

04 June, 2024

Manage IICS Environment Effectively Using Assurance Service

- Ojas Srivastava, Lead Application Specialist, GCS
- Azfar Zaidi, Senior Application Specialist, GCS

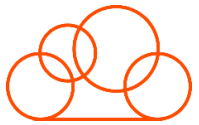

Where data & AI come to **LIFE**

Housekeeping Tips

- Today's Webinar is scheduled for **1 hour**
- The session will include a webcast and then your questions will be answered live at the end of the presentation
- All dial-in participants will be muted to enable the speakers to present without interruption
- Questions can be submitted to "All Panelists" via the **Q&A option** and we will respond at the end of the presentation
- The webinar is **being recorded** and will be available on our [Success Portal](#) - where you can download the **slide deck** for the presentation. The link to the recording will be emailed as well.
- Please take time to complete the **post-webinar survey** and provide your feedback and suggestions for upcoming topics.

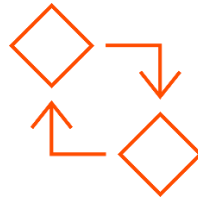

Feature Rich Success Portal

Assurance Pack

Lower Risk

Reduce Costs

Increase Visibility

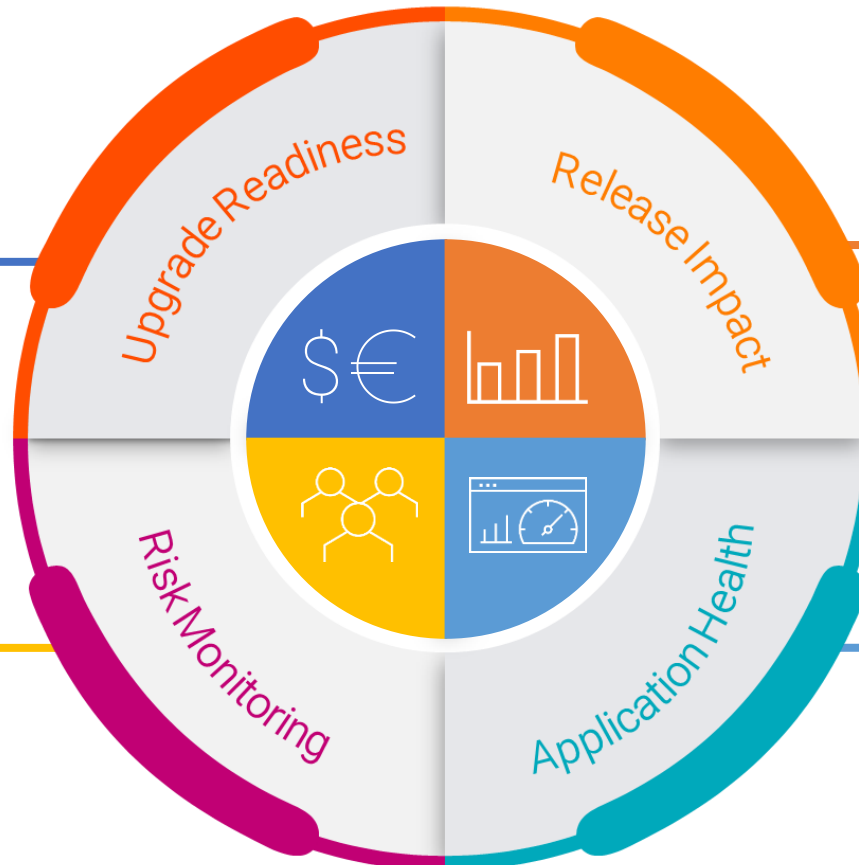

Shared Goals

Simplify your upgrade process with automated asset migration and easy regression testing

Understand the impact of release features for your environment and identify potential security risks

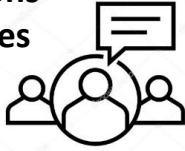

Track and monitor KPIs, adoption metrics and configuration change impacts in one place

