

Integration of Protegrity and Informatica Enterprise Data Catalog

Information Asset has developed a solution to import metadata from Protegrity Insights into Informatica Enterprise Data Catalog and links it to actual catalog columns.

Informatica Enterprise Data Catalog (EDC)

Informatica Enterprise Data Catalog provides data analysts and IT users with powerful semantic search and dynamic facets to filter search results, data lineage, profiling statistics, holistic relationship views, data similarity recommendations and an integrated business glossary.

Protegrity

Protegrity is the only enterprise data security software platform that combines machine learning, data discovery and classification tools. This includes data-centric encryption, tokenization, de-identification and masking to help businesses secure sensitive information everywhere while maintaining data usability. Protegrity Insight is a data discovery system that inspects, locates and tracks sensitive information and aims to provide the right solution to your data. Protegrity Insight continuously scans the configured data stores to locate any sensitive data instance residing in the clear text format.

Classification details

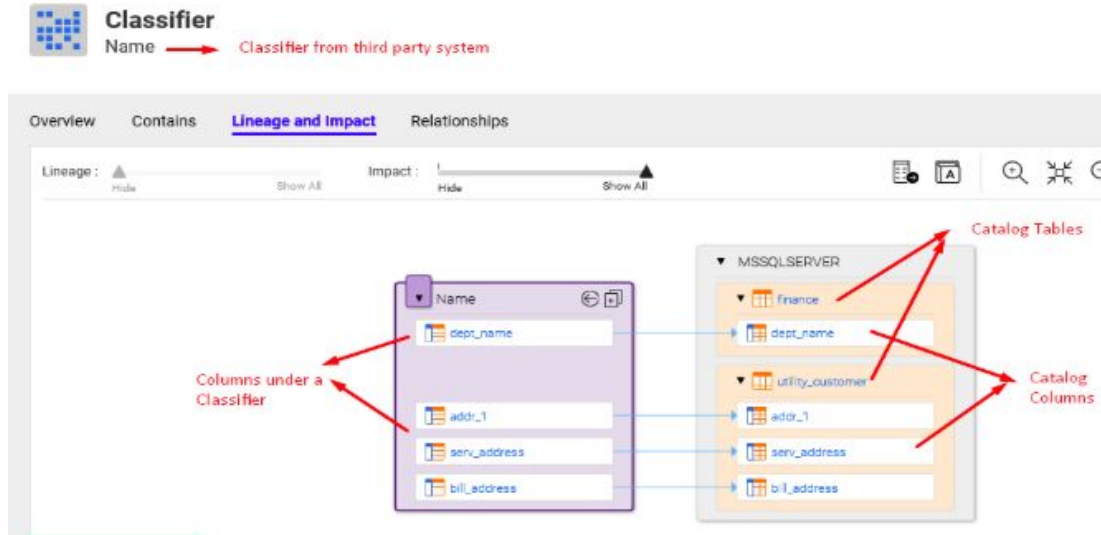

The screenshot shows the Protegrity Insights web interface. The top navigation bar includes 'Dashboard', 'Discovery Rules', 'Manage Discovery', and 'Appliance'. The main content area is titled 'Classifications' and shows a list of classification results. A table with columns 'Date', 'Scan Id', 'Classification', 'Score', 'Observed', and 'Estimated' is displayed. Below this, a detailed view for a specific scan shows classification results for 'Persons Name', 'Email Address', and 'Password'.

Date	Scan Id	Classification	Score	Observed	Estimated
2019-04-12 03:33:26	el9MD2oBjIQ9nkff_LvR	EMAIL	100%	950	4404

Date	Classifier	Classification	Score	Details
2019-04-12 03:33:17	Persons Name	NAME	99%	boost: 1.2, checked: 1000, country: {"US":361,"DE":25,"IT":10,"NL":23}, dupli [{"name":"firstlast","regex":"(?:)first last sur person family emp loyee}?cust
2019-04-12 03:33:10	Email Address	EMAIL	100%	boost: 2, checked: 875, duplicates: 125, empty: 0, passed: 950, qualified: 96: [\\s_]?mail[\\s_]?(add(r(ess)?)??)?,"boost":2}}
2019-04-12 03:32:34	Password	PASSWORD	0%	checked: 1000, duplicates: 125, empty: 0, passed: 1, qualified: 99, received:

This solution imports metadata from Protegrity Insights into Informatica Enterprise Data Catalog and links the Classifiers from Protegrity to actual Catalog columns.

Classifier to Column and Column to Catalog column relation

About Information Asset

Information Asset has a market-leading Data Governance Practice that covers data stewardship, data quality, and metadata management across multiple industries. You can find a complete listing of Information Asset's capabilities built for [Informatica here](#).
