

MDM GDPR Consent Mastering

Kamal Abrol

Customer Success Technologist

Informatica™

Housekeeping Tips

- Today's Webinar is scheduled to last **1 hour including Q&A**
- All dial-in participants will be muted to enable the speakers to present without interruption
- Questions can be submitted to "All Panelists" via the **Q&A option** and we will respond at the end of the presentation
- The webinar is **being recorded** and will be available to view on our **INFASupport YouTube channel** and **Success Portal**. The link will be emailed as well.
- Please take time to complete the **post-webinar survey** and provide your feedback and suggestions for upcoming topics.

Disclaimer

- Compliance with the GDPR will be based on the specific facts of an organization's business, operations and use of data.
- This presentation provides a set of discussion points that may be useful in the development of an organization's GDPR compliance efforts, and is not intended to be legal advice, guidance or recommendations.
- An organization should consult with its own legal counsel about what obligations they may or may not need to meet

Agenda

GDPR Nutshell-Why When Where What ?

Business Implications (Data Protection EU/Non EU)

Unleashing power of MDM with governance

Consent Data Services and Architecture

Live-Consent Mastering demo-Informatica Solution Covering All

GDPR nutshell

WHY?

- ❖ GDPR is about harmonization of protection of personal data in regard to its processing ways and also increase powers of subjects/ authorities to take action against non compliant business

WHEN?

WHERE?

- ❖ All 28 EU member countries
- ❖ EU business, organizations, authorities, non-profit organizations
- ❖ Business outside EU processing personal data about EU citizens

WHAT?

- ❖ Protection of personal data through individual consents via organizational, administrative or technical means and provide evidence of that protection

The Big Picture

Key changes of the GDPR

❖ Tough penalties:

Fines of up to 4% or €20M of annual global turnover

€'000 → **€'000,000**

Previously fines were limited in size and impact.
GDPR fines will apply to both controllers and processors.

❖ Right to be Forgotten

Data Subjects have the right to be forgotten and erased from records, cease further dissemination of the data, and potentially have third parties halt processing of the data

❖ Borderless Scope

Regulation also applies to non EU companies that process personal data of individuals in the EU

❖ Affirmative & Retractable Consent

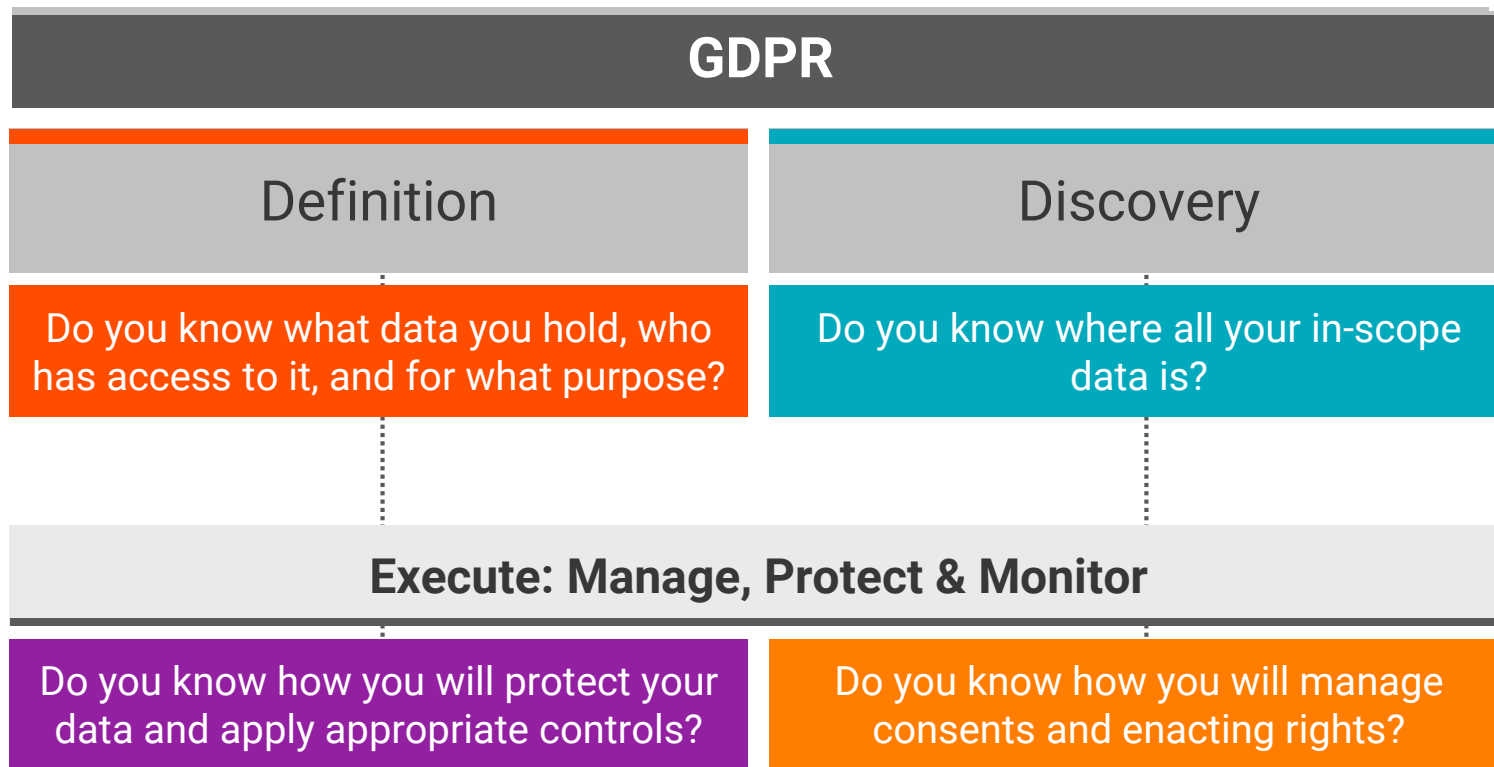

Consent for processing personal data must be clear, context based and must seek an affirmative response. It must be as easy to withdraw consent as it is to give it.