OnDemand health check, performance and environment assessment and more

Automation, Insights and Management

Recommendations
and Best practices

IDMC Metadata

AI-assisted analysis

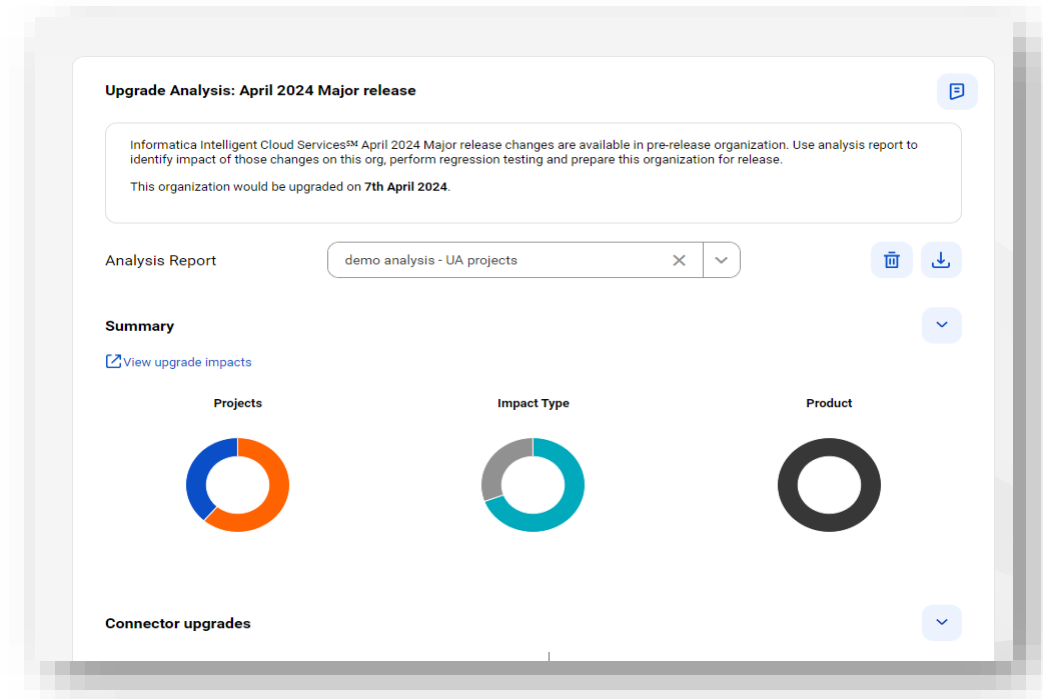

Assurance
Service

- ◆ **Upgrade Readiness**
Identify and prepare for potential impacts of IDMC upgrades
- ◆ **Code Promotion and SDLC**
Promote and integrate components using Assurance
- ◆ **Audit and monitoring**
Monitor and oversee IDMC user activities
- ◆ **Application Health and Maintenance**
Health check and org maintenance
- ◆ **Governance and troubleshooting**
Generate automated reports and recommendations

Upgrade Readiness

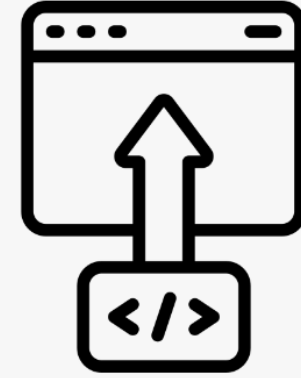

- Identify and prepare for IDMC upgrade impacts to your organization
- Detailed analysis of impacts
- Migrate impacted asset to test and pre-release organization

Asset Management

- Allows users to perform various operations on assets like deployment and scheduling
- Assets go through an analytical pipeline before appearing in this section

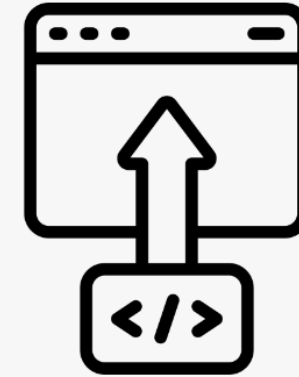

The screenshot shows the Informatica Asset Management interface. At the top, there's a navigation bar with the Informatica logo and 'Assurance Service'. The main header is 'Asset Management' with a 'Last Refreshed On: 1 month ago' indicator. Below the header, there are tabs for 'Explore Assets', 'Deployment Flow', 'Recently Deployed', and 'Reviews'. The main content area displays a table of tasks with columns for Name, Task Type, Project Name, Folder Name, Last Run, and Last Updated. The table contains 20 rows of task entries.

