

Cognizant® Enterprise Reference Data Manager for healthcare

A generic healthcare reference data framework leveraging industry-leading Informatica® Reference 360

The Cognizant® Enterprise Reference Data Manager for healthcare offers a generic framework with pre-loaded industry standard datasets and a well-defined data model that eliminate the need for manual reference data setup. Through automation, our platform consolidates consistent, high quality reference data to unlock valuable data potential for healthcare players.

“ Informatica’s MDM, data governance and privacy, and cloud data integration capabilities coupled with Cognizant’s data and intelligence services offer accelerated digital transformation for many industries.”

Naveen Sharma
Global Practice Head – AI & Analytics

Key features

- Pre-configured data model for industry standard code sets
- Pre-configured cross-reference constructs to maintain mapping between code sets
- Pre-configured hierarchy containers to maintain multi-level, multi-hierarchy code set taxonomies such as SNOMED, CPT
- Pre-loaded with industry standard enterprise data sets such as FHIR R5
- Supports workflow-driven code set management
- Provision code sets, hierarchies and Xwalks to consuming systems

Competitive advantages

- **Strategic lever**

Ensure that your organizational data strategy and roadmap is aligned to federal advocacy of interoperability in line with healthcare industry regulations

- **Legacy enterprise system alignment**

Inherently map industry standard reference data with legacy systems for BAU operations

- **Greater operational efficiency through automation**

Streamline bulk operations for reference data on-boarding and maintenance result in cost savings

- **Pre-loaded external data standards**

Get support for the majority of industry data standards for health information (ICD10, SNOMED CT, CPT, HCPCS, LOINC, UB04, etc.)

- **Supports complex end-to-end reference data use cases**

Handle complex hierarchies, relationships, crosswalks and attributes

- **Cloud native ecosystem**

Leverage Informatica's industry-leading SaaS MDM platform for a future-ready scalable solution

About Cognizant

Cognizant helps companies modernize technology, reimagine processes and transform experiences so they stay ahead in a fast-changing world.

Benefits and added value

- Simple mapping of industry standard datasets enables integration with enterprise systems
- The intuitive console-based application is designed for developers/configurators
- Reduce manual efforts in configuration and maintenance
- Eliminate errors associated with conventional UI-based configuration
- Eliminate need for additional tools for data preparation, data loading, export and testing
- Seamlessly migrate configurations and data across environments
- Benefit from significant cost savings due to faster build and deployments