❖ Breach Notification within 72 Hours

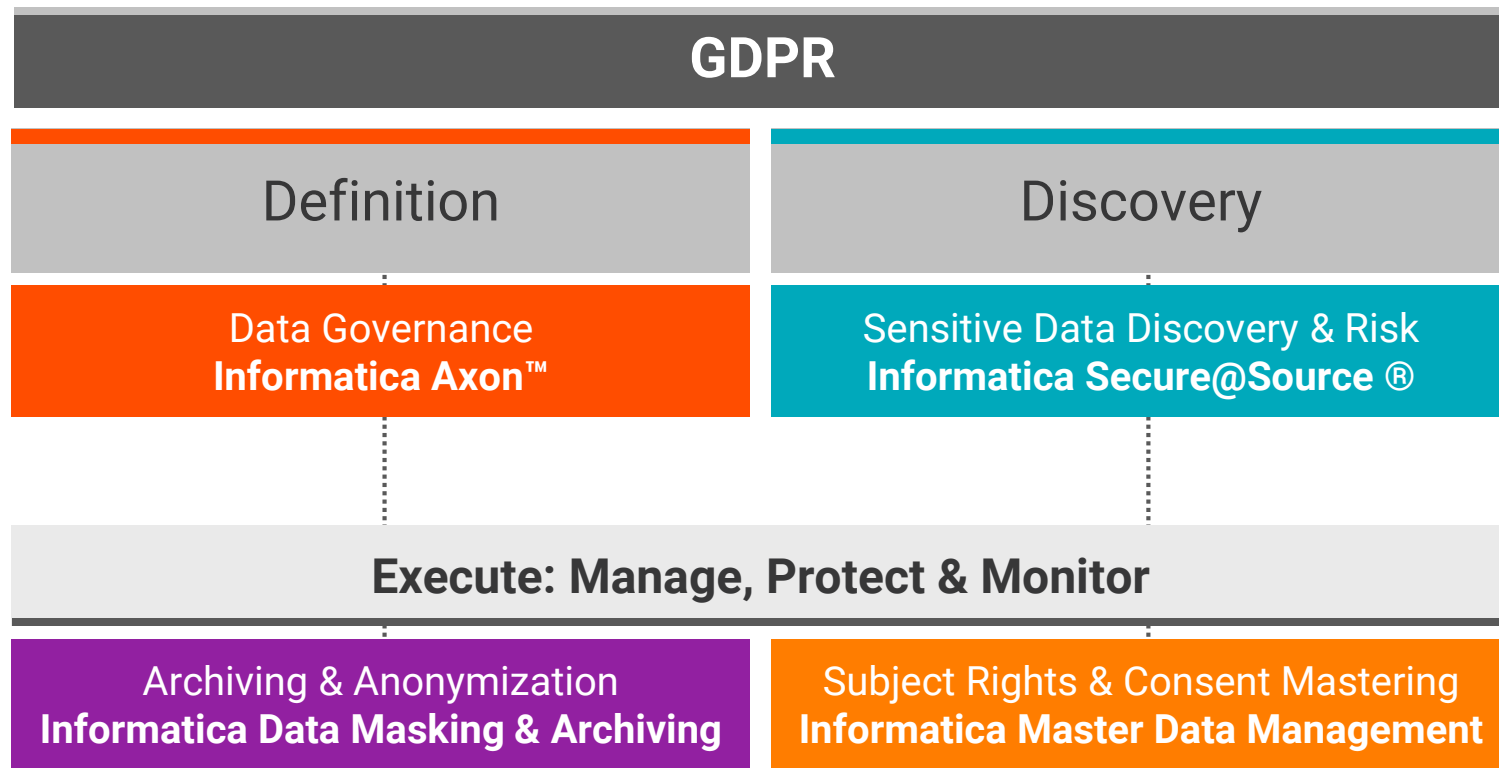

Previously fines were limited in size and impact. GDPR fines will apply to both controllers and processors.

GDPR

Informatica Data Governance & Compliance Solution for GDPR

GDPR Perspective-Why MDM needs DG?

Subject Rights and Consent Compliance

- Do you know whether you have consent to hold and use this data?
- Do you know how you will protect your data and apply appropriate controls?

Enforcing GDPR process & Consent Mastering via C360 10.4

- IT should not own DG program
- Business should be Key drivers of DG program while IT as participating member laying down MDM/DQ Frameworks.

IT Business Collaboration via MDM BPM Workflows(ActiveVos)

Business implications(GDPR - a big shift in management of Consent)

In past:

- Opt-in, Opt-out flag

I only know that
somewhere, somehow and
sometime I got the consent
to use the data.

Consent is not just an Opt-in/Opt-out flag... I need to provide:

- ❖ **WHY:** The purpose for which the consent was collected.
- ❖ **WHEN:** The time I need the data stored for that purpose. Typical default is 6 months.
- ❖ **WHAT:** What data needs to be collected for that purpose.