Name	Task Type	Project Name	Folder Name	Last Run	Last Updated

Pushdown Optimization Dashboard

- Perform bulk analysis for PDO eligibility
- Get in-depth insights for Non-eligible tasks and steps to enable PDO for them

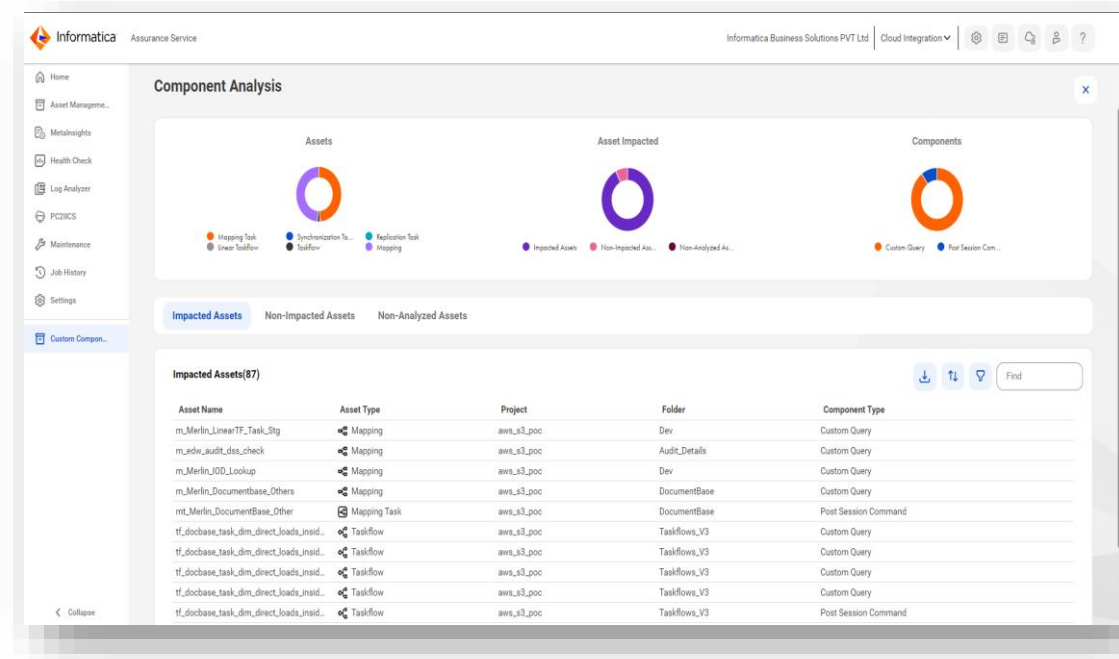

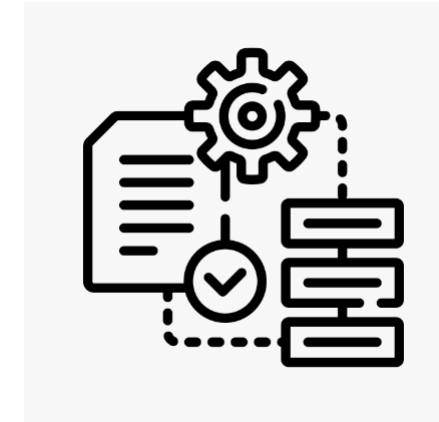

The screenshot shows the Informatica Assurance Service interface. The top navigation bar includes the Informatica logo, 'Assurance Service', and user information. The main content area is titled 'Metalights' and has tabs for 'Activity Tracker', 'Pushdown Optimization', 'Parameter Files', 'Custom Components Analysis', and 'Metaquery'. The 'Pushdown Optimization' tab is active, displaying three charts: 'Eligibility Status' (a donut chart showing Eligible, Not Eligible, and Pushdown Optimized), 'Supported Connectors' (a donut chart showing various database and cloud connectors), and 'Asset Analysis' (a table showing Last Analysis, Supported, Analyzed, Pending Analysis, and Unsupported counts). Below the charts is a 'Mapping Tasks(6)' table with columns for Asset Name, Project, Folder, User, Last Analysis, Last Updated, and Eligibility Status. A tooltip is visible over the 'Pending Analysis' status of the second row.

