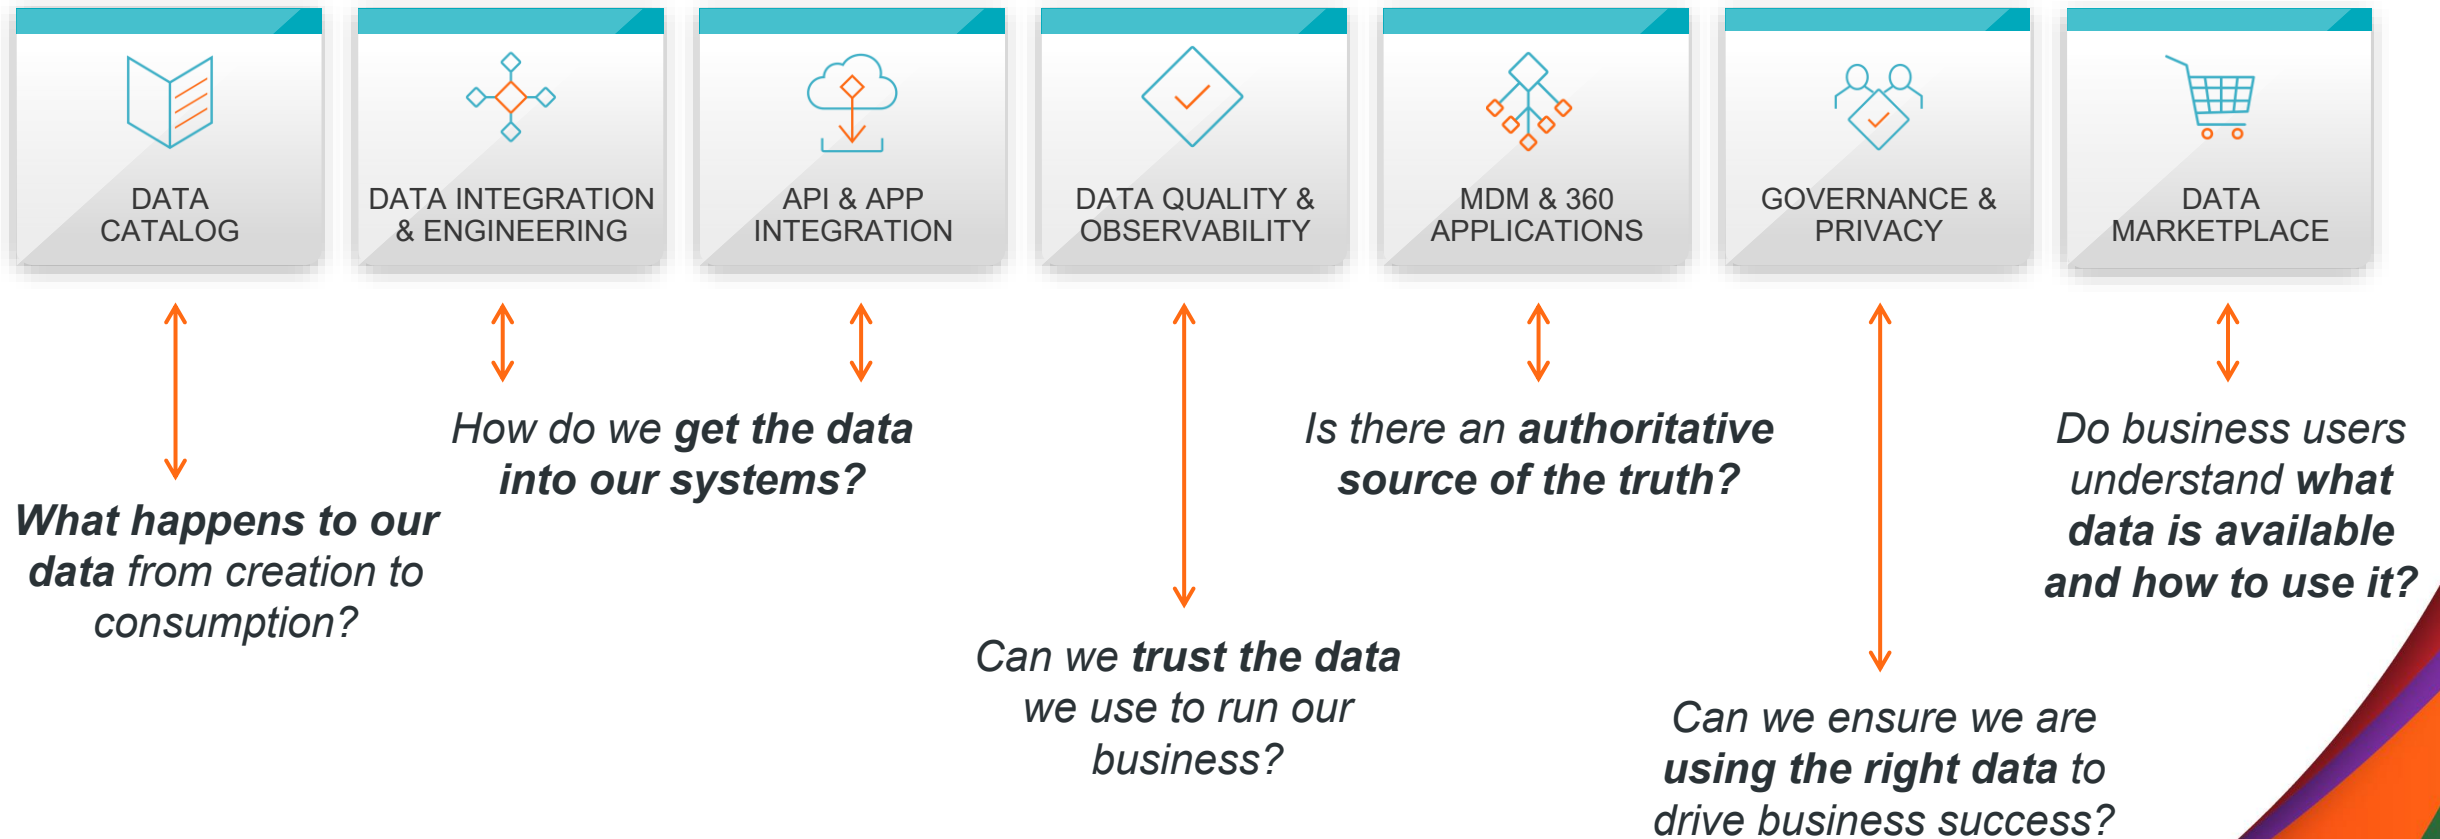

55% have **1,000+ data sources** and 78% predict more in 2023

Statistics are based on 600 CDOs surveyed around the world – November 2022

# IDMC Helps Answer These Hard Data Questions!

# Case Study Overview

# BFSI – IDMC CDGC Use Cases for Compliance

## Data Privacy and Protection

Helps comply with GDPR and CCPA by managing personal data, ensuring secure access and handling practices.

## Data Lineage and Transparency

Provides detailed data lineage for accurate regulatory reporting and audit purposes, supporting BCBS 239 compliance

## Risk Management

Facilitates risk data aggregation and analysis to support compliance with Basel III for accurate risk reporting.

## Anti-Money Laundering (AML)

Assists in monitoring and detecting suspicious patterns in customer activity and transactions, essential for AML compliance

## Know Your Customer (KYC)

Integrates data from multiple sources to build comprehensive customer profiles, ensuring compliance with identity verification requirements

## Data Quality Management

Ensures accurate and consistent data for financial reporting compliance, supporting standards like SOX (Sarbanes-Oxley Act).

## Access Controls and Audits

Provides secure data management with role-based access controls and audit trails, crucial for maintaining security compliance.

## Industry Regulations Compliance

Aids in documenting compliance with industry-specific regulations such as MiFID II for transparency and accountability

## Automated Policy Management

Enables automatic enforcement of data governance policies across the organization, ensuring consistent regulatory compliance

# Retail – IDMC CDGC Use Cases for Compliance

## Data Privacy and Protection

Ensures compliance with data privacy laws like GDPR and CCPA by effectively managing personal customer data

## Consent Management

Manages and tracks customer consent for data usage, ensuring alignment with privacy regulations

## Data Quality and Accuracy

Maintains accuracy and consistency in product and transaction data for regulatory compliance and operational efficiency

## Product Information Management

Ensures product data comply with labeling, safety, and regulatory standards across various regions