Now

- Consent proofs - accountability
- Privacy by default
- Controllers
- Purposes
- Policies
- Retention periods
- Share with 3rd party
- Audit
- History
- Cross border policies
- Portability to other parties
- Portability from other parties
- Withdrawal, rectification, objection and access rights
- Right to be forgotten
- Anonymization
- "In behalf of" data
- Unstructured data (i.e. images)
- **Single view of person**

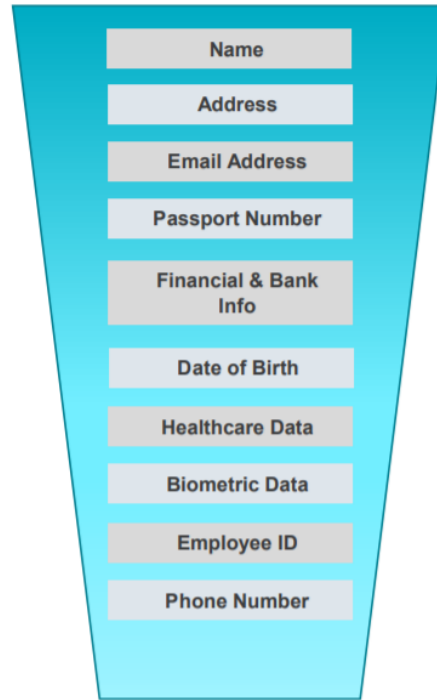

3 BUCKET TYPES OF IDENTIFIERS FOR PERSONAL DATA

IDENTIFIER

Art. 4

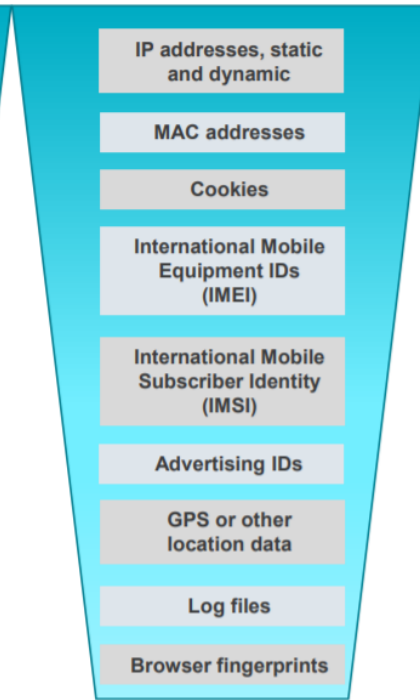

(Personal Data about the Data Subject)

Online IDENTIFIER

Rec. 30

("...online identifiers [Personal Data] provided by their [Data Subject's] devices, applications, tools and protocols...")

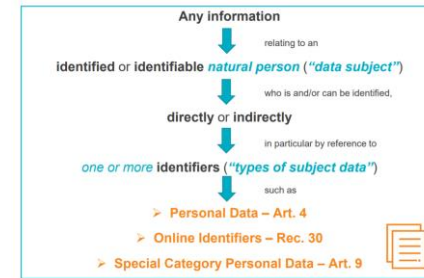

Special Category IDENTIFIER

Art. 9

(Special Categories of Personal Data about the Data Subject)

PERSONAL DATA DEFINITION

Expanded GDPR Rights achieved with MDM

- ❖ Right to be informed
- ❖ Right to erasure(RTF)
- ❖ Right to data portability
- ❖ Right to restriction
- ❖ Right to rectification
- ❖ Right of access
 - ❖ Including additional processing details

- ❖ Right to object
- ❖ Right to prevent automated processing, including profiling

Other MDM functionalities required/wanted for GDPR:

Security?

Role & processing-purpose specific layouts

Metadata?

Special care (with additional metadata) when:

Subject is a child: a proof with the consent of the parents should be provided.

Shared cross borders outside the EU: we need an special consent of the subject, we need to inform the destination country, we've to respect the laws.

Shared with 3rd party providers: we've to inform to the subject what is the 3rd party and specify how he can apply his rights to that party.

Audit?

Complete Consent lineage, log the personal data usage.

Introduction: GDPR non-MDM functionalities

Other functionalities required for GDPR that we don't pretend to cover with MDM:

- **Data breaches:** in case a data gap occurs, the affected subjects has the right to be informed. It's more a Forensic task.
- **Policy definition:** a clear definition of the GDPR data governance policies, actors and taxonomies should be done. AXON more suitable for that.
- **Consent evidence:** we must store the proof of the consent. For example, if the customer filled a form with his personal data and consents, we've to keep a copy of the form, or if the customer gave us his data through the call center, we should to record it. Typically a content manager tool can be used for this. The URL with the proof can be stored with the MDM's consent.
- **Data anonymization:** when the erasure right is applied by a subject, we can delete the data or anonymize it. To anonymize, we can use a simple rule (i.e replace the last 4 digits of the phone by XXXX), or use data masking tools.
- **Archiving:** if we don't have the consent or the consent have been expired, we can still store it for historical purposes. Data Archiving tool can be used.