Asset Name	Project	Folder	User	Last Analysis	Last Updated	Eligibility Status
mt_Merlin_CAL_S...	oJOrg	CAI	sdevi	November 29, 2023 1...	Mar 27, 2023 5:20 AM	Not Eligible
mt_Merlin_CAL_S...	MerlinV2_Old	CAI	sdevi	Task or one of its dependencies was updated after analysis		Pending Analysis
mt_Merlin_CAL_S...	aws_s3_poc	S3_Development_Ph...			May 9, 2024 2:05 AM	Not Eligible
mt_Merlin_CAL_S...	MerlinV2	CAI			Apr 8, 2024 12:25 AM	Pending Analysis
mt_Merlin_CAL_S...	aws_s3_poc	CAI			May 2, 2024 11:29 PM	Not Eligible
mt_Merlin_CAL_S...	aws_s3_poc	CAI_Parquet			May 13, 2024 8:11 PM	Not Eligible

Parameter Files, Metaquery and Custom component analysis

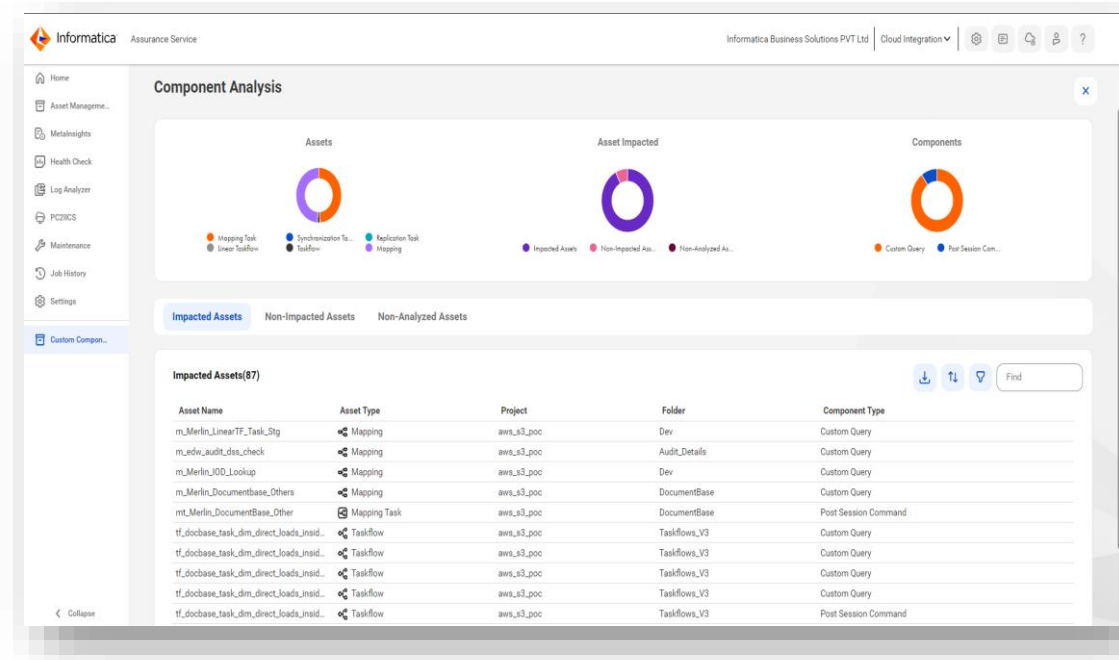

- Manage Parameter accessibility across tasks
- Custom component analysis across assets
- Perform queries on Mapping task metadata

