

Sensitive Data Management Accelerator for Informatica Axon

Information Asset has created a Data Governance Accelerator for Sensitive Data Management based on Informatica's market-leading product Axon, eliminating implementation complexities and dramatically speeding up time to delivery of a truly collaborative Axon data governance program. The accelerator should easily reduce governance start-up time by six to eight weeks.

The Sensitive Data Management Accelerator includes sample glossaries of sensitive business terms, regulations, policies, workflows and controls commonly used with Sensitive Data Management.

The Accelerator includes integration capabilities with other vendor products including IBM and Protegrity, which provide the ability to discover enterprise sources of data and classify it based on business rules in IBM Guardium or Protegrity Insight which can then be imported into Enterprise Data Catalog (EDC) and linked to technical metadata.

This Accelerator Package includes 40 (non-refundable) hours of remote consulting by a Data Governance Subject Matter Expert and is to be utilized within 90 days of purchase.

What is included:

- NIST Cybersecurity Guidelines aligned to Controls
- Controls & Control Mechanisms and mappings to Regulations.
- Jurisdictions & Regulations including CCPA, GDPR, PIPA, PDPA, PIPEDA, CASL, APP
- Workflows:
 - Personal Data Element Approval
 - Link Glossary to Attribute
 - System Approval
 - Regulation Approval
 - Glossary Approval
 - Cloud Data Ingestion
- Data Subject Access Request (DSAR) Leveraging Informatica Product Line
- Integration between IBM Guardium and Protegrity insight and Informatica EDC
- Integration between IBM InfoSphere Information Governance Catalog and Informatica EDC

Additional services included:

Informatica Axon backup and restore - You will receive 40 hours of remote consulting to be used within three months. You will also get access to sample Axon content on Information Asset's hosted AWS environment for 90 days.

About Information Asset

Information Asset has a market-leading Data Governance Practice that covers data stewardship, data quality, and metadata management across multiple industries. You can find a complete listing of Information Asset's capabilities built for [Informatica here](#).