DPO Intro-GDPR Consents as a Competitive Advantage

Consents
Poorly
Managed

Consents
Mastered

Data as a Risk

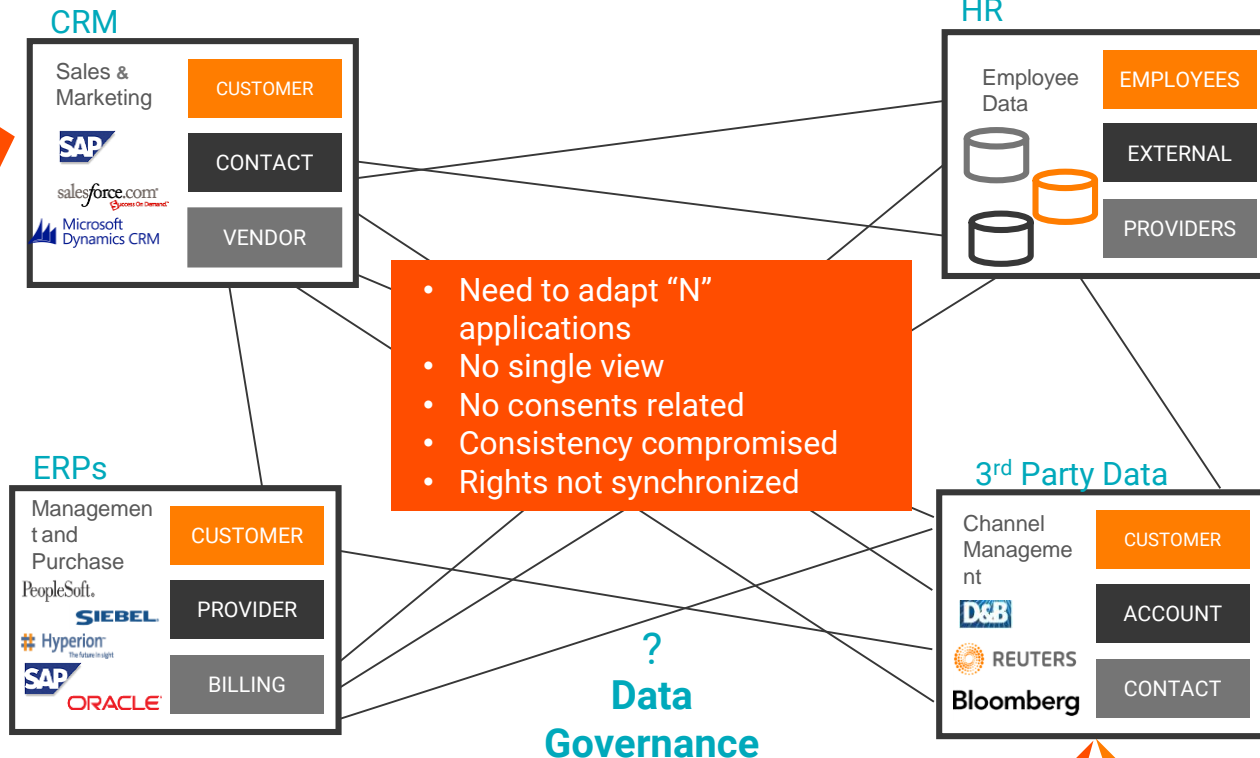

Data as an Asset

Information Challenge

Where to manage consents?

Using an existing application (i.e. CRM) to try to centralize consents is not a good idea: Consents should exist for ALL sensitive information and for ALL processes