Health Check

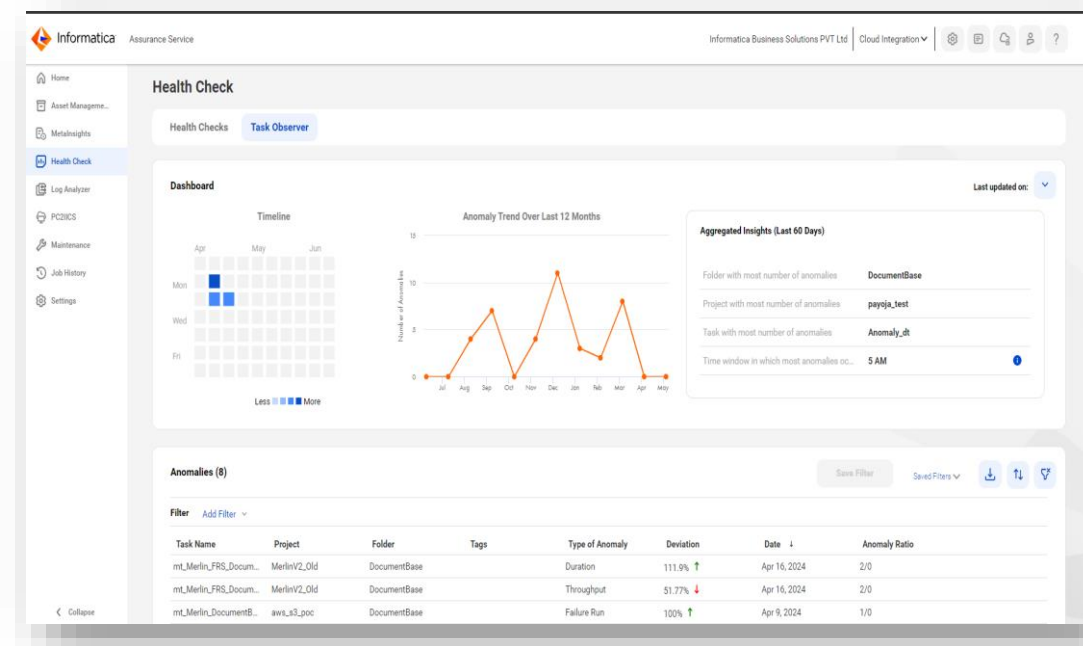

- Perform an org-wide analysis of CDI, CAI and CDI-e assets
- Run pre-defined rules to identify assets violating recommended best practices
- Create custom rules as per your organizations needs

Task Observer

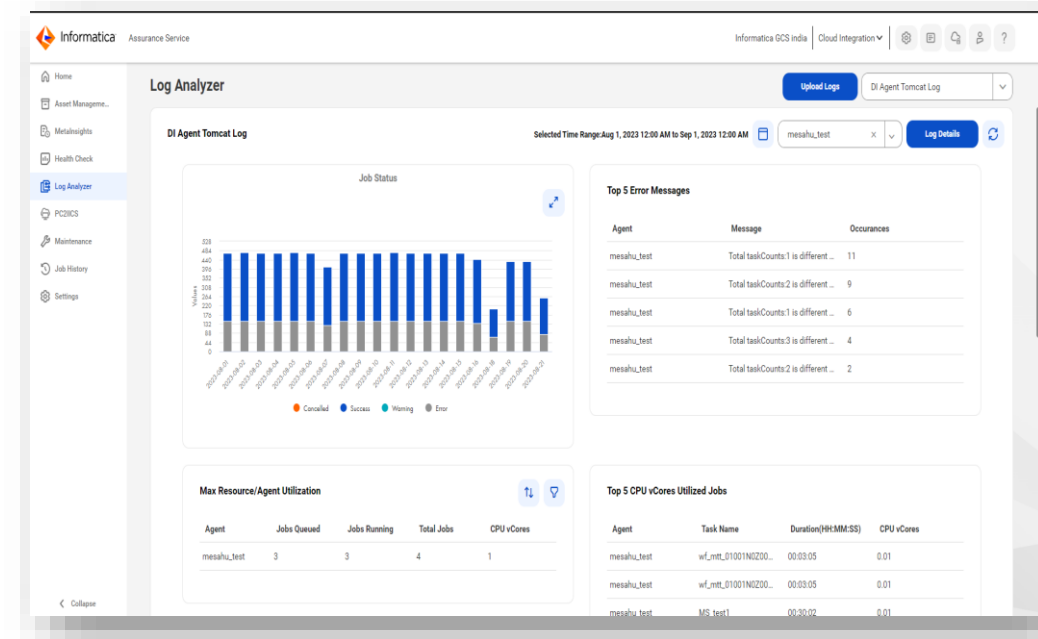

- Analyses runtime patterns of the organization
- Flags significant deviations from these patterns as anomalies
- Firsthand analysis for possible root causes of anomalies

Log Analysis

- Creates easy to assess visualizations from logs
- Bridges gap between the debugging platform used by support teams and customers