## Supply Chain Transparency

Provides visibility across the supply chain to meet compliance requirements related to product sourcing and ethical standards

## Consumer Protection

Maintains accurate product and pricing information to comply with consumer protection and advertising laws

## Data Integration and Governance

Centralizes data asset management to ensure comprehensive governance and compliance with applicable regulations

## Access Control and Security

Secures sensitive customer data with role-based access controls and monitoring, adhering to data protection standards

## Audit Readiness and Reporting

Streamlines compliance audits with robust documentation and reporting features

## Automated Policy Enforcement

Automates the application of data governance policies to ensure consistent compliance across the organization

# Healthcare – IDMC CDGC Use Cases for Compliance

## Patient Data Privacy and Security

Ensures compliance with HIPAA by managing and protecting patient health information (PHI) through secure data handling

## Lineage and Transparency

Provides audit trails and transparency over data sources and transformations, supporting compliance during audits

## Sensitive Data Identification

Identifies and manages sensitive data like PHI and PII, ensuring secure handling in compliance with regulations

## Data Quality and Integrity

Maintains data accuracy and integrity for reliable clinical reporting and compliance with regulatory standards

## Policy Management

Enables the creation and automation of data governance policies to ensure consistent compliance with regulations

## Clinical Research Compliance

Facilitates ethical data usage and management in clinical research, supporting compliance with Good Clinical Practice (GCP)

## Regulatory Reporting and Risk Management

Supports efficient and compliant regulatory reporting through comprehensive reporting features

## Access Control and Security

Enhances data security with role-based access controls and audit capabilities aligned with healthcare standards

## Consent Management

Manages and tracks patient consents and preferences, crucial for compliance with data privacy regulations

## Interoperability and Data Sharing

Ensures compliance with healthcare data exchange standards to facilitate safe and compliant data sharing

# Thank You