Subject Rights and Consent: built upon MDM

CRM

HR

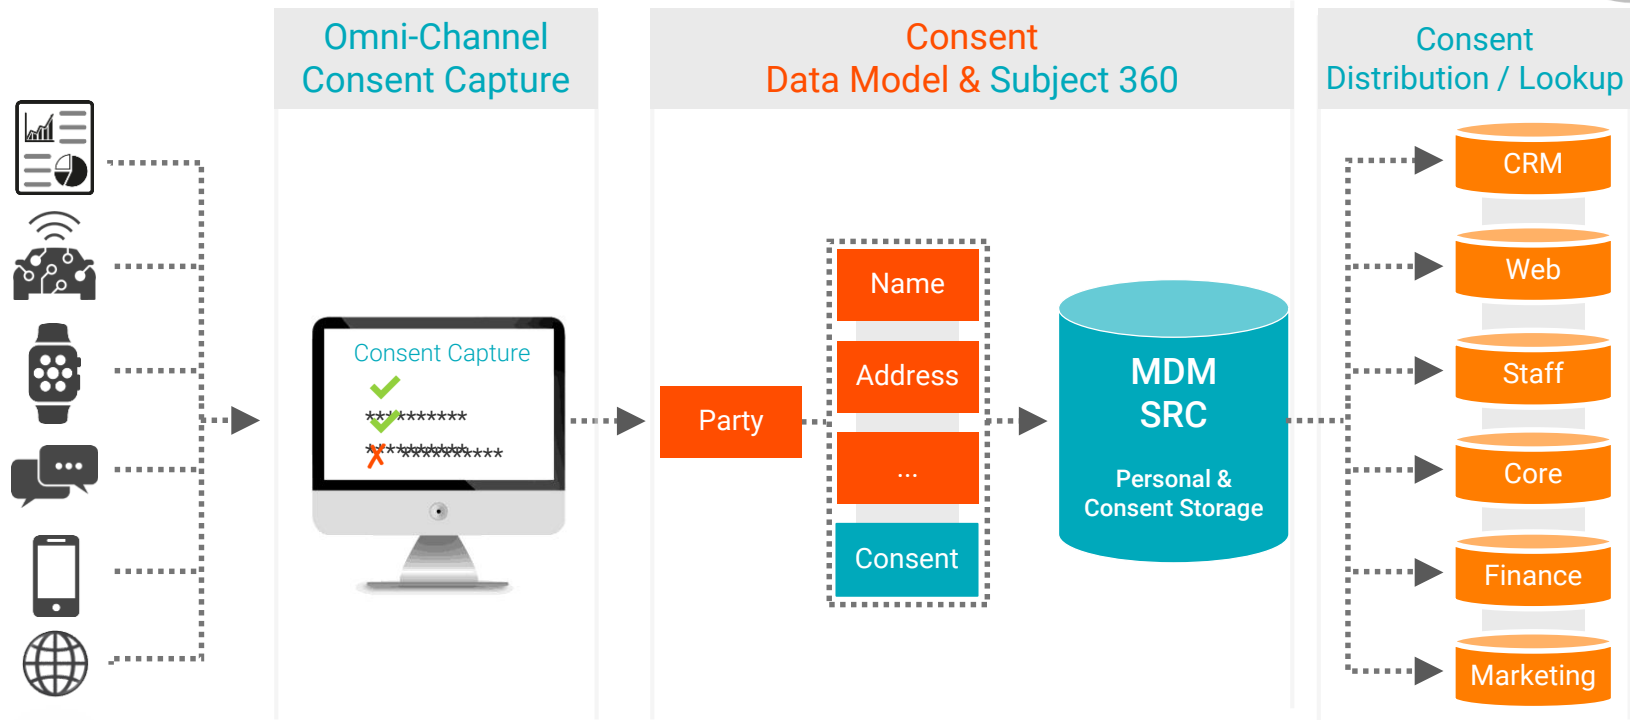

ERPs

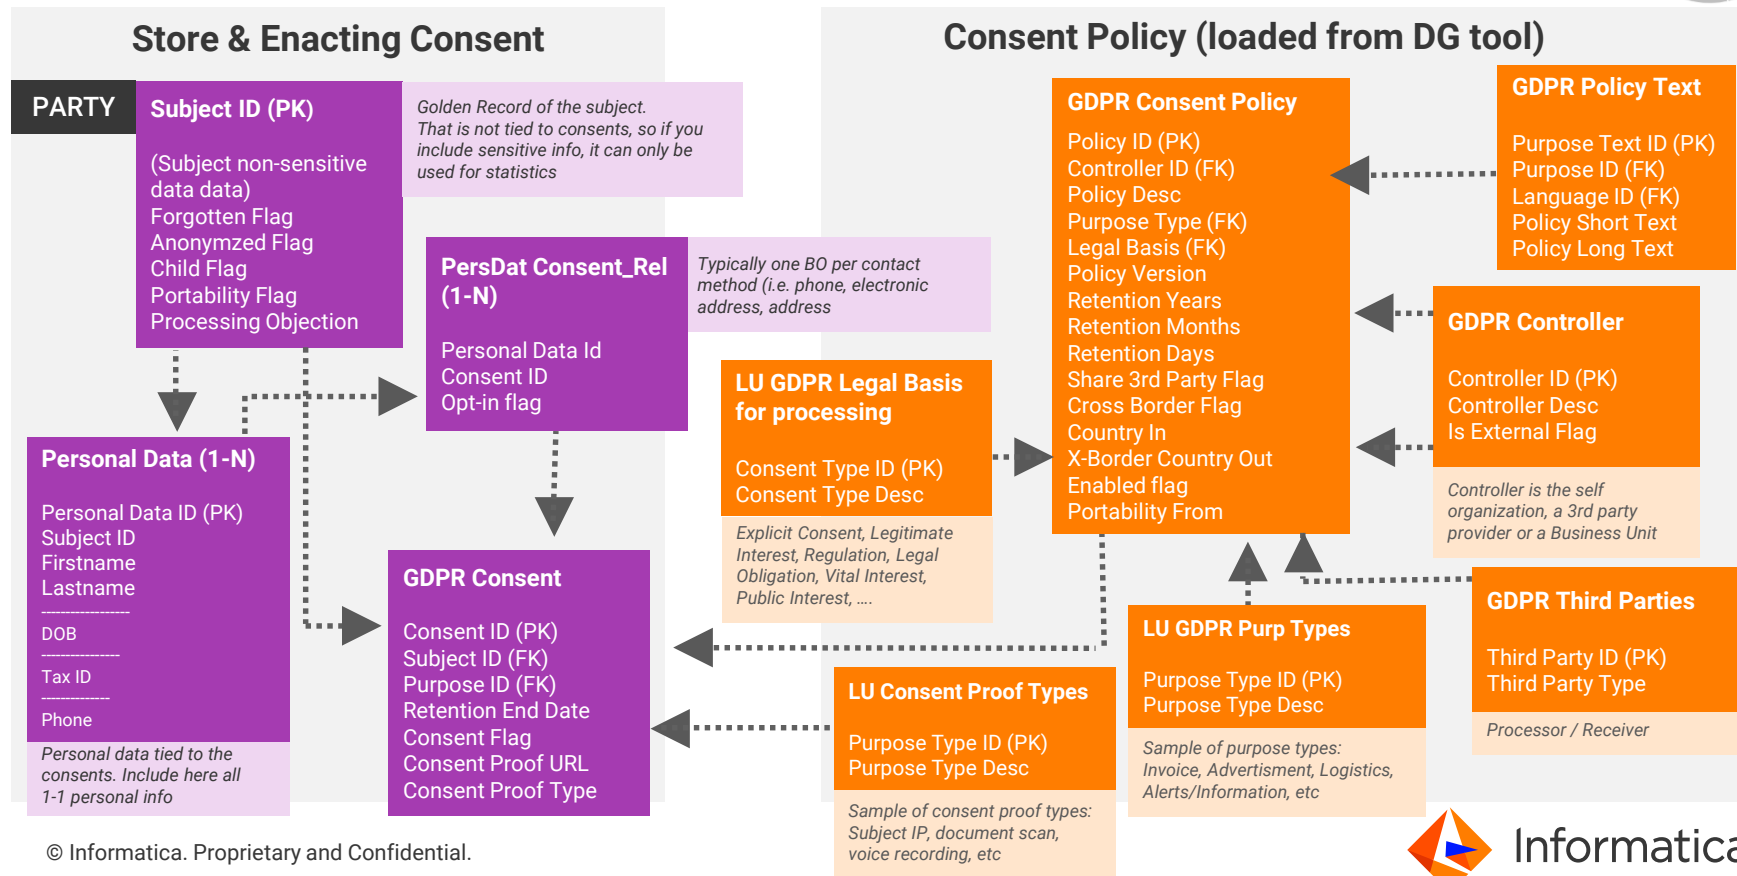

3rd Party Data

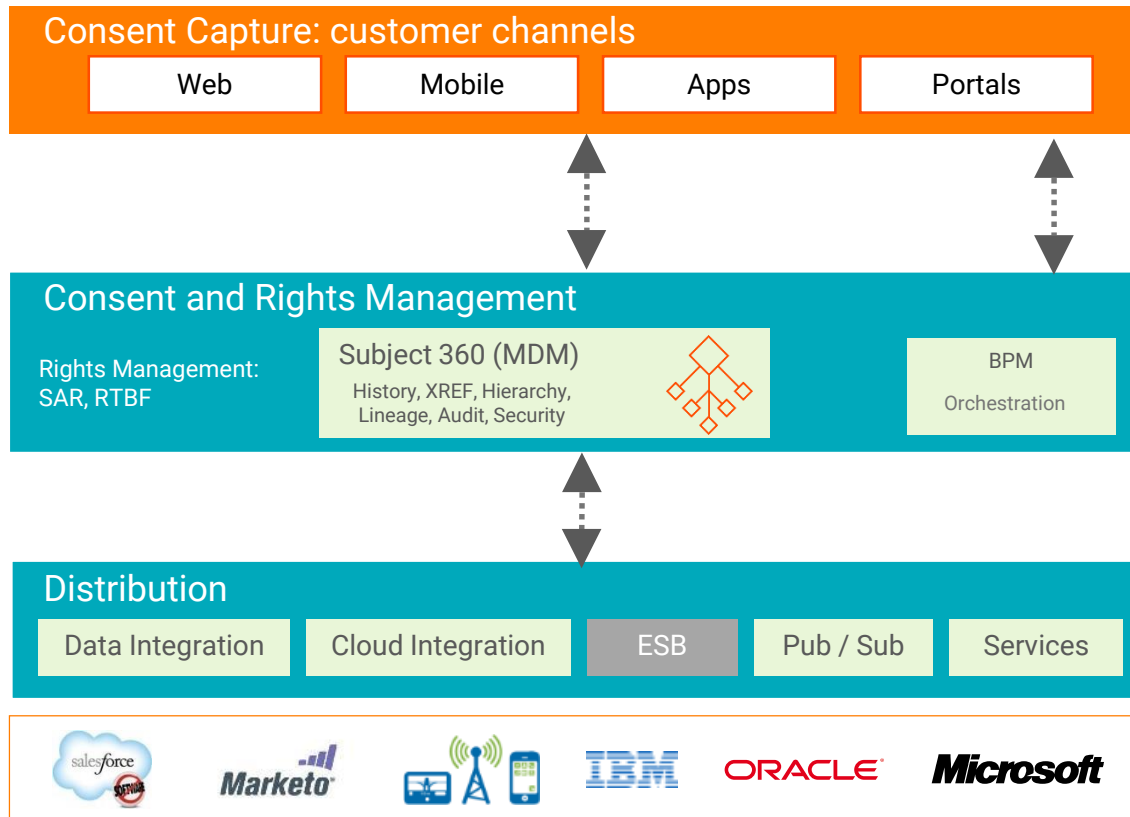

Example: Consent Data Services

Simplified MDM Consent and Rights Data Model

Subject Rights and Consent Architecture

Industry Accelerator: Prebuilt templates to fasten up implementation

Prebuilt Data Models

Industry	Domain(s)
Horizontal	Party Model, Reference Data, Supplier Data
Life Sciences	Investigators, Sites, Studies, Drugs, Compounds, Medical Devices, Provider, Affiliations, Medicinal Products
Healthcare	Provider, Member, Payer, Plan, Groups, Contracts
Telecommunications	Customer, Households, Contracts, Products, Services, Locations
Travel and Hospitality	Customer, Loyalty, Location, Products & Services, Preferences
Education	Constituent, Courses, Publications
Media and Entertainment	Customer, Location, Product, Content Catalog
Insurance	Customer, Broker, Agents, Beneficiaries, Policy, Insurables, Products, Services, Death Master
Banking and Capital Markets	Customer, LEI, Counterparty, Financial Account, Securities, Asset Classes
Retail	Customer, Loyalty, Product, Location, Employee GDSN – Food & Beverage
Oil & Gas	Well Heads, Assets, Location, Contracts, Supplier
Manufacturing and High Technology	Customer, Product, Supplier, Contracts
Public Sector	Person of Interest, Citizen, Supplier,