PC2IICS comparison

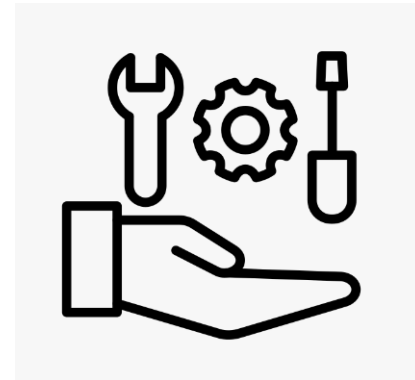

- Compare PowerCenter Mappings and Sessions with IDMC Mappings and Mappings tasks respectively
- Easier to debug cross ecosystem issues

The screenshot displays the Informatica Assurance Service interface. The main content area is titled 'Comparison Results' and shows a 'Migration Comparison - m_QA (XML) - m_QA (Mapping from Organization)'. The interface includes a sidebar with navigation options like Home, Asset Management, Metalsights, Health Check, Log Analyzer, PC2IICS, Maintenance, Job History, Settings, Testpc, and Comparison Results. The main area is divided into two panels: 'Results' on the left and 'Mapping / Transformations' on the right. The 'Results' panel shows a tree view of mappings and transformations, including LKPTRANS, LKPTRANS1, SQ_sample, SQ_sample1, Shortcut_to_ADDRESS, and SQ_Shortcut_to_ADDRESS. The 'Mapping / Transformations' panel shows a table with columns for Name, XML: m_QA, and Asset: m_QA. The table contains 6 rows of data, each with a small icon and a numerical value. The interface also includes a search bar, a 'Hide Missing Properties' dropdown, and a 'Difference' indicator set to 'Same'. The bottom of the interface shows '1 - 6 of 6 Items', 'Page 1 of 1', and 'Items Per Page: 10'.

Name	XML: m_QA	Asset: m_QA
LKPTRANS	1	
LKPTRANS1	1	
SQ_sample	3	
SQ_sample1	2	
Shortcut_to_ADDRESS	3	
SQ_Shortcut_to_ADDRESS	3	

Maintenance

- Perform Agent compare and Agent sync
- Naming convention application
- Connections dashboard
- Organization compare