Industry Accelerators

<i>Customer Data Management for Insurance</i>	<i>Provider Data Management for Life Sciences</i>
<i>Customer Data Management for Retail</i>	<i>Clinical Trials Data Management for Life Sciences</i>
<i>Securities Data Management for Banking & Capital Markets</i>	<i>Medical Device Data Management for UDI Compliance</i>
<i>Counterparty & LEI Data Management for Banking & Capital Markets</i>	<i>Reference Data Management</i>
<i>Provider Data Management for Healthcare</i>	<i>Well Head Master* for Oil & Gas</i>
<i>Payer Data Management for Healthcare</i>	<i>Medicinal Products Data Management* for IDMP Compliance</i>
GDPR – SUBJECT RIGHTS AND CONSENT ACCELERATOR <ul style="list-style-type: none"> • Single view of the subject • Store consents and sensitive data • Provide purpose-based perspectives to the consuming applications • Enacting rights: Access, rectify, objection, portability, right to be forgotten

GDPR Consent Mastering

Demo

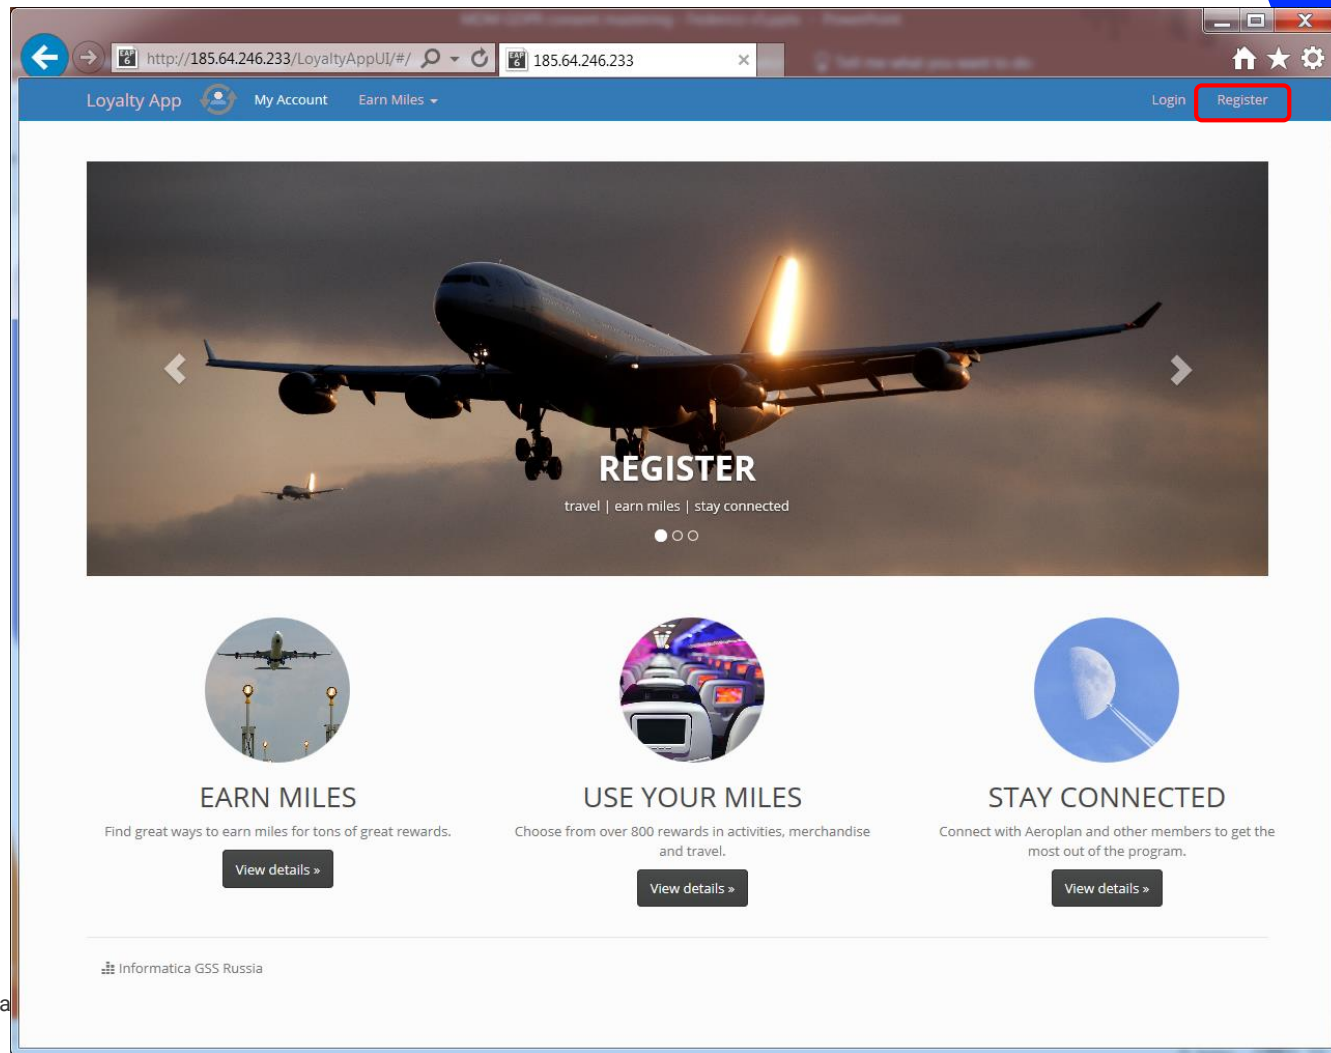

Entering Data & Consent from Apps

Mock Applications

Hello. I'm Jim Taylor, and I want to join to the Wembley's Airlines frequent flyer program, so I'll click on the "register" button

The webpage ask for my personal data, so I'm typing it.