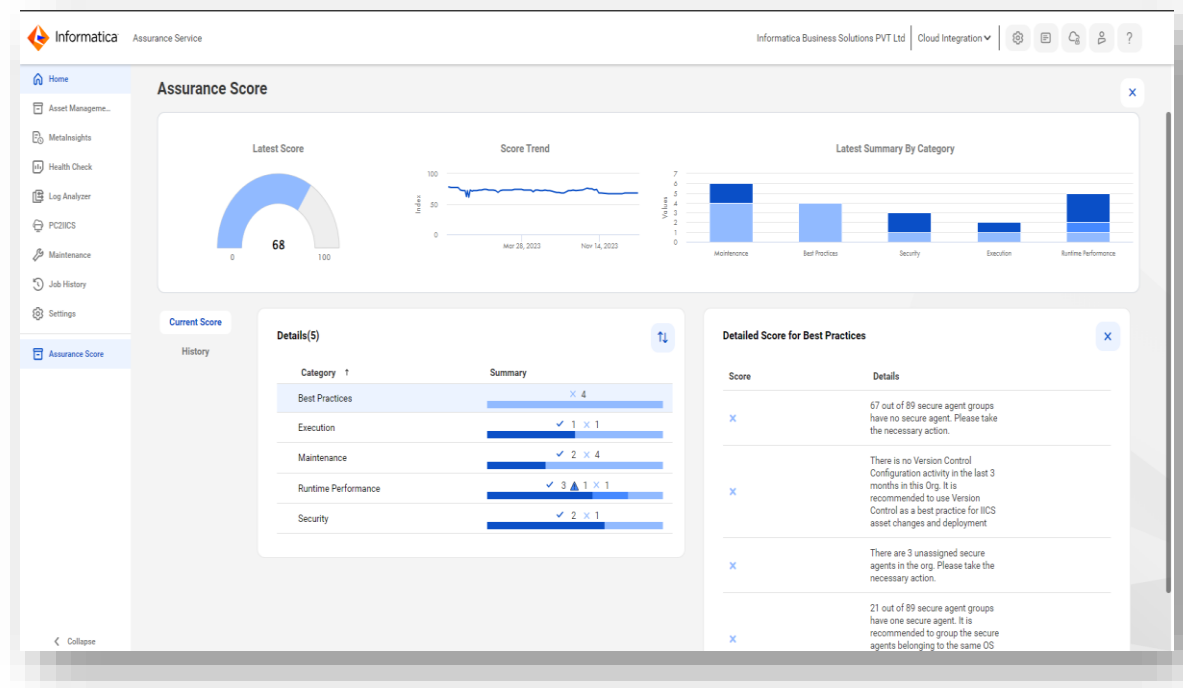

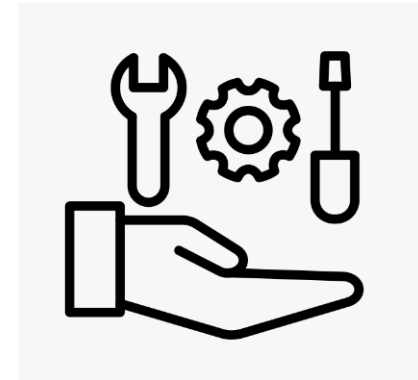

The screenshot shows the Informatica Assurance Service interface. The main content area is titled "Maintenance" and has four tabs: "Secure Agents" (selected), "Naming Conventions", "Connections", and "Organization Compare". Below the tabs is a table with 76 items. The table has three columns: "Agent Name", "Agent Group Name", and "Last Updated".

Agent Name	Agent Group Name	Last Updated
ars_cdl_srte_edoG7ccaPcEbuqB6WqDE5_11320	ars_cdl_srte	Mar 6, 2024 10:50 PM
INWPF1YKBY-AAD	INWPF1YKBY-AAD	Mar 6, 2024 10:50 PM

dqps.informatica.com	dqps.informatica.com	Dec 20, 2023 9:47 AM

At the bottom of the table, it says "1 - 10 of 76 Items" and "Page 1 of 8". There is also a "Items Per Page" dropdown set to 10.

Assurance Score

- Provides an aggregate score for the organization across multiple dimensions
- Utilizes AI models to plot the score trend by consuming all metadata info

Assurance service for MDM

Log Analysis

- View the list of all job run instances from the last 3 months for an org.
- View summary visualizations which provide an aggregated view of job run instances.
- Automatically fetch and analyze the logs related to a particular job run instance.
- Show analyzed metrics in a detailed view.

The screenshot displays the Informatica MDM Analysis interface for a specific job run instance. The interface is organized into several sections:

- Job Info:** Shows job type as 'Ingress', start time as 2024-03-26 08:30:01, end time as 2024-03-26 08:32:14, and a duration of 2m, 13s.
- Phases:** A flow diagram showing the sequence of steps: Start, Extract (2 steps), Transform (3 steps), Load (1 step), Index (3 steps), and End.
- Transform Steps:** A table listing the steps of the transform phase.
- Entity Details:** A table showing details for the entity 'Person'.
- Disnext Jobs:** A table for listing subsequent jobs.

Step	Queued Time	Start Time	End Time	Error Count	Partition Id	Correlation Id
PartitionInfo	-	2024-03-26 08:30:51.877	2024-03-26 08:30:52.772	-	-	-
disnext	-	2024-03-26 08:30:56.154	2024-03-26 08:31:06.246	-	-	-
Transform-merge	-	2024-03-26 08:31:06.896	2024-03-26 08:31:07.104	-	-	-

Entity	Type	Guid	Partition Start	Partition End
Person	BusinessEntity	c360 person	1	1

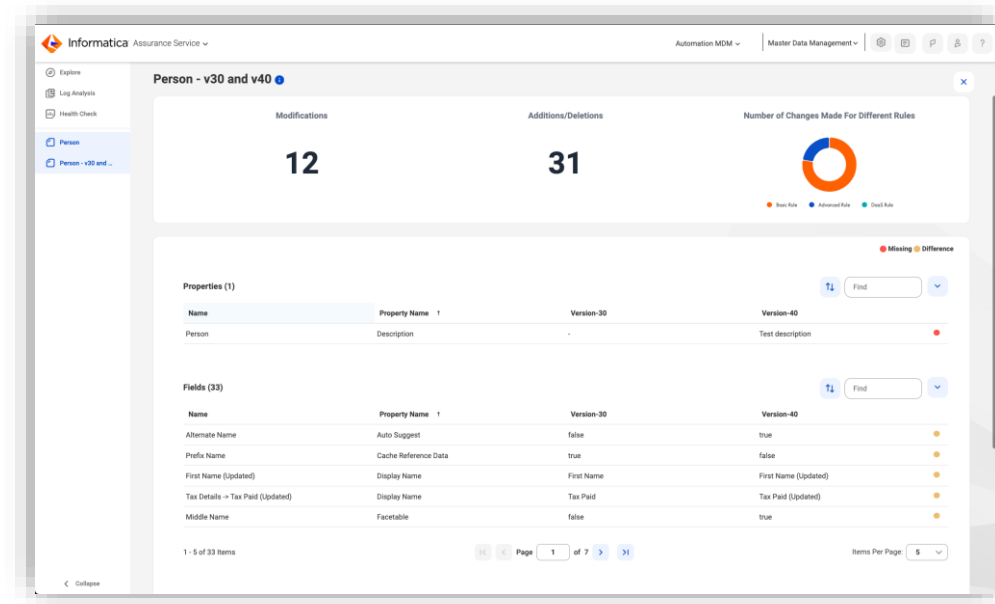

Partition Id	Mapping	Execution Id	Correlation Id	Request Id	Start Time	End Time
--------------	---------	--------------	----------------	------------	------------	----------

Log Analysis - Demo

Configuration Version Compare

- View a list of all versions of an MDM asset configuration and compare any two versions.
- View differences and missing properties in a tabular format.
- Assets supported for version comparison –
 - Business Entity
 - Business Event
 - Job Definition
- More asset types to be included in future.

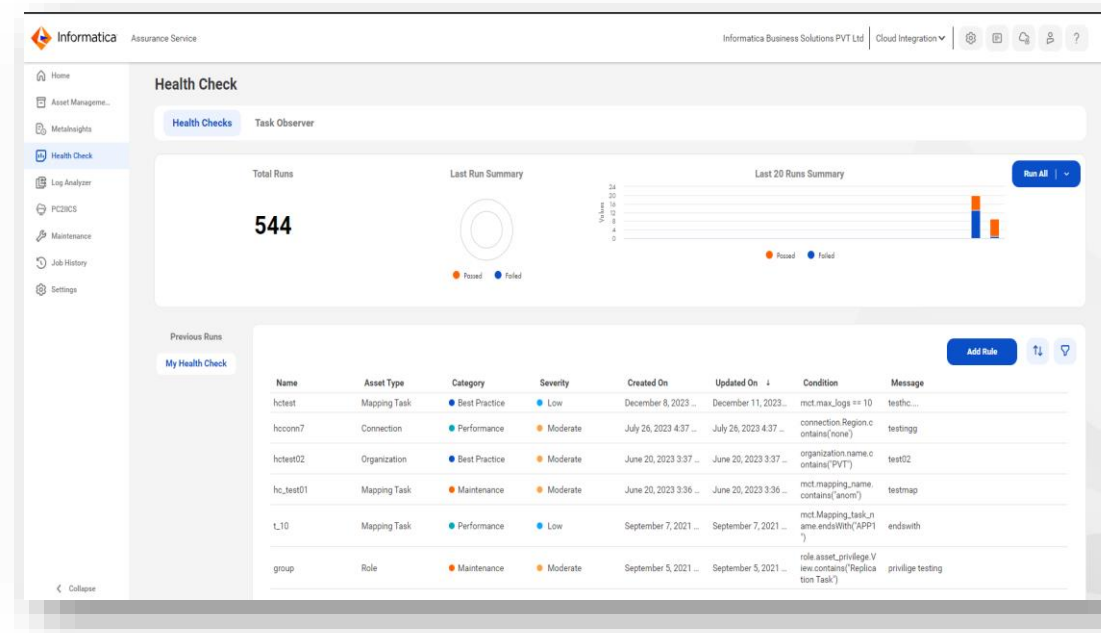

Configuration Version Compare - Demo

Health Check

- Perform an org-wide analysis of MDM assets and executes pre-defined rules on them.
- Assets which fail to comply with the pre-defined rules are flagged.
- Recommendations and KB article links shown for each rule.
- Currently, 16 pre-defined rules are supported.

Health Check - Demo