Note I'm using my nickname and personal email address... also the 69 Old Broad Street address

(continues next slide)

Browser address bar: <http://185.64.246.233/LoyaltyAppUI/>

Page Title: Loyalty App

Navigation: My Account | Earn Miles | Login | Register

Your personal info

Title:

Name:

Gender:

Date of birth:

Contact info

Email:

Email is the primary means of communication to keep you in the loop about our news and offers.

Address Type:

Address Line 1:

Street address, P.O. box, company name, c/o.

At the bottom I got four different consent policies. I'll accept the first three: I allow Wembley to send me information from the loyalty program, I accept to receive offers, and also the newsletter. But I don't want my data to be used for analytical usage

Note: policies and texts are fully configurable; those are just for demo purposes.

Browser address bar: <http://185.64.246.233/LoyaltyAppUI/>

- ☒ I accept the [loyalty programme privacy statement](#) and grant Wembley Airlines the usage of the data to send information about the loyalty programme.
- ☒ I consent to receive offers and advertisements from Wembley Airlines. Please read the [advertising privacy statement](#).
- ☒ I want to receive from ACME Advertising co (Wembley's collaborator) the monthly newsletter through email. [Newsletter privacy statement](#).
- ☐ Yes, I consent Wembley Airlines to use my data for analytical and statistical usage.

Sign Up

Now I want to get an invoice of a flight I did two months ago, so I call Wembley Airlines' Customer Service. In that case I give my given name, VAT Number, the work email address and my Company's address. In that case, I don't need to give consent, as invoicing doesn't require an implicit consent.

Datasteward Viewing Data & Consent

MDM Entity 360

*I'm Wembley's
Datasteward... I'm
receiving a complaint
from James Taylor,
because he is receiving
offers into his phone,
and he doesn't want it.
Let's log into
Informatica Data
Director (MDM
Datastewardship
solution) to see what's
going on*

Using MDM smartsearch capabilities, I get easily results based on any data I got from James Tailor to identify him (name, phone, address, etc.) in a google-like search. Let's open it to see his details

Informatica MDM SmartSearch interface showing search results for "james tailor".

Search: james tailor

As DataSteward, I can see all the traceability of the data, knowing where it came from, just selecting the Cross-reference View

Informatica MDM interface showing the 'Person: Jim Tailor' record in the 'Cross-reference Records' view.

The interface includes a navigation pane on the left with sections like 'Overview', 'Address', 'Name', 'Telecom', 'Electronic Address', and 'GDPR Consents'. The main area displays a table of cross-reference records for the entity 'Person'.

The table shows data from two sources: CRM (CRM-GBR-261) and Billing (BI-GBR-266). The 'Display Name' column shows 'Jim Tailor' for the CRM source and 'James Tailor' for the Billing source.

Two callouts highlight the data sources:

- Here is the data coming from the Loyalty system
- Here is the data coming from the Billing system

The table also includes columns for 'firstName', 'lastName', 'Display Name', 'Forgotten Flag', 'Child Flag', 'Anonymized Flag', 'Portability Flag', and 'Object to Processing'.

On the History view I can see all changes happened on the data... for example, here I can see the opt-out I just did... I can see the date of the update, what was the previous value, user that made the update, etc.

Informatica MDM interface showing the History view for the entity 'Person: Jim Tailor'.

The interface includes a navigation pane on the left with sections like Overview, Address, Name, Telecom, and GDPR Consents. The main area displays a timeline of updates for 'GDPR Telecom Consents'.

The History view shows a list of updates with details such as the date, time, and user. The 'Opt in Flag' is highlighted in red, showing a change from 'Y' to 'N'.

The 'Before' and 'After' comparison table shows the state of the data before and after the update. The 'Opt in Flag' is highlighted in red, showing a change from 'Y' to 'N'.

Right to be Forgotten & Portability workflows

ActiveVOS (MDM BPM Option)

I'm the Wembley's DPO, and we got a certified letter from James Taylor requesting his right to be forgotten.

OMG! That means I've to search in our 50 different apps where we have personal information to see if James Taylor Exists??

No! fortunately we got Informatica MDM, and we have all our subjects centralized there

All I've to do is to search the person from here, edit, and check the "Forgotten Flag" checkbox. When I save, that will trigger a workflow, as the RTBF requires extra verifications

Informatica @Informatica

Every organization is undergoing #Digitaltransformation, the key is - "It Takes Data to Delight Your Customers" [info.media/wp170602a](#) #AI

Ok, I've verified this customer has no debts and no active services, so I'll approve his RTBF request... otherwise I can cancel the request (I'd write a justification and the DPO would get a notification), or escalate the request to someone else

Screenshot of the Informatica MDM web application interface showing a task manager and a detailed view of a GDPR task.

With the workflow ID is easy to track who managed each right, and see all the details of the process

Enacted rights

With MDM Subject 360, all personal data and consents are safely secured, audited, historified and managed in a centralized and consistent way.

It can be used for all our subjects, not only customers and prospects, also employees, visitors, ...

The GDPR consent & rights compliance is managed from MDM, a minimal adaptation of the applications are required!
